Alumni of the University of British Columbia

FOURTH ISSUE
FEBRUARY, 1925

FOREWORD

The present issue of the Alumni Directory of the Graduates of the University of British Columbia is an attempt to give as nearly as possible a correct statement of the names, degrees, addresses and occupations of the members, now numbering 750.

Last September, when I undertook to publish the following information early in 1925, I did not realize what a great undertaking it would be. However, through the kindness of Mr. Mathews, our Registrar, I was given access to the Convocation roll and other documents which enabled me to find the correct spelling of most of the names.

From last year's Directory the addresses of all graduates prior to 1924 were obtained and the opportunity was taken when Miss Carruthers was mailing the bulletins of enclosing a questionnaire asking for the permanent address, present address, further degrees, present occupation and omissions or mistakes noted in the last Directory. A line was left vacant for suggestions as to how the Alumni Association can better serve each member.

As the returns were very slow I soon realized that this was due largely to insufficient knowledge of the addresses. I then made use of the telephone directories of the various cities and corrected many of these addresses. Through other sources I have tried to reach as many as possible of the missing Alumni and have succeeded except for about half a dozen.

A few suggestions from various sources have been incorporated in this issue. Instead of classifying the Alumni as Arts, Science or Agriculture such and such a year, owing to the fact that some members of the more recent years have had their degrees conferred at some other time than the rest of the class, due to various causes, the year of graduation has been given instead. This conforms with the Convocation roll, which is the source of information when inquiry is made of a Graduate's standing through the Registrar.

In the last few years many of the Graduates from our Alma Mater have gone to other institutions for postgraduate study and in many cases they did not return to British Columbia, so that little was known about the results of their studies. I have had some trouble

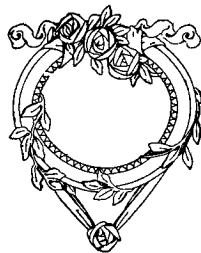

in getting what information I have acquired but as may be seen by a very casual glance through the following pages, most of our Graduates have done very creditable work indeed.

The Master's degrees have been given of those who took the M.A., M.A.Sc., or M.S.A. here since the University began in 1916. The major and minor subjects only are given, except in such cases where the degree was granted to Graduates of other institutions, then the address and occupation is given. In all other cases the year of first graduation is given. This to avoid duplication in the compiling of statistics. In this connection, and for the same reason, there are about six Graduates who have taken a second Bachelor's degree. These have been listed only in the case of the second degree.

As it is very hard to get all the information regarding each graduate up to date, I would consider it a personal favor if, upon reading this Directory through, you would kindly sit down and send me (Van Wilby, 1240 Victoria Drive, Vancouver, B. C.) a note containing any correction or omission, no matter how slight it may seem to you, so that the next issue may not have such a legacy of errors. In this connection, would you also give your Faculty and year as well, as there are duplicate initials for several names already. It also would be a great help if each Alumna would give her maiden name as well as any others contracted since graduation.

Yours sincerely,

*VAN WILBY
