

UBC Senate to Resume Debate

UBC's Senate meets tonight (Wednesday, Jan. 9) to continue debate on the report of a committee which has made 20 recommendations for changes in the *Universities Act*, the provincial legislation that outlines the basic structure and organization of B.C.'s public universities.

Tonight's meeting will be the second special meeting of Senate in the 1973-74 session to discuss the report of the committee, chaired by the head of the Faculty of Law, Dean A.J. McClean.

At the first special meeting on Nov. 28 Senate debated the first five recommendations contained in the report, dealing with university-government relations. At that meeting Senate approved recommendations calling for the establishment of a Provincial Universities Commission which would have the power to advise the government on all matters pertaining to university education.

A recommendation with regard to the composition of the Universities Commission was referred back to Dean McClean's committee for

redrafting in the light of debate at the Nov. 28 meeting.

Debate will also continue tonight on a minority proposal by Prof. Robert Clark, director of UBC's Office of Academic Planning. Prof. Clark proposes to amend Recommendation 5 of the Senate committee's report to give statutory recognition in a revised *Universities Act* to a "Co-ordinating Council of Universities in British Columbia."

Dean McClean's committee simply recommends that UBC "take immediate steps to attempt to establish in conjunction with the other universities of the province some form of co-operative machinery." The committee does not recommend that provision for such a body should be included in a revised *Universities Act*.

Most of the debate at tonight's Senate meeting is expected to centre on recommendations made by the committee on internal university governance, including the structure and powers of the Board of Governors and Senate.

The recommendations approved by the UBC

Senate will serve as the basis for a brief to be presented to the Committee on University Governance, chaired by Mr. John Bremer, B.C.'s Commissioner of Education.

The Bremer Committee issued a Working Paper on University Governance on Nov. 2. Members of the University community have been invited to submit briefs on matters raised in the working paper for discussion at public meetings.

The public hearings on the UBC campus will be held in the Board and Senate Room of the Main Mall North Administration Building on Jan. 22 and in the Party Room of the Student Union Building on Jan. 23. The Jan. 22 hearings will be moved to the Old Auditorium if there is an overflow audience in the Board and Senate Room. Hearings on both days start at 10 a.m.

Individuals and groups are invited to submit briefs in advance of the public hearings. They should be sent to the office of the Minister of Education, Parliament Buildings, Victoria.

UBC REPORTS

UBC REPORTS CAMPUS EDITION

11 Faculties To Elect Students

UBC's Senate has approved recommendations that will result in the election of 161 students as full voting members of 11 UBC Faculties.

Ground rules for student representation on Faculties, as well as regulations on such questions as who shall conduct elections and who is eligible for election, have been the subject of three long debates in UBC's academic parliament extending over a period of almost a year.

It remains for Senate to approve a formula for student representation on only one Faculty — Graduate Studies. Only a 2½-hour time limit on debate prevented Senate from dealing with the Graduate Studies problem at its regular meeting on Dec. 12. It is expected that the Graduate Studies question will be resolved at Senate's next regular meeting on Jan. 16.

Debate on the question of student representation on Faculties began in January, 1973, when Senate received the first of three reports from an ad hoc committee chaired at that time by the former head of the Faculty of Commerce and Business Administration, Dean Philip White.

The committee submitted four basic principles for Senate's consideration, principles which would provide the framework for more detailed regulations dealing with the number of students to be elected and the method of election.

At the conclusion of the January, 1973, debate Senate had agreed to provide for student representation, with full voting privileges, at Faculty meetings, meetings of Faculty committees, and meetings of committees of Divisions, Departments, Schools and teaching Institutes.

Another principle approved was that, although

MEMBERS OF the UBC Thunderbird ice hockey team display pennants and trophies collected during a 30-day trip to the People's Republic of China and Japan in December. Team played a total of ten games, losing only one to a Japanese college team at the end of the tour. In the front row, left to right, are: Bob Gaston, Arts II; Keiji Osaki, Arts III; Scott Munro, Science III; graduate student Yoshi Hoshino; and Dr. Bob Hindmarch, hockey coach and associate

professor of physical education. Standing, left to right, are: Bob Lefebvre, Applied Science II; Bob Sperling, Science II; Chuck Carignan, Physical Education III; Bill Gaston, Arts III; Richard Longpre, Arts III; Dr. Harold Nordan, chairman of the Men's Athletic Committee and associate professor of zoology; Bill Ennos, Physical Education III; and Geoffrey Thomas, Medicine III. Picture by Jim Banham.

Enrolment Hits 20,100

Total daytime enrolment for UBC's 1973-74 Winter Session is 20,100 students, an increase of 934, or 4.87 per cent, over the 1972-73 Winter Session enrolment of 19,166 students.

The daytime enrolment increase for the current year is a reversal of the trend of the past two Winter Sessions, which saw enrolment decline from a record 20,940 daytime students to last year's 19,166.

In addition to the 1973-74 daytime enrolment, 1,258 part-time students are registered for evening credit courses and an additional 600 students are taking UBC courses by correspondence. Also registered as UBC students, but not included in the official total of daytime students, are 298 interns and residents, medical-school graduates who are completing their training under UBC auspices in B.C. hospitals.

During the current fiscal year UBC also enrolled 3,564 students for its seven-week Summer Session and 997 students in the May-July Intersession.

Adding all these categories of students together means that UBC has a gross student enrolment of 26,817 during the current fiscal year from April 1, 1973, to March 31, 1974.

The bulk of the increase in UBC's daytime

enrolment in the current Winter Session is accounted for by increases in degree programs offered by the Faculty of Education.

Total enrolment in Education has increased by 501 students, from 2,964 in 1972-73 to 3,465 in the current Winter Session. Enrolment in the elementary division is up by 173 students and in the secondary division by 167.

Also within the Faculty of Education, the School of Physical Education and Recreation has recorded an increase of 85 students in its two degree programs. The balance of the Education increase is accounted for through diploma and certification programs.

Enrolment for degree programs offered in the Faculty of Arts, UBC's biggest, shows a slight decline of 21 students to 5,172 from last year's 5,193. Enrolment is up by 155 students, however, in the first year of the Bachelor of Arts degree program.

Within the Faculty of Arts the Schools of Home Economics, Librarianship and Social Work have all shown enrolment increases.

Total registration in the Faculty of Applied Science is up by 73 students from 1,325 in 1972-73

PARK-LIKE SETTING PLANNED

An extensive area on the northwest fringe of the UBC campus will be developed into a park-like setting and will be opened to the general public, UBC President Walter H. Gage has announced.

This area, containing approximately 25 acres, is bounded by the present Northwest Marine Drive, old Northwest Marine Drive (now a cul-de-sac leading to the UBC Alumni Association's headquarters in Cecil Green Park), and the edge of the Point Grey cliffs.

This area will be developed in consultation with the Vancouver Board of Parks and Public Recreation, which controls the cliff face and the beach below, President Gage said. An agreement on the future of this area was worked out at a Dec. 6 meeting between representatives of the UBC Board of Governors and administration and representatives of the Parks Board. (A plan view of the area is shown in the box at right.)

The area includes the site of UBC's Museum of Anthropology, which is now under construction adjacent to three former student residences which will be renovated and linked together by a new structure to house UBC's Department of Anthropology and Sociology.

It also includes the area in the vicinity of the Home Management House of UBC's School of Home Economics and the former residence of the University's presidents.

NATURAL SETTING

The presidential residence is currently being used by the Division of Adult Education of the Faculty of Education. It is surrounded by extensive lawns and gardens and commands a spectacular view of the Strait of Georgia and the entrance to Howe Sound.

The area adjacent to the Museum of Anthropology and the Anthropology and Sociology Complex will be developed "with a view to maximizing the public use of these outdoor areas in as natural a setting as possible," President Gage said.

In the area southwest of the Museum, the University will "strive for the utmost public use consistent with a 'wilderness' condition as part of a shoreline natural preserve."

A joint UBC-Parks Board committee has been struck and will concern itself, among other things, with the ongoing planning of the entire area.

President Gage said he welcomed the Parks Board's decision, reached as a result of the Dec. 6 meeting, to proceed as quickly as possible with a \$350,000 project to control sea erosion at the base of the cliffs along Tower Beach. Continuing erosion there has endangered Cecil Green Park (the old "Yorkean" mansion).

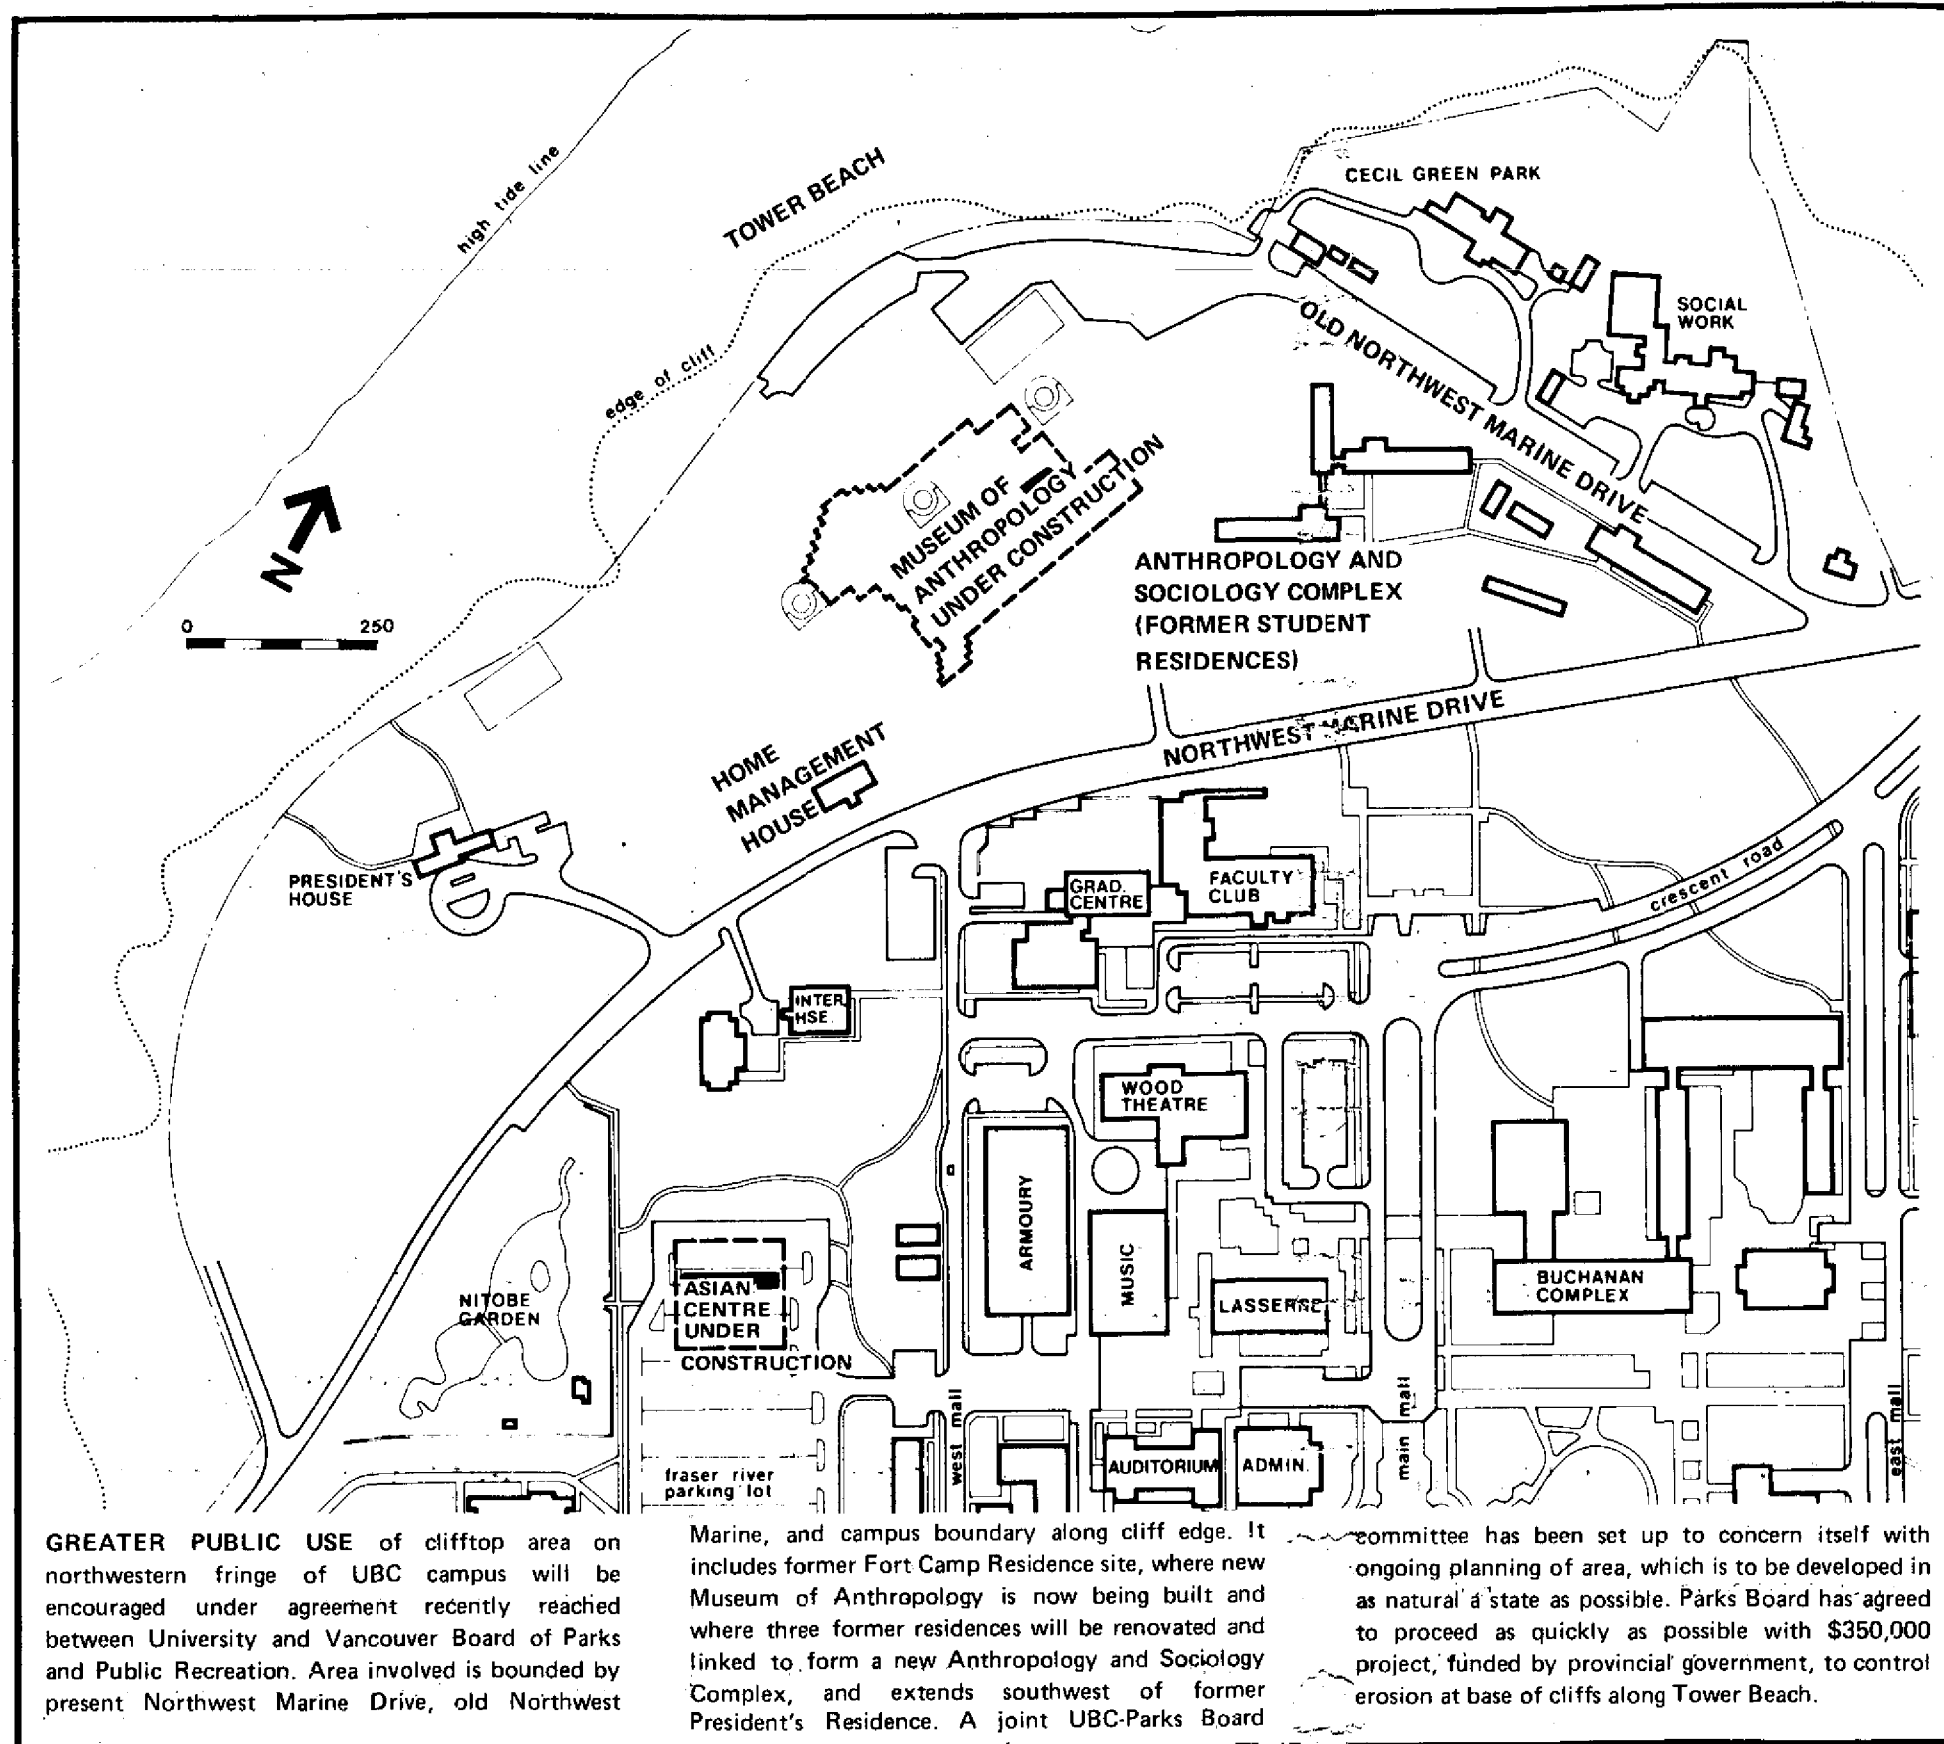

The erosion-control project is being funded by the provincial government, at the request of the Parks Board. However, the Parks Board had deferred awarding a contract for the job because of concern about the government's stipulation that maintenance of the project must be a responsibility of the Parks Board and/or the University.

At the Dec. 6 meeting UBC agreed to share maintenance costs with the Parks Board. No estimate of these costs is yet available, and the proportion to be shared by each party has not been decided.

President Gage said the University will now proceed with construction of the Museum of Anthropology and, later, with the Anthropology and Sociology Complex. The Parks Board has accepted this decision, he said.

President Gage said some fears had been expressed that construction of the Museum might increase the likelihood of erosion or slumping of the cliffs.

He said the best advice available to the University is that there is no danger of this.

GREATER PUBLIC USE of clifftop area on northwestern fringe of UBC campus will be encouraged under agreement recently reached between University and Vancouver Board of Parks and Public Recreation. Area involved is bounded by present Northwest Marine Drive, old Northwest

The \$4-million Museum, designed by internationally famed architect Arthur Erickson, is set back approximately 230 feet from the edge of the cliff.

A number of studies conducted for the University over several years, by engineers, geologists and earthquake experts, indicate that it would be safe to construct large buildings within 150 feet of the cliff edge, provided suitable measures are taken to control surface drainage and sea erosion. These reports indicate that the subsol conditions above the cliffs are suitable to permit building foundations carrying a weight of five tons per square foot. One report indicated structures 12 to 15 stories high could be built without danger. This same report said that excavation, such as has been carried out for the Museum project, "would increase the general stability of the area, so long as it does not involve increased flow of water down the cliffs."

REDUCE EROSION

The Greater Vancouver Sewerage and Drainage District is currently carrying out a survey atop the cliffs preparatory to construction by UBC of a new storm-sewer system which will lead runoff away from the cliffs and thus reduce erosion. Installation of the system will cost an estimated \$100,000.

Work will start early in February in the vicinity of Cecil Green Park on the drilling of an eight-inch well to collect seepage and a series of surrounding holes to measure the rise and fall of the water table in the area.

The eight-inch well, which will be more than 200 feet deep and will extend down to sea level, will be equipped with a pump to divert water away from the cliff face. Removal of water from the eight-inch well will be reflected in the water level of the smaller, surrounding holes.

Marine, and campus boundary along cliff edge. It includes former Fort Camp Residence site, where new Museum of Anthropology is now being built and where three former residences will be renovated and linked to form a new Anthropology and Sociology Complex, and extends southwest of former President's Residence. A joint UBC-Parks Board

Collection of ground water in the eight-inch well and its diversion away from the cliff face will also have the effect of preventing water seepage from the face of the Point Grey cliffs. This will lead to a drying-out and an improvement in the stability of ground in the area.

PLANTING PROGRAM

In addition, the University will co-operate with the Parks Board in a program of planting trees and shrubs along the edge of the cliffs to reduce erosion caused by beach-users scrambling up and down the cliffs.

These projects are in addition to improvements to drainage which were included in the first \$28,000 contract for preparation of the Museum site.

The aim of opening the northwestern fringe of the campus is not a new one for the University. In December, 1970, President Gage called for a development plan for the area which would leave as much as possible of it "for park area, open to the public, especially those areas giving a view."

Over the last several years the University has been developing a number of public-use facilities which have become or are likely to be major attractions for Greater Vancouver residents and their visitors.

These include the UBC Botanical Garden, now under development; Totem Pole Park, with its Haida and Kwakiutl poles and buildings; the Nitobe Memorial Garden; the Asian Centre, now under construction adjacent to the Nitobe Garden; and the Museum of Anthropology.

All of these facilities are located on the northern and western fringes of the campus, with easy access from the city.

committee has been set up to concern itself with ongoing planning of area, which is to be developed in as natural a state as possible. Parks Board has agreed to proceed as quickly as possible with \$350,000 project, funded by provincial government, to control erosion at base of cliffs along Tower Beach.

The Museum of Anthropology, designed to provide a fitting setting for UBC's fine collections of West Coast Indian art and artifacts of other cultures, may prove to be the greatest of these attractions.

It is being built with the help of a \$2.5-million federal grant, part of the federal government's \$10-million gift to mark British Columbia's centenary in 1971.

Under UBC's agreement with Ottawa, the Museum is to be open to the public and is to be completed by April 1, 1975.

The Museum project was announced on July 1, 1971, by Prime Minister Trudeau. The first contract, for preparation of the Museum site, was let by UBC's Board of Governors on March 6, 1973. The contract for construction of the Museum itself was let on Nov. 6, 1973.

Work on the construction project has been under way for several weeks. Excavation has been completed and footings and some walls for the low, sprawling building have already been poured.

ELIMINATE FEARS

Because of recent inflation in building costs, some proposed features have had to be eliminated from the \$3-million construction contract. These included a shallow pond which was to have been constructed between the Museum and the clifftops, to provide a natural setting to which UBC's collection of Haida and Kwakiutl totem poles and buildings were to have been transferred.

President Gage said inclusion of the pond may have given rise to some of the concerns that have been expressed about the possibility that the Museum project would further endanger the Point Grey cliffs. These fears should now be eliminated, he said.

Guidelines Proposed

A series of guidelines have been proposed by a president's committee as the basis for recommendations on the development of transportation and circulation facilities in the northwest quadrant of the campus.

The committee was established by President Walter H. Gage to study two consultants' reports on campus traffic and transportation problems, and to recommend means of integrating the former Fort Camp Residence area with the main campus.

Committee chairman Neville Smith, director of UBC's Department of Physical Plant, said the committee has completed the first phase of its work with the formulation of guidelines which it believes should be followed in development of the northwest quadrant.

The committee's members represent a number of other committees and departments which have specific interests in that area of the campus, and the guidelines have been circulated to these organizations for comment.

Mr. Smith said his committee would also welcome comments from other members of the campus community and that these comments would be considered before the committee proceeds to the next phase of its task.

The proposed guidelines are:

1. The use of public transit to the University should be encouraged. An intra-campus transit system should be established and integrated with the public transit system. Parking facilities for automobiles in the northwest campus should be supplementary and subordinate to the intra-campus transit system.

Expert Speaks Here Twice

Prof. Donald Keene, of Columbia University, regarded as the Western world's foremost authority on Japanese literature, will visit the UBC campus during the week of Jan. 14-18 as a Cecil H. and Ida Green Visiting Professor.

MEMORIAL SERVICE

A memorial service will be held tomorrow (Thursday, Jan. 10) for the late Prof. Lionel Stevenson, a UBC graduate and one of the world's leading authorities on Victorian literature.

Prof. Stevenson, who died suddenly at his home in the University Endowment Lands on Dec. 21 at the age of 71, was serving as a visiting professor in UBC's Department of English. The memorial service will be held at 2:30 p.m. at St. Helen's Anglican Church, 8th Ave. and Trimble St.

ENROLMENT

Continued from Page One

to a current total of 1,398. However, enrolment in programs leading to bachelor's degrees in various branches of engineering declined by 72 students, although enrolment in the first-year program increased from 224 to 246.

Degree programs within the Applied Science Faculty which showed increases were those offered by the Schools of Architecture and Nursing. The School of Nursing this year introduced a radically-revised bachelor's degree program which has attracted 152 students.

There has also been a significant increase, from 140 in 1972-73 to 332 in the current year, in the number of students registered as unclassified. These are students who already have a degree and have decided to return to university — many of them on a part-time basis — to take courses in areas that interest them.

What follow are daytime Winter Session enrolment figures for all UBC Faculties as of Dec. 1, the date on which Canadian universities officially declare their enrolments. Figures in brackets are enrolments as of Dec. 1, 1972.

Agricultural Sciences — 285 (251); Applied Science — 1,398 (1,325); Arts — 5,172 (5,193); Commerce and Business Administration — 1,251 (1,066); Dentistry — 196 (191); Education — 3,485 (2,964); Forestry — 334 (290); Graduate Studies — 2,623 (2,646); Law — 639 (607); Medicine — 404 (460); Pharmaceutical Sciences — 340 (321); Science — 3,499 (3,549); Qualifying year — 162 (163); Unclassified — 332 (140).

Total daytime enrolment — 20,100 (19,166).

2. Entrances to the campus should create a sense of arrival at the University and should provide information regarding location of major facilities and directions on the campus. Limited parking and public conveniences for visitors should be provided at these entrances.

3. Provision should be made for the specific requirements of all significant forms of traffic, including pedestrian, bicycle and automobile traffic.

4. All significant traffic patterns should be accommodated, including those associated with evening classes and other extension activities.

5. University buildings and grounds must be safely and reasonably accessible to all individuals, including the handicapped, such as wheelchair users and the blind.

6. The concept of the pedestrian core should be extended to include the Fort Camp site. Service vehicle traffic within the core should be minimized by considering centralization of receiving facilities where economically feasible.

7. Annual cost of ownership as well as initial cost should be used as criteria for design of circulation facilities.

8. There should be no increase in the present nine acres of grounds allocated to parking in the northwest campus.

9. Development of grounds for circulation systems should allow for possible installation of outdoor furniture, art objects and appropriate landscape development.

10. The divisive effect of Northwest Marine Drive should be minimized.

He will deliver two public lectures. The first, on Tuesday, Jan. 15, at 12:30 p.m. in Buchanan 102 is entitled "The New Beginnings of the New Japanese Literature." On Thursday, Jan. 17, he will speak at 8 p.m. in Buchanan 104 on "The Origins and Development of Renga: Japanese Linked Verse, the Ancestor of the Haiku."

STUDENTS SOUGHT

A committee of the Faculty of Graduate Studies, formed to review policies, programs and procedures in that Faculty, is seeking the names of graduate students interested in serving on the committee. A total of five graduate students are to be added to the committee — one from Arts, one from Science, and three from the Faculties of Agricultural Sciences, Applied Science, Commerce, Education, Forestry, Law, Medicine and Pharmaceutical Sciences.

Graduate students interested in serving on the committee should apply to the Graduate Students' Association in the Graduate Student Centre before Jan. 21. Applications should state the department in which the student is enrolled and give a mailing address and telephone number.

NEW LOCATION

The Vancouver Institute starts off the new year with a new location on the UBC campus for its Saturday night lectures — Lecture Hall No. 2 in the Instructional Resources Centre.

First speaker in the spring program of lectures is Dean John H.M. Andrews, who became head of UBC's Faculty of Education in July, 1973. He will speak on the topic "Phase Two: New Directions for the Faculty of Education" on Jan. 12.

Institute lectures have previously been held in Room 106 of the Buchanan Building where there were frequent overflow audiences because seating capacity was limited to 270 persons. IRC Lecture Hall No. 2 seats 498 persons.

UBC Vol. 20, No. 1 — Jan. 9, 1974.
 Published by the University of British Columbia and distributed free. UBC Reports appears on Wednesdays during the University's winter session. J.A. Banham, Editor. Louise Hoskin and Jean Rands, Production Supervisors. Letters to the Editor should be sent to Information Services, Main Mall North Administration Building, UBC, Vancouver 8, B.C.

Nutrition Conflict to be Studied

Confused over conflicting information on what you should or shouldn't eat? Can't make up your mind about the effects of herbicides and pesticides, or whether herbs, vitamins or megavitamins are beneficial? What is the exact relationship between diet, exercise and drugs?

A week-long conference on nutrition at the University of B.C. from Jan. 21 to 26 may help you clear up some of the confusion.

At least 40 speakers from a variety of backgrounds will take part in the conference, sponsored by UBC's Alma Mater Society.

The conference will be aimed at the general public, and although the speakers are experts in their field their presentations will be brief and informal.

Among those taking part will be soil and food scientists, nutritionists, psychologists and others from UBC, as well as an organic farmer, a chiropractor, a yoga teacher, and the assistant deputy minister of the federal Department of Health and Welfare.

Conference co-ordinator Leslie Rose says the purpose of the conference is to provide basic information to the public on nutrition.

"There are a number of different beliefs about nutrition held by different people in society. We think people should have an opportunity to compare their beliefs with what experts say," Mr. Rose said.

"There is also a lot of disagreement among

experts concerning nutrition because so much more research needs to be done on the subject. The conference will allow people to make up their own minds, to make an intelligent choice for themselves until the research is done."

The conference will run from 12:30 p.m. into the evening from Monday to Friday, Jan. 21 to 25, and from 10 a.m. to about 5 p.m. on Saturday, Jan. 26

All events will take place in UBC's Student Union Building, with the exception of the Jan. 22 and Jan. 25 evening sessions, which will take place in the Ponderosa Cafeteria on the West Mall of the campus.

For more information, please phone 228-4924.

FACULTIES

Continued from Page One

student opinion would be sought, student representation would not be permitted at meetings of Faculty or Faculty committees when the following matters were dealt with: budget, salaries and other financial business; scholarships and other student awards; adjudication of marks and academic standing; and appointments, promotion and tenure.

Finally, Senate approved the principle that at Faculty meetings and committee meetings where students have representation, membership should be so constituted that members of the teaching staff having Faculty rank (i.e., professors, associate professors and assistant professors) would be in an appropriate majority.

With these principles approved, the ad hoc committee continued its deliberations and in April, 1973, returned to Senate with recommendations that put flesh on the bones of the principles as they applied to student representation at Faculty meetings and committees of the Faculty.

One of the recommendations approved in April provided that the total number of student representatives eligible to attend a Faculty meeting should not be less than 5 per cent and not more than 25 per cent of the number of members of the teaching staff, the proportions of undergraduate and graduate students to be determined by Faculty regulation.

It was also agreed that Faculties, in proposing a scheme of student representation, should seek to provide representation by Department and as far as possible, for the Faculty as a whole, representation by students in all years.

Senate was also empowered to determine the eligibility requirements and the procedure for electing students and agreed that undergraduate societies should conduct the elections.

Finally, Faculties were asked to submit to Senate the resolutions to give effect to these policies in the fall of 1973.

With the exception of the Faculties of Arts and Graduate Studies, the Senate regulations for student representation on Faculties have been agreed to without dissent by undergraduate societies.

Dean Douglas Kenny, the head of the Arts Faculty, made the case for his Faculty's departing from the Senate guidelines at the November and December meetings of Senate.

The Arts Faculty recommended that "The combined major, honors and graduate students on the campus in each of the Departments and Schools of the Faculty (of Arts) should elect one of their number to participate in meetings of the Faculty."

This would result in the election of 23 students to Faculty membership, or 5 per cent of the 464 members of the teaching faculty in Arts. The term teaching faculty includes only those members of the Arts Faculty who are actively teaching and excludes those on leave of absence. A secondary effect of the motion was to prevent representation by students in the first and second years of Arts.

Dean Kenny argued that major, honors and graduate students made up the "constituency of the Faculty of Arts and there is no other constituency that I'm aware of."

Student representatives on Senate argued, on the other hand, that the Faculty of Arts recommendation was against the spirit of the principles approved

earlier by Senate, in that it did not provide for representation from students in all years.

The matter was resolved, despite the protests of some student Senators, at the December meeting of Senate with the passage of the original Arts Faculty recommendation, together with an amendment providing for the election of an additional four Arts students — two each from the first and second years. As a result of the Faculty motion and the amendment, a total of 27 Arts students will have Faculty membership.

Another departure from the approved Senate guidelines in the case of the Arts Faculty provides for election of students to be conducted by the Registrar's Office and the use of a mail ballot.

The Registrar's Office was being asked to conduct the election, Dean Kenny said, because it had a proven record of carrying out such tasks and because it was the only office which knows the status of students, and whether they are registered and eligible to vote. A mail ballot was designed to ensure a larger and more representative vote.

Student Senators again protested that the recommendation departed from the approved guidelines, which provided for the conduct of the elections by undergraduate societies.

The Arts Faculty recommendation was approved by Senate, but it seems likely that the matter will be raised again by students when they become members of the Faculty, a course of action suggested at the December Senate meeting.

The Faculty of Graduate Studies is also seeking to depart from the Senate guidelines. In its submission to Senate, the Faculty says it differs from other Faculties in its University-wide scope, in its use of an executive committee of nine elected members to represent a broad spectrum of departments and disciplines, and in conducting its business effectively with a relatively small attendance at meetings.

Because each department which offers graduate study is asked to designate one or two individuals to attend Faculty meetings, average recorded attendance over the past two years has been about 60 persons. In a formal sense, however, the Faculty has a membership of 1,200 persons, and imposition of the Senate guidelines would require the election of a minimum of 60 graduate students to attend Faculty meetings.

The Faculty has petitioned Senate to reduce the number of student representatives in its case to a minimum of 30 and has proposed a procedure which would see 35 graduate students elected.

In the event that Senate balks at the idea of a minimum of 30, a second procedure is recommended which would see a total of 64 graduate students elected to membership in the Faculty.

The table below shows, in summary form, the recommendations approved by Senate for student representation on Faculties. For those who are statistically minded, the average percentage of student representation for all Faculties, excluding Graduate Studies, is 8.79.

SUMMARY OF STUDENT REPRESENTATION ON FACULTIES

FACULTY	VOTING MEMBERS ON FACULTY	NUMBER OF STUDENTS	PERCENTAGE	CONSTITUENCY	HOW ELECTED
Agricultural Sciences	52*	3	6	Undergrads 2 Graduates 1	Undergraduate Society
