The glacier on N.E. of B.T. has  
receded greatly, less than  
 $\frac{1}{2}$  of the area of 10 yrs ago  
By 1937 I expect it will be  
gone entirely.

Helmet Lake is less than  
 $\frac{1}{2}$  the area it was. It  
has filled up largely by  
the erosion of the tuffa  
cone
