

GOLDEN JUBILEE HOMECOMING

U.B.C. REPORTS

Volume 4, No. 7

November, 1958

BIG TASK facing UBC Librarian Neal Harlow in next year is unpacking 300 cartons containing an estimated 20,000 volumes of Canadiana presented to UBC by the Friends of the Library. The ten-ton collection, purchased from the estate of the late Thomas Murray of Montreal, gives UBC one of the finest collections of books on Canada in the world.

BOOKS

Ten Tons Given by 'Friends' of Library

A huge collection of books about Canada, weighing ten tons and containing an estimated 20,000 volumes, has been presented to the University of British Columbia library.

ENCOURAGE INTEREST

The collection was acquired by an organization known as the "Friends of the Library" from the estate of the late Thomas Murray, a Montreal manufacturer who died in 1955. The "Friends of the Library" was formed two

years ago to encourage an interest in the development of the UBC library.

CANADIANA COLLECTION

The acquisition will give UBC one of the finest collections of Canadiana in the world according to librarian Neal Harlow, who announced the purchase at the autumn meeting of the "Friends".

"We know we have ten tons of books because we paid transportation on that weight," Mr. Harlow said. "As for the number

of books contained in the 300 cartons, that's anyone's guess. Only 4000 of them were catalogued and described."

The collection contains the first book printed in Montreal, a tiny volume of 37 pages measuring 5¼ inches by 3¼ inches, valued at between \$500 and \$600. The book outlines the regulations of a lay association associated with the Seminaire de St. Sulpice.

WORTH \$850

Another volume, valued at \$850, was written by Nicholas Denys, an early governor of Acadia, and contains an early map and description of the Maritimes. Two other interesting volumes are personal accounts of the 1837 rebellion written by Louis Joseph Papineau and William Lyon MacKenzie.

Mr. Harlow expects it will take UBC librarians more than a year to catalogue the collection and get it ready for general use. "The chief value of the collection lies in the fact that it is rich in publications relating to Eastern Canada," Mr. Harlow said.

SHREWD BUSINESSMAN

The late Thomas Murray, who was born in Toronto in 1878, became a book collector at an early age. He moved to Montreal at the turn of the century and retired from the garment business at the age of 50 to open a book store.

Described as a shrewd businessman who kept his own counsel he amazed book collectors with his phenomenal memory and minute knowledge of books. He never invited visitors to see his collection and it is doubtful if anyone knew of its extent or content until his death.

Registration Hits New High -- 11% Increase

A record total of 9918 students have registered for the 1958-59 winter session at UBC — an increase of 11 per cent over last year.

UBC Registrar Jack Parnall, who released the figures recently, said the greatest increase in numbers occurred in the faculties of arts and science and education.

Mr. Parnall said student registration might hit 10,000 in January when Ph.D. and partial course students complete their registration.

Enrolment in the faculty of arts and science increased 18 per cent this year from 4179 to 4907. In education enrolment jumped from 1122 to 1442—an increase of 320 students.

The grand total of 9918 students compares to 8904 registered at the same time last year. Second term registration last year totalled 82 and if the same number register this year final registration figures will be exactly 10,000.

A comparison of enrolment figures in other faculties for the two sessions follows:

Faculty	1958-59	1957-58
Agriculture	155	165
Applied Science	1416	1494
Forestry	137	134
Law	246	246
Pharmacy	124	121
Medicine	213	212
Commerce	590	604
Graduate Studies	559	434
Sopron Forestry School	129	193

Campus Readied for Return of Graduates

Thousands of graduates are expected to return to the campus November 14 and 15 to take part in the most extensive Homecoming program ever planned by the Alumni Association and the Alma Mater Society.

A highlight of the Golden Jubilee Homecoming will be the introduction of three lecture-discussion sessions designed to bring graduates up-to-date on developments in Russian education, Pacific trade and current French political affairs.

Three Panels on Current Affairs

Titles of the three Saturday morning lectures are: "USSR-Canadian Education—Parallels and Contrasts"; "Pacific Trade—Potentialities and Problems", and "France—Decadent or Re-vitalized Democracy?"

The education panel will be chaired by the dean of UBC's faculty of education, Neville Scarfe. Panellists will be Prof. J. O. St. Clair-Sobell and Dr. Cyril Bryner, both of whom were in Russia during the summer, and Mr. F. C. Hardwick of the college of education.

The Pacific trade panel will be chaired by Ronald Dore of Asian studies. Speakers will be Prof. Shigeto Tsuru, a Japanese economist visiting UBC and Vancouver businessman H. J. McKenzie.

Dr. Jean Leponce of UBC's department of economics and political science will discuss recent developments in France. All discussion groups will meet in Brock Hall from 10 a.m. to noon.

Mart Kenny Plays at Alumni Ball

Registration for Homecoming will begin Saturday at 9 a.m. in Brock Hall. Information on the day's program will be available and tickets for the noon luncheon and the evening dance will be on sale.

Another feature of the morning program will be the faculty coffee parties in Brock Hall. The Great Trekker award will be presented at half time of the Thunderbird—Central Washington football game which begins at 2 p.m. at the Stadium.

Following the football game graduates will be able to tour the campus on jitneys and see new construction. Class reunions for the years '28, '33, '38, '43 and '48 begin at 6 p.m.

Evening entertainment will center around Brock Hall where graduates will be able to dance to the music of Mart Kenny and his Western Gentlemen.

Homecoming Schedule

FRIDAY, NOVEMBER 14

- 6:00 p.m. —Basketball dinner in War Memorial Gym for Thunderbird players of former years.
- 8:00 p.m. —Old-timers' game—War Memorial Gym. Basketball greats of the past will clash in a short match.
- 8:30 p.m. —Graduates vs. Thunderbirds Basketball game. The annual challenge match between today's 'Birds and past greats.

SATURDAY, NOVEMBER 15

- 9:00 a.m.-6:00 p.m.—Registration in Brock Hall. Full information about the day's program will be available.
 - 9:00 a.m.-9:45 a.m.—Faculty coffee parties—Meet your old professors and new faculty members in the main lounge of Brock Hall.
 - 10:00 a.m.-12 noon—Lecture discussion groups on Russian education, Pacific trade and current French history meet in Brock Hall.
 - 12:00 noon —Homecoming luncheon in Brock Hall. A presentation will be made to Johnny Owen, well-known campus sports personality.
 - 2:00 p.m.-4:00 p.m.—Thunderbirds vs. Central Washington College football game in UBC stadium. Half time presentation of Great Trekker award.
 - 4:30 p.m.-6:00 p.m.—Tours of expanding campus by jitney for weary grads.
 - 6:00 p.m. —Class reunions for years '28, '33, '38, '43 and '48 begin in Brock Hall.
 - 9:00 p.m. —Alumni social and ball in Brock Hall. Dancing to the music of Mart Kenny and other bands.
- NOTE: Grads who tire of talking may want to attend the UBC Players Club fall plays which begin at 8:30 p.m. in the auditorium. Tickets will be available at the registration desk or at the door.

FOUNDATION BOOSTS FUND WITH GRANT OF \$75,000

The University of British Columbia Development Fund has received a \$75,000 boost from the B.C. Foundation for Child Care, Poliomyelitis and Rehabilitation.

Directors of the Child Care and Poliomyelitis Fund which is sponsored by the Kinsmen's Clubs of British Columbia have made the gift to UBC to provide space in the new Medical Sciences center for the department of neurological research.

"It is the feeling of our board that many child care problems stem from neurological origins," says Robert Howard, president of the Foundation, "and we believe the research done by Dr. Gibson's department at the University of British Columbia will contribute to the diminution of child care and rehabilitation needs."

The UBC Development Fund now stands at \$8,455,599 with some new gifts still coming in.

NEW DEMANDS ON ALUMNI

Focus on the Future

The year 1958 has been a notable one for the province and the University. UBC has taken an appropriate and active part in the centennial celebrations and commemorated its own golden jubilee by staging two special congregations which honoured academic and political leaders.

The most significant event in the University year, however, was the outstanding success of the appeal for funds which are even now being utilized to transform the campus. Six buildings are under construction and three more are on the drawing boards of the University's architects.

The funds for this construction have been drawn from an astonishing variety of sources — individuals, corporations and civic, provincial and federal governments. Because of these events attention has

been focused on the future of the University and we are pleased to note that the Alumni Association has stressed this in its plans for Homecoming. The success of the development fund has placed new demands on this organization and it is in the throes of developing a new program to meet the demands of awakened interest.

The 1958 Homecoming program — the most extensive ever planned — symbolizes this new awareness of the problems of the University. Coupled with events of lasting interest the weekend should prove to be memorable and stimulating.

Homecoming 1958 will be a time of looking forward as well as backward — an opportunity to relive significant moments of the past and to see the beginnings of a glorious future.

The Heart of a University

The University is fortunate indeed to have associated with it so active and enterprising a group as the "Friends of the Library."

The group's latest gift to the library — 20,000 volumes of Canadiana acquired from the estate of Montreal bookseller Thomas Murray — is significant for two reasons.

In the first place, UBC will be able to attract scholars and graduate students anxious to pursue research in the field of Canadian history. And secondly, the fact that we possess special collections will encourage others to donate valuable material in allied fields. Accordingly, the new lib-

rary wing includes a special collections room containing this rare material.

At the heart of all great universities stands a library supported by adequate funds which allow it to purchase special collections when they become available. The "Friends" are now in the process of building up a reserve fund which will enable the library to do this.

The future expansion and excellence of the UBC library will be directly proportional to the degree of support given by individuals, corporations and governments to organizations such as the "Friends of the Library."

Development Fund Still Open

A useful reminder that the UBC Development Fund is still open to receive gifts from all sources came recently with the announcement that the B.C. Foundation for Child Care, Poliomyelitis and Rehabilitation had donated \$75,000. (See story page 1.)

The gift means that the University will have an additional \$75,000 available to spend on other projects because the sum will be doubled by the provincial government which has promised to match everything up to \$10,000,000.

This generous offer by the provincial government will not last indefinitely. The time is not too far distant when the Development Fund will have to close its books

and many who have not yet donated will see their gifts go unmatched.

The UBC Development Fund now stands at almost \$8.5 million — \$1.5 million short of the maximum to be matched by the government. It will be seriously detrimental to the University's expansion plans if a gap remains when the books close. It may mean that some urgent need in the building program will go unmet.

In a campaign as exhaustive and extensive as ours it was inevitable that some would not be contacted. The Fund has been open so that these late gifts may be eligible for the matching grants. Those who are concerned with the future of higher education in B.C. should not miss this opportunity.

LETTERS TO THE EDITOR

Readers of "UBC REPORTS" were asked to write to the editor commenting on the decision of the University's committee on art to purchase a piece of sculpture entitled "Madonna of the Cedars" by Victoria artist Alfred Carlsen, one of thirty entries in the summer outdoor sculpture display. The committee had to decide between Mr. Carlsen's work and that of Vancouver sculptor Robert Clothier, whose work was entitled "Birdies." The committee, which decided to purchase Mr. Carlsen's work, refused to give reasons for their choice and readers were asked to state which piece they preferred and why. A selection of letters follows.

Editor, UBC Reports:

My preference . . . is toward "Birdies."

The main characteristic of both sculptures is ugliness. Neither Madonnas nor Cedars are really ugly. Birdies, in the nesting stage, always are. Therefore "Birdies" is the more honest sculpture.

If the title of Mr. Carlsen's work had been "Babe in the Woods" or "Kidnapped" or "1st Murder" I would consider him a legitimate winner.

Margaret Cartwright

Editor, UBC Reports:

. . . my wife and I have thoroughly enjoyed this summer's display of sculpture on the campus. In fact we have taken numbers of out-of-town guests to see it and have spent many a stimulating hour discussing the various exhibits.

We ourselves would have chosen the one of

the two men bracing themselves against the storm as the best.

Of the two . . . we agree that the "Madonna of the Cedars" is best, mainly because it has a human appeal. "Birdies" . . . looks too much like a piece of machinery.

H. G. Trumpler

Editor, UBC Reports:

"Madonna of the Cedars" because it is more typical of the B.C. forests.

M. Klassen

Editor, UBC Reports:

. . . I wish to express my satisfaction and pleasure in the selection of "Madonna of the Cedars" for the prize.

It is a real message to convey—peace of mind, tranquility—whereas "Birdies" expresses—nothing. Unless, perhaps, it is meant to portray people of the world of today as a nest of young birds whose only thought is to grasp for themselves whatever comes into reach. I find the "Madonna of the Cedars," with its spirit of having risen above greed and strife, much more satisfying.

Laura M. Ketcheson

Editor, UBC Reports:

. . . "who is the bird-brain?"—The sculptor or the committee wanting to throw away \$600?

Arthur A. Lind.

SPEECH TO STUDENTS

President Hints at Student Fee Increase

UBC's president has hinted to students that they may be paying higher fees next year.

And he promised that if and when the Board of Governors does consider an increase representatives of the student body will be consulted.

The suggestion of a fee increase was made by President N. A. M. MacKenzie during his address to the student body shortly after the winter session opened.

ADEQUATE FUNDS

The University's goal now should be excellence in everything we do or attempt, the president said, and adequate money can be one of the basic essentials upon which to build for excellence.

Each year the salaries of UBC's teaching and research staff have been increased and it is the policy of the board to ensure that just as soon as possible we will provide and maintain salaries and living conditions as good as those in any other University in Canada, the president continued.

"I mention this," he added, ". . . to bring to the attention of students . . . the fact that one of the main sources of revenue is students' fees."

CONTRIBUTE MORE

The president pointed out that over the past 15 years student fees have been contributing less and less to UBC's total costs of operation. (Editor's Note: In 1957-58 student fees accounted for 17.2% of UBC's revenue compared to 22.5% in 56-57, 33.4% in 50-51, and 47.81% in 47-48.)

Since 1951, when UBC announced its last fee increase, "every other institution that I know of has been asking more and more of its student body," the president continued.

"Because of this I am certain, even while I regret it, that our own student body must be prepared to contribute more to the

revenues of the University than they are presently doing, and this may be done through an increase in fees," he added.

The president opened his address with some remarks concerning the recent changes in Canadian defence policy, which he said would "affect everyone in this audience."

NORTHERN PROJECTION

The arrangement that Canada seems to have adopted is that of becoming a northern projection of the United States defences, he added.

"In this arrangement we buy their weapons, are trained and directed by them, and provide their forces with bases and facilities in appropriate areas across our country."

The president continued: "Because of this it seems to me that in future practically all the research and development involved in weapons will be done in the United States, and if this be true, bright young men and women will flow south across the line where their brains, their abilities and their training can be used.

"It also means that the best and the more adventurous of our labour force will be more likely to find suitable employment at Boeing's in Seattle than at Avro in Toronto."

TURNING POINT

All this may be necessary, the president said, adding, "I am concerned with pointing out that this may mark a turning point in three hundred years of history, in which Canadians, in the face of almost insuperable obstacles and contrary to the natural lines of development, have struggled to be free and to create a Canadian nation of which they can be proud."

Estate Expert Named to Commerce Faculty Staff

PROFESSOR PHILIP H. WHITE, head of the valuation department of the College of Estate Management at the University of London, England, has joined the staff of the Faculty of Commerce and Business Administration at the University of British Columbia.

In announcing the appointment, Dean E. D. MacPhee said Prof. White would be engaged in teaching and research in estate management including land economics and development, financing, taxation, appraisal and investment.

He will also organize and direct a pre-licensing course for the Real Estate Council of B.C. and conduct evening and correspondence training courses in real estate appraisal.

DR. MIKLOS D. F. UDVARDY, assistant professor in the department of zoology on leave of absence to teach at the University of Hawaii, reports from the Islands on the enthusiastic reception accorded new faculty members there.

His main courses there are zoogeography and evolution with classes arranged to permit four days a week free for bird research. Dr. Udvardy is studying the fauna in the rain forest of the mountains and has spent some time at a tropical sea-bird colony.

DR. CYRIL BELSHAW, associate professor of anthropology, with his wife and two children, will be experiencing life in small Fijian villages for the next several months.

Economic development and social changes in the islands are under observation by Dr. Belshaw now in residence in a remote location.

His studies during the year's leave of absence are supported by UBC and the Bishop Museum of Honolulu as well as other institutions.

DR. KASPAR D. NAEGELE, assistant professor of sociology, is in Palo Alto, Calif., on a fellowship at the Centre for Advanced Study in the Behavioral Sciences at Stanford University.

He will devote the greater part of the academic year to a set of essays dealing with social roles as studied by himself and his students during the past four years. Dr. Naegele is the first scholar in Canada to receive a fellowship to the California centre.

TWO MAJOR building projects now on the drawing boards of Thompson, Berwick and Pratt, the University architects, are the new wing to the UBC library (right) and the central dining and recreational block to serve the men's residences. Two units of the men's residences are now

under construction on Marine Drive and the contract for a third will be let shortly. New wing to the library will contain an undergraduate reading room and a special section to house valuable collections presented to the University.

SIX UNDER CONSTRUCTION

UBC Architects Ready Three More Buildings

More than \$3,000,000 worth of buildings under construction will be on view to graduates returning to the campus for Homecoming celebrations November 14-15.

Three additional projects, now on the drawing boards of Thompson, Berwick and Pratt, University architects, are the library wing, the medical sciences building and the central dining and recreational lounge for the men's residences. Total cost of these

projects will be more than \$4,000,000.

Plans for the new library wing on the south side of the present building were revealed at the fall meeting of the Friends of the Library by librarian Neal Harlow.

The new building will house an undergraduate reading room containing 40,000 volumes as well as a science library and areas for special collections such as that recently purchased from the

estate of Thomas Murray. (See story page 1.)

A total of \$1,500,000 is available for the library project made up of a donation to the UBC Development Fund by Mr. Walter Koerner of \$375,000, which will be matched by the provincial government, and a grant of \$750,000 from the Canada Council.

MEDICAL BUILDING

The Medical Sciences Building, which will cost approximately \$2,000,000 will provide teaching and research facilities for UBC's faculty of medicine.

The \$1,000,000 dining and recreational block will service the men's residence development located on Marine Drive adjacent to the campus. Two units of the residences are currently under construction. Each will house 100 students.

Other buildings under construction are the faculty club and senior social center at the north end of the centre mall, additions to the biological sciences and chemistry buildings and International house, which will be open to students on November 17. The official opening will not take place until next year.

SOD TURNED

Construction of UBC's fifth theological college, Carey Hall, is in the offing. Prime Minister John Diefenbaker turned the first sod for the Baptist college while on the campus to receive an honorary degree in September.

Earlier the same month Canada's apostolic delegate, Archbishop Giovanni Panico, visited the campus to officially open St. Mark's College, the new Roman Catholic residence.

In October the federal government announced that a \$1,354,023 contract had been awarded to a Vancouver firm for the construction of a new science service laboratory on Marine Drive.

Special Training School For Education College

The first department of education for teachers of handicapped children in Canada will be established at the University of British Columbia Dean Neville Scarfe, head of the college of education, has announced.

Heading the school will be Professor J. A. Richardson, deputy director of the remedial education centre at the University of Queensland in Brisbane, Australia.

GRANT MADE

The appointment of Professor Richardson is the result of a grant of \$36,000 to the college of education from the British Columbia Foundation for Child Care, Poliomyelitis and Rehabilitation, which raises its funds through the Kinsman-sponsored Mothers' March.

"This organization has been keenly interested in and aware of the need for special education because of their work with the physically handicapped," Dean Scarfe said. "Because of this in-

Basic Russian for Scientists Registers 275

A new course in basic Russian for scientists has an enrolment of 275 persons, according to officials in the department of Slavonic Studies, which offers the course.

Main purpose of the course is to give students a reading knowledge of Russian which will enable them to translate articles in Russian scientific journals.

The course has been split into six sections—five for undergraduates and one for graduate students and faculty. An additional 13 persons have enrolled for an evening course offered by the extension department.

UBC's library is well-stocked with Russian scientific journals, according to librarian Neal Harlow. "We have been purchasing Russian periodicals devoted to the basic sciences and medicine for the past five or six years," he said.

terest the first department of education for handicapped children in Canada will be established at UBC and Professor Richardson will hold the first chair of special education in Canada," he added.

OFFER THREE COURSES

The new department will offer three courses in the teaching of handicapped and retarded children. Dean Scarfe said. Professor Richardson will also co-operate with UBC's faculty of medicine at the rehabilitation center at the Vancouver General Hospital.

UBC's college of education now gives one course in the teaching of handicapped and retarded children. A total of 40 students are registered. A similar course during the UBC summer session had a registration of 50 students.

Professor Richardson, who is expected to arrive in Vancouver during November, was born in England and obtained an honours degree in history from Liverpool university in 1936. He served in the Royal Army Medical Corps during World War II and then attended Birmingham University where he obtained his masters degree in education.

CLINICAL SERVICE

In 1950 he was appointed lecturer in education at Otago University in New Zealand. Two years later he was named deputy director of the remedial education center at the University of Queensland, where he obtained his Ph.D. degree.

For the past six years Dr. Richardson has carried out extensive clinical service for handicapped children and has dealt with physical and mental retardation. He is author of 14 articles on retarded children and is editor of an Australian journal entitled, "The Slow Learning Child."

NEW COMMANDER NAMED FOR CAMPUS UNTD DETACHMENT

Surgeon commander Maurice D. Young, of the department of paediatrics, has been appointed commanding officer of the University Naval Training division at UBC.

He succeeds Commander E. S. W. Belyea, commander of the UNTD since July, 1955. Commander Belyea is an associate professor in the department of psychology at UBC.

In accordance with the new policy of replacing resident staff officers for each service detachment with a single officer, Major John M. Reynolds has been appointed armed forces resident staff officer at UBC.

New Appointment Made By Extension Director

One new appointment and two replacements to the staff of the University's extension department were announced recently by the director, Dr. John Friesen.

B. E. "Bert" Curtis has been named supervisor of short courses and conferences. This service is a recent addition to the department's program.

Entering UBC upon completion of service in the R.C.A.F., Mr. Curtis received his B.A. in 1947 and his B.Ed. in 1957.

He was principal of Houston Superior school, 1950-51; principal of the Department of National Defence School at Belmont Park, 1951-56; and boys' counselor at Sutherland junior high school in North Vancouver, 1956-58.

EXPAND SERVICES

John Graydon Roberts has been appointed supervisor of audio-visual services. He replaces Nor-

man Barton, supervisor of audio-visual services at UBC for 20 years, who has joined the staff of the physics department.

Born in Prince Albert, Sask., Mr. Roberts was educated in British Columbia and is a graduate of UBC. He has recently been employed by the National Film Board.

Audio-visual services at the university will be considerably expanded during the next two years. Plans are to experiment more heavily in film usage and in developing work centred around the feature film, as well as the documentary and educational film.

SPEAKER'S BUREAU

Mrs. Pat Fredeman, a graduate of the University of Oklahoma, has been appointed lectures secretary to provide speakers, drawn largely from the faculty, for various groups in Vancouver and throughout the province on request.

Groups interested in obtaining the services of a speaker are invited to contact Mrs. Fredeman giving her details of their requirements.

Mrs. Fredeman attended UBC in 1956-58 doing post graduate work towards her masters degree. She was also on the staff of the English department.

Choral Class

An 18-week course in choral singing will be conducted by Nicholas Goldschmidt, artistic and managing director of the Vancouver International Festival, for the University Extension department.

The first meeting will take place on Thursday, November 20, at 8 p.m. in UBC Hut G-14. Remainder of the course will be held on Tuesdays. Registration may be made by telephoning or writing the University Extension department, Alma 4600.

SPECIMEN NETTED IN B.C. WATERS

Winnipeg Goldeye Roving

The famed Winnipeg Goldeye—long thought to be confined to rivers on the Canadian prairie—is invading British Columbia, according to a University of B.C. zoologist.

A 15-inch preserved specimen of the fish, netted in the Fort Nelson River in the extreme north-east corner of B.C., has been sent to Dr. Casimir C. Lindsey, curator of fishes.

This is the first time that a

specimen of the Goldeye caught in B.C. had been brought to his attention, said Dr. Lindsey, although there have been persistent rumours in the past that the Indians in that area were catching a fish answering the Goldeye's description.

The fish was forwarded to Dr. Lindsey by Barry Paul, a provincial game warden in Fort Nelson.

The Fort Nelson River is a tributary of the Liard River which

in turn runs into the MacKenzie. "The Goldeye is common in Alberta," says Dr. Lindsey, "but it appears to have surmounted the barrier of the Rocky Mountains and is establishing itself in B.C."

To reach the Fort Nelson area the Goldeye would have had to make a journey of something like 400 miles, Dr. Lindsey said. The fish is about the size of a large herring with silver scales and a blunt mouth. A normal Goldeye is about 10 to 12 inches in length.

STILL SUBJECT TO DISCUSSION

Senate Report Outlines 'New Deal' for Sports

A report calling for extensive changes in the athletic setup at the University of B.C. has been approved in principle by UBC's two governing bodies—the Senate and the Board of Governors.

FURTHER DISCUSSION

Dean A. W. Mathews, chairman of the Senate committee on recreation, athletics and physical education which prepared the report, said that full implementation of the report was subject to further discussions.

"However, when the report is worked out in detail," he added, "it will mean a new deal for ath-

letics at UBC."

The report has recommended that the Board of Governors accept the financial responsibility for the operation of the athletic director's office, and the repairs and maintenance of physical plant as well as the payment of salaries and honoraria for coaching and training.

FREE MAC FUNDS

The effect of this recommendation will be to free funds now required for some of these purposes in the budget of the men's athletic committee which finances the athletic program out of a

grant from the Alma Mater Society and from revenue from games.

The board has also been asked to make a subsidiary grant during the initial years of UBC's entry into Western Canadian Intercollegiate competition to insure that there will be no necessity to cut back in the extensive minor sports program that MAC now conducts on the campus.

SHARE DEFICITS

Other recommendations call for the board to work out a deficit-sharing arrangement with the Alma Mater Society to safeguard minor sports and to accept final responsibility for the provision of future sports facilities.

The report also endorses the ruling of the Senate with regard to athletic scholarships based merely on participation in University athletics and recommends the continuation of this policy.

Neither the alumni nor the student committees which presented briefs to the committee made an issue of financial aid to athletes, the report states. "It appears to be well accepted in both quarters that scholarships based merely on participation in University athletics are not in the best interests of the University," the report says.

The report also recommends that the two-year compulsory physical education program be continued and an investigation be made of the possibility of adding a course in health education to the program.

BALANCED SPORT PICTURE

The University Senate has also approved the principle that extra-mural sports be regarded as an essential part of a comprehensive University experience. Care should also be taken, the report recommends, to prevent an imbalance between spectator and non-spectator sports.

Other recommendations are that the men's athletic committee continue to be charged with the responsibility of administering the extra-mural sports program and with making recommendations for changes in eligibility rules.

Also recommended is the continued development of intra-mural sports and the desirability of expanding the coaching offered to teams by members of the school of physical education.

Heads Delegation

President N. A. M. MacKenzie heads the Canadian delegation to the current meetings of the United Nations Educational Scientific and Cultural Organization at the Organization's new headquarters in Paris. There are 12 people in Canada's delegation.

B. C. BINNING

B. C. Binning Heads Fine Arts

Mr. B. C. Binning has been named head and associate professor of UBC's newly established department of fine arts in the Faculty of Arts and Science.

Mr. Ian McNairn, curator of the Fine Arts Gallery, will act as departmental executive secretary and teach the modern art course.

"The establishment of the department is recognition of the growing importance of fine arts as part of the university curriculum," Mr. McNairn said. "We have grouped together and coordinated a number of courses previously offered by various departments of the university, and offer one new course in the history of modern art."

Three Honoured at Colourful Fall Ceremonies

Tolerance, patience and a spirit of internationalism will subdue the excesses of nationalism says the commander of the United Nations emergency force in the middle east.

General E. L. M. Burns, who spoke to graduates at UBC's fall congregation October 24, added that historical processes are very slow and to establish the necessary reasonableness and tolerance may take a long time.

General Burns was one of three persons receiving honorary degrees at the congregation. Others were: Mrs. Rex Eaton, president of the National Council of Women, and Dr. John H. Williams, a UBC graduate and now director of the research division of the Atomic Energy Commission in the United States.

General Burns and Mrs. Eaton were awarded LLD's and Dr. Williams received a Doctor of Science degree. A total of 440 students were admitted by the chancellor during the colorful and traditional ceremonies which centred around United Nations Day on the campus.

1870 Donate Blood

A total of 1870 staff and students donated 1523 pints of blood to the Red Cross which held a clinic on the campus from October 6 to 11.

New List of Missing Graduates

Alumni Association officials are continuing their campaign to locate graduates by supplying a list of names for each edition of UBC Reports.

If you know the address of any of the graduates listed below write their name and address on the coupon at the bottom of this page and return it to the Information Office.

James C. Gilbert BCom '50; John A. Gilbert BCom '46; Joan Marie Gilbert BA '53; James L. Gillen BA '38.

Glenna H. Gillis BA '44; John R. Gilmore BA '48; Mary Helen Glasgow BA '29; Edward Gleave BA '31; John E. Glen BA '41.

Mary E. Glen BA '41; Percy C. Glover BCom '44; William Gluska BCom '47; David Paul Godefroy LLB '53.

Ellen Louise Godfrey BA '36; James E. Godmark BA '18; Thomas L. Goff BSW '52; Florence R. Goldman BA '42; Francis H. Gollightly BA '36; Luis P. Gonzales BA '53.

Margaret E. Goodchild BA '24; James E. Goodman BAsc '44; John R. Goodwin BA '51; John P. Gordon BSW '48; Wm. A. Gough BA '48.

Wm. P. Gough BSA '26; Boris I. Goumeniouk BSA '34; James K. Gove BSA '50; Eileen F. Graham BA '42.

Etta Louise Graham BA '25; John A. Graham BA '49; Mrs. Wm. Grand (Ann H. Jeremy) BA '40; John M. Granger BAsc '42; Thomas Scott Granger BAsc '41; Dorothy Marilyn Grant BA '51; Marie F. Graves BA '41.

Anne W. Gray BA '42; Elizabeth P. Gray BA '48; Gordon K. Gray BA '46; Laurence F. Gray BAsc '38; Roland C. V. Gray BA '30; Arthur R. Green BCom '47; Clare A. Green BA '35.

Robert B. Green BA '52; Barbara H. Greene BA '45; Daniel M. Greeno BAsc '41; Mrs. Ernest A. Greenwood (Florence A. Irvine) BA '20; Ernest L. Greenwood BAsc '50.

Institute Offers Varied Program

Dean F. H. Soward, professor and head of the history department and director of international studies at UBC, will present his annual international review at the fifth lecture of the Vancouver Institute's Fall series on November 15 in Room 106 of the Buchanan building.

This event is being co-sponsored by the UN Association of Canada and the Canadian Institute of International Affairs.

"Russia Today" is the title of the November 22 lecture when the speakers will be members of the department of Slavonic studies. They include Professor J. O. St. Clair-Sobell, chairman; Professor Cyril Bryner and Professor A. W. Wainman.

College Enrolment Up 30% Over Last Session

A bumper enrolment of 869 students has increased attendance at Victoria College by 30% over the 1957-58 session.

Criticism Service For Manuscripts Available at UBC

A manuscript criticism service for British Columbia writers has been established at the University of British Columbia under the sponsorship of the department of extension, the department of English, and the Frederic Wood Theatre.

Manuscripts will be accepted in the fields of fiction, non-fiction, poetry and drama, including live theatre, radio and television. They will receive a detailed reading and evaluation by and under the direction of members of the University department of English.

Writers wishing to make use of this service should apply to the department of extension for the form which must accompany all submissions.

In addition to the B.C. Writers Service, and at the request of the B.C. Arts Resources Conference, the extension department, in collaboration with the Frederic Wood Theatre, offers to playwrights a special workshop project providing for the critical analysis of playscripts and, in the case of selected recommended scripts, the opportunity of experimental production in the Frederic Wood Theatre.

For further information, write to the department of extension, University of B.C.

Congregation

Reverend Professor C. C. Kim, vice-president of Hankuk Theological Seminary in Korea, received an honorary degree at a special congregation of Union College at West Point Grey United Church on September 30.

The same day at an open house visitors saw the completely renovated interior of the College and the new residence block for married men in training for the ministry.

The enrolment figure represents an increase of 14 percent in arts and science and 50 percent in education, according to Victoria College officials.

Currently under construction is a third storey of the Ewing Building which will be ready for use before the end of the year. Also helping to relieve overcrowding are three army huts, moved to the campus from Gordon Head army camp, and a new cafeteria hut.

The college looks forward to academic and physical expansion as a result of the fact that the University has granted permission to give third and fourth year courses.

Additional faculty as well as new library and science buildings will be necessary to meet the growing demand for expansion into a degree-granting institution.

Dr. James Gibson, a Victoria College alumnus and now dean of the faculty of arts and science at Carleton University, Ottawa, addressed the annual assembly at which \$7,500 in prizes was presented to last year's top students.

Dr. Gibson also spoke to faculty, council and invited guests during his visit.

Indonesians Study Town Development

Seven Indonesian city planners have begun an intensive 12-month course in community planning and development at the University of British Columbia.

Dr. H. Peter Oberlander, associate professor of planning and design, assisted by UBC graduate Robert Williams, will direct the program which has been made possible by a grant from the Colombo Plan administration.

The students are officials of the department of town and country planning of the ministry of public works and power of the Indonesian republic. UBC is the first Canadian university to receive Indonesians in this field of study.
