

Huge mural measuring 8 x 14 feet by noted artist Jack Shadbolt now dominates the main concourse of the Main Library on campus. The colorful painting, entitled *Emergent Image*, was first painted in 1956 and revised in 1980 and deals with an image that has recurred in Mr. Shadbolt's work in recent years — "the cycle of transformations of a butterfly from larva to pupa to full-fledged, beautiful-winged insect and... in this case, the breaking from the cocoon into flight." The painting has been loaned to the University by Professor emeritus of Hispanic and Italian Studies John McDonald.

## Parking fees go up 12 per cent

Campus parking fees are up an average of 12 per cent for 1982-83, with staff/faculty yearly decals going to \$108 from \$96.

Preferred student decals rise to \$42 from \$37, resident student parking goes to \$15 from \$13, and general B lot decals rise to \$12 from \$11. New faculty/staff motorcycle rate is \$14, an increase of \$2, and the student motorcycle rate goes to \$7 from \$6.

The yearly fee for space in the Health Sciences Parkade remains at \$132, and the fee for the Music Building stays at \$180.

In a bid to discourage half-day parking

at meters, the rate goes to 25 cents per half-hour instead of per hour, bringing meter charges to parity with parkades and visitor lots.

The parking year for staff and faculty is Oct. 1 to Sept. 30. For students, it's Sept. 1 to Aug. 31.

The new fees were approved by the UBC Board of Governors June 1.

Also approved by the Board was an increase in parking fines. For all violations except overtime parking at meters, the new fine is \$10, up from \$5. The \$5 fine remains for meter violations.

## McInnes named new University Librarian; two heads appointed

Douglas McInnes, a 1955 UBC graduate who joined the University Library in 1963, has been appointed University Librarian, effective June 1.

He has been Acting Librarian since Basil Stuart-Stubbs left the position to become head of the School of Librarianship.

Mr. McInnes studied at the Sorbonne, Paris, on a French government scholarship after obtaining his Bachelor of Arts degree in 1955, and then returned to UBC to qualify as a teacher in 1957. He taught secondary school in Oliver and North Vancouver before once again returning to the University in 1962 as a librarianship student. He got his Bachelor of Library Science degree in 1963, along with the gold medal as head of his graduating class.

He was with the Special Collections division for a year, was Biomedical Librarian for three years and then was Assistant Librarian for Public Services for three years before being appointed Acting Librarian in 1981.

The appointment of Mr. McInnes was approved by the Board of Governors June 1. The Board also approved the appointment of Dr. David Williams as head of the Department of Physics, and

## Grant Burnyeat heads Alumni

Grant D. Burnyeat is the new president of the University of British Columbia Alumni Association. He took office at the association's annual meeting May 20 at Cecil Green Park.

Mr. Burnyeat, who succeeds Robert J. Smith, president in 1981-82, graduated from UBC's law school in 1973. A former president of the student Alma Mater Society, and a former vice-president of the Law Students Society, he has, since graduating, been an active supporter of the University, working on association committees involving fund-raising, government relations, alumni branches, and student affairs. He was a member of the committee which was instrumental in the creation of UBC's award-winning Aquatic Centre.

A lawyer with the Vancouver firm of Davis and Company, Mr. Burnyeat is a former member of the Vancouver Board of Variance, president of the Vancouver Safety Council and a director of the B.C. Safety Council, a past president of the Vancouver Centre Liberal Association, past policy director for the B.C. Liberal Party, and director of Pacific Cinematheque.

Two other executive positions were filled by acclamation. The new vice-president is Michael Partridge, BCom'59, Regional Manager/Group Benefits Division at London Life Insurance Company. (Under the association's constitution he will automatically assume the presidency in 1983.) John Henderson, BComm'77, a chartered accountant with Ernst & Whinney, takes on the responsibilities of treasurer.

Dr. Bryan Clarke as head of Educational Psychology and Special Education.

Dr. Williams, a Canadian citizen who was born in Wales, has been a member of the UBC faculty for 20 years. After a year as an instructor in physics, he became an assistant professor in 1963, an associate

Doug McInnes

professor in 1965 and a professor in 1971.

Prof. Williams' research interests are in the field of solid state physics, specifically the electronic properties of metals and alloys. He has used a variety of techniques in his research, including nuclear magnetic resonance and positron annihilation.

More recently, he has worked at TRIUMF, the nuclear research facility located on the UBC campus, on spin rotation in one of the elementary particles known as muons.

Prof. Williams, who succeeds Dr. Roy Nodwell as physics head on July 1 when Dr. Nodwell completes his five-year term, also has had extensive administrative experience at UBC. He was assistant dean in the Faculty of Graduate Studies in 1975-76 and was associate dean from 1976 through 1980.

Dr. Clarke, who came to UBC from Australia in 1969 to initiate a training program for teachers of the deaf, is the first permanent head to be appointed within the Faculty of Education since the faculty was departmentalized a year ago.

Prof. Clarke is a graduate of the University of Melbourne and of the University of Manchester, where he was awarded the degree of Doctor of Philosophy in the Education of the Deaf. He taught for 27 years in Australia before coming to Canada.

He was a 1972 winner of the Master Teacher Award at UBC, after receiving a certificate of merit for teaching in 1971.

His appointment as head of Educational Psychology and Special Education was effective May 1, 1982.

Presidency of UBC's 25-Year Club has been passed from Sue Calthrop of the Office of Co-ordinator of Health Sciences to Gordon Crossan of the Department of Anatomy in the Faculty of Medicine.

## Two new centres for advanced technology approved by Senate

The establishment of two new centres for advanced technology in microelectronics and for molecular genetics was approved at the May meeting of UBC's Senate.

Both centres will operate under the aegis of the Faculty of Graduate Studies, which approved their establishment in April.

The Centre for Advanced Technology in Microelectronics is an expansion of the microelectronics laboratory of the Department of Electrical Engineering of the Faculty of Applied Science.

The centre, which will foster graduate student training and research, will be supported by annual federal grants of \$200,000 over the next five years, Senate was told by Dean Peter Larkin, the head of the graduate studies faculty.

The facilities of the microelectronics centre, Senate was told, will be operated in conjunction with Simon Fraser University, the University of Victoria and the B.C. Institute of Technology.

Dean Larkin told Senate that an incorporated, non-profit society would be set up in association with the centre to undertake contracts with industry. The society would use federal funds to purchase equipment, hire technical personnel and buy the time of university faculty and staff until the society becomes self-supporting.

The microelectronics centre will be operated by a board of management chaired by Dean Larkin. Other board members will be the deans of Applied Science and Engineering and the head of electrical engineering.

A director responsible for centre activities will report to the board of management. There will also be a technical advisory committee to the centre, widely representative of microelectronics technology in B.C.

Dean Larkin told Senate the new Centre for Molecular Genetics would provide research and teaching facilities for innovative, interdisciplinary work in the

rapidly expanding area of biotechnology.

Senate was told that the centre would involve close co-operation between clinical departments in the medical faculty and basic science departments. In addition to providing training for a wide range of students, the centre would foster development of an interdisciplinary course emphasizing genetic engineering techniques. Such a course "is becoming essential as part of the training for a variety of disciplines such as microbiology, biochemistry, cell biology and genetics."

In response to a question concerning membership on a scientific advisory board to the molecular genetics centre, Dean Larkin said provision had been made to include on the advisory board an individual who would ensure that the concerns of the non-scientific, non-academic community were made known to the scientists on the board. He confirmed that one of the functions of the board would be to consider ethical questions raised by this new field of study.

In addition to the scientific advisory board, the molecular genetics centre will have a board of management made up of UBC's vice-president (research), the centre's director, the deans of Medicine, Science, Dentistry and Graduate Studies and a representative of industry. An executive committee will meet monthly to oversee the ongoing activities of the centre.

Initially, the Faculty of Medicine will provide space for the centre and the administration of grants and contracts will be handled through the graduate studies faculty.

### Language Classes

The Centre for Continuing Education is sponsoring three-week intensive non-credit courses in conversational French, Japanese and Spanish beginning June 1, July 12 and Aug. 14. For more information, call 228-2181, local 227.

# Savings to ensure academic flexibility for 1982-83 year

UBC's president, Dr. Douglas T. Kenny, issued the following statement yesterday (June 8).

For the University, fiscal 1981/82 will be remembered as a difficult year, characterized by a planned deceleration in approved expenditures as an essential prerequisite for financial stability and to avoid budget deficits.

The year opened with financial uncertainty as operating revenues did not match financial commitments. In addition, the deteriorating budgetary outlook of the province and the nation was already casting a shadow of doubt over the ability of the University to meet academic and financial requirements. Moreover, there was the uncertainty generated by the federal-provincial impasse on the future funding of Canadian universities. Therefore, while improvements in our financial affairs might be expected over the longer term, immediate prospects were not promising.

Given these circumstances, coupled with the necessity to postpone decisions on 1982-83 expenditures pending completion and acceptance of a report by an advisory committee on retrenchment, there was no alternative but to instigate a program of belt-tightening in order to put our house in better financial order for the immediate future. The University made headway in three vital areas: first, controlling a mismatch of operating funds and expenditures; second, tightening its operating expenditures; and third, strengthening its reserves, which were a very modest \$400,000 unallocated from the 1980/81 fiscal year.

You will recall that when I spoke to the faculties in the fall of 1981, I said that deans and all others had been asked to maximize savings over and above the immediate shortfall for the fiscal year 1981-82 in order to cushion the effect of the larger annualized shortfall of \$7.483 million, so that, paradoxically, the University would end the year with a reserve instead of a deficit.

The University's financial affairs for the year ended March, 1982, are generally better than anticipated. This was the result of augmented investment income owing to skyrocketing interest rates (\$2.7 million), an additional medical grant from the province (\$800,000), and the bulk of the remainder from non-recurring savings due to restraint on expenditures. As a result of this combination of high interest rates and judicious financial restraint due to the exceptional co-operation of all segments of the University, our preliminary estimated reserve at the end of the fiscal year is \$6.4 million, or approximately 2-3 per cent of UBC's total operating funds. Although this reserve is still subject to provincial government audit, it will be used mostly to ease the impact of retrenchment on academic operations in the 1982-83 fiscal year.

Specifically, the sources of funds for the 1981-82 reserve are:

- \$2.7 million as a result of unusually high short-term interest rates in 1981-82;
- \$800,000 from uncertainties associated with the medical school expansion budget, which reserve had been created to neutralize the possibility that the medical school grant would not include funds for medical costs transferred from the provincial health ministry to the Ministry

of Universities, Science and Communications. After the release by the provincial government of the \$6.1 million in December, 1981, for medical school expansion, the University's concerns were removed; thus the \$800,000 reserve is now available for other purposes;

- \$300,000 returned to UBC by B.C. Hydro in March, 1982, as the result of a roll-back in electrical power rates by the B.C. Energy Commission;

- \$400,000 from an unallocated reserve from the previous fiscal year;

- \$1.2 million as a result of a flexible budgetary program whereby the deans were informed in the fall of 1981 that any extra savings they might achieve would be returned to their 1982-83 budgets. These "carry-forwards" have now been returned to the faculties for non-recurring expenditures;

- \$1 million of additional savings were effected through the co-operation of deans and vice-presidents by reducing planned budgetary expenditures over and above those required to solve the cash flow problem facing the University in meeting its operating expenses.

Thus, the initiatives taken to correct the budgetary situation of 1981-82 have been successful and reflect the substantial effort made by the University community. The strengthening of the University's reserve base is a positive result in that it will provide greater academic flexibility in meeting the effects of retrenchment and protection against the threat of reduced government funding.

Although most (87.5 per cent) of these savings are available for non-recurring purposes only, they are nevertheless important and will be a bright spot for the University in the near future.

Douglas T. Kenny  
June 8, 1982

## How UBC will use reserve

Here is how UBC plans to use the reserve for short-term financing endeavors in the current fiscal year.

- Approximately \$1.2 million has been returned to the faculties to assist them in the on-going retrenchment program.

- A budget of \$1.6 million was approved by the Board of Governors earlier this year to meet the costs of positions being discontinued because of retirements and retrenchment and to meet other non-continuing obligations.

- A contingency fund of nearly \$900,000 to be used in the event that enrolment predictions for the University's 1982-83 winter session are not met.

- A reserve of nearly \$300,000 to meet anticipated increases in the cost of utilities.

- An academic retrenchment assistance fund of nearly \$1.7 million could be a source of non-recurring funds to reduce UBC's salaries and wages base.

- The remainder of the reserve — \$700,000 — is unallocated and may be used in the current fiscal year to meet non-recurring expenditures which can't be anticipated at this time.

### Public Events Line

The after-hours public events information line sponsored by the Department of Information Services has a new phone number. The number has been changed from 228-3133 to 228-3131. If you've got an event of public interest that you'd like included on the tape, please call Lorie Chortyk, 228-2064, before noon on the day of the event.

### Student Health Service

The summer hours for the Student Health Service, effective May 3, will be 8 a.m. to 4 p.m. Regular hours will begin again in September. The Student Health Service is located in the acute care unit of the Health Sciences Centre Hospital.

# Doug Whittle heads list of faculty retirees

Nine members of the UBC faculty — five of them with 30 or more years of service — will reach retirement age on June 30.

Topping the list of retirees in terms of service is Prof. Douglas Whittle, who joined the UBC School of Physical Education and Recreation in 1945 after graduating from the University of Toronto. He went on to get his Master of Science and Doctor of Philosophy degrees in health and physical education at the University of Oregon.

During his 37 years at UBC, Prof. Whittle has been active in numerous professional organizations. He's past president of the B.C. Gymnastics Association and the B.C. branch of the Royal Life Saving Society and has held executive positions on the Amateur Athletic Union of Canada and the Canadian Amateur Swimming Association. He was national chairman of the Canadian

Gymnastic Committee in 1961-62.

Retiring after 35 years as a teacher in UBC's School of Nursing is Prof. Elizabeth K. "Beth" McCann, whose association with the University began in 1933 when she enrolled in the nursing training program, which in those days took seven years to complete.

She was awarded the degree of Bachelor of Arts in 1939 and the following year received the degree of Bachelor of Applied Science in Nursing. Prof. McCann taught nursing at the Royal Columbian Hospital in New Westminster and at Vancouver General Hospital before being appointed to the UBC faculty in 1947 as the first instructor to work with university students in hospitals.

Prof. McCann is a past president of a number of professional organizations, including the Nurse Administrators Association of B.C., and is one of the founding members of the Canadian

Association of University Schools in Nursing, which she served as president. She is currently president of UBC's Nursing Alumni Division.

Prof. McCann's first project in retirement will be to complete the writing of a history of UBC nursing school for publication.

Prof. Colin Gourlay of UBC's Faculty of Commerce and Business Administration retires after a teaching and administrative career spanning 33 years.

Prof. Gourlay joined the UBC faculty in 1948 after completing his Master of Commerce at the University of Toronto. The previous year he was awarded the degree of Bachelor of Commerce by UBC.

Prof. Gourlay served as acting dean of the commerce faculty on several occasions and was that faculty's assistant dean until 1977.

Dr. James Polglase, the head of the Department of Biochemistry in the Faculty

of Medicine since 1976, retires after a 30-year teaching and research career.

Dr. Polglase received his Bachelor and Master of Arts degrees at UBC in 1943 and 1944 before enrolling at Ohio State University, where he was awarded the degree of Doctor of Philosophy in 1948.

Dr. Polglase has been associated with UBC's medical school almost from its inception. He was appointed to the faculty in 1952 after a research career in industry and at the medical school of the University of Utah.

Also retiring after 30 years at UBC is Inglis F. "Bill" Bell, who joined the UBC library staff in 1952 and was named associate librarian for the UBC system in 1964.

In addition to serving as president of the Canadian Association of College and University Libraries and the Bibliographic Society of Canada, Mr. Bell has been an active contributor to the UBC journal *Canadian Literature*, both as its business manager and as a contributor of articles and checklists.

He is also the co-author of a number of bibliographic works, chiefly on Canadian literature, published by the UBC and University of Toronto Presses.

Mr. Bell was responsible for introducing a number of modern management practices into the UBC library system, including recruitment policies that built up specialized reference staff to support research programs. He was an early advocate of the use of computers in library operations and led the way in introducing them at UBC.

Three members of the UBC faculty retire after 20 or more years of service.

Dr. Henry G. Dunn, a member of the Department of Paediatrics in the Faculty of Medicine, joined the UBC faculty in 1954 after completing specialist training in hospitals in London, England, and in New York.

He is best known for a massive, 15-year study which showed that babies underweight at birth suffered from a higher incidence of physical, emotional and intellectual problems than children of normal birth weight.

Dr. Edward A. Bird joined the Department of French in 1958 after a teaching career in a number of French schools and at the University of Paris. He received his B.A. from UBC in 1949 and undertook graduate work in the 1950s at the Universities of Montpellier and Paris.

Dr. Bird is the author of a number of publications on French literature, chiefly on 19th century authors, and served as general editor for a series of 19th-century French plays published in the 1960s.

Another member of the UBC nursing school who retires after 22 years on the faculty is associate professor H. Elizabeth Cawston, a UBC graduate who did post-graduate work at the Universities of Washington and California.

She has been actively involved in the UBC nursing school's administrative affairs and is currently undergraduate academic advisor. She was also chairman of the school's student affairs committee in the past two years.

Retiring after 15 years is Joseph I. Richardson, a member of the Department of Religious Studies since 1967. He is the former dean of Carey Hall at UBC and served as chairman of UBC's committee on CUSO, which arranges for students to undertake work in developing countries. He is an expert on Indian religions and religion and cultural change.

## Summer Dance Classes

Summer dance classes offered by Ballet UBC Jazz are now in progress. Ballet and jazz classes for all levels are being held at various locations on campus. Take advantage of our special drop-in rates or sign up for the second session beginning on July 5. For more information, come to Room 216E, Student Union Building.

Physical Plant mason Hank Hoppmann is one of the few people at UBC who can claim that he's had the covered pool of UBC's Aquatic Centre all to himself. But not for swimming. Hank and other maintenance workers are currently putting the indoor pool in tip top shape for its June 21 reopening. Hank is going over the pool foot by foot and regrouting tiles. In the meantime, the outdoor pool at the Aquatic Centre, which has just undergone an \$886,000 facelift, is open for business daily.

# Dorothy Jones ends long UBC career

Only on the rarest occasions is anyone credited with becoming indispensable in the workplace. But the odd time, someone displaying unique human qualities can over the years seem to be irreplaceable.

According to many in the Faculty of Education, this is the case with Dorothy Jones, supervisor of Staff Services, who retires this summer.

Dorothy's career in the faculty began before the new Scarfe building even existed. Back in 1962, she joined Neville Scarfe, first dean of Education at UBC, and a skeleton staff, working out of army huts on the West Mall, adjacent to the old auditorium. The Faculty of Education was incorporated into UBC in July, 1956, after the provincial normal school closed its doors. A few years later, Dorothy joined the staff and her career closely parallels the growth of the faculty since that time.

First employed as a secretary II in the

secondary division, she was soon promoted to Secretary III; by 1969, she became a clerk IV administrative assistant, and eventually, supervisor of Staff Services. Her main responsibilities over the years consisted of interviewing, hiring, and managing the secretarial staff and typing pool, while working closely with technical staff and faculty members.

But Dorothy's history at UBC precedes the education faculty. People remember Dorothy between 1959-62 when she worked in the Ceremonies Office, and before that she was employed on an hourly basis in the Registrar's Office in the early 1950's. And 15 years of busily raising four children had preceded that first part-time job which unbeknown to Dorothy would culminate in a 20-year-career in the Faculty of Education.

During his 17-year term as dean, Neville Scarfe fondly recalls Dorothy's

contribution: "She was one of the most conscientious people you'd ever met. She managed the secretaries very efficiently, quietly, gently and always with a smile."

And when other long-time employees recall Dorothy's friendship, they repeatedly shower her with such qualities as warm and human, considerate, trusting, dependable, concerned, cheerful and full of fun, selfless and always an inspiration.

Albeit four children, ten grandchildren and a husband of 47 years will fill her retirement, Dorothy has a personal goal: "I would like to feel that I am doing something worthwhile and useful."

On Tuesday (June 8), Dorothy will be surrounded by long-time UBC friends and co-workers at the Faculty Club, where she received a gold watch and many warm thanks.

— Diane Longson

# UBC CALENDAR

## Calendar Deadlines

For events in the weeks of July 7 to July 21 material must be submitted not later than 4 p.m. on June 30. Send notices to Information Services, 6328 Memorial Rd. (Old Administration Building). For further information, call 228-3131.

### MONDAY, JUNE 14

**Cancer Research Seminar.**  
DNA Damage and DNA Structure. Dr. Urs Kuhnlein, Environmental Carcinogenesis Unit, B.C. Cancer Research Centre. Lecture Theatre, B.C. Cancer Research Centre, 601 W. 10th Ave. 12 noon.

### TUESDAY, JUNE 15

**Young Talent in Recital.**  
Third in a series of recitals organized by UBC pianist Robert Silverman by gifted young musicians. Tonight's concert features Lisa Nagatani, 16, on piano. Recital Hall, Music Building. 7:30 p.m.

### WEDNESDAY, JUNE 16

**Mass Spectrometry Discussion Group.**  
Current Research Topics and Mass Spectrometry Equipment. Dr. G.A. Gudauskas. Lecture Hall 601, Cancer Control Agency of B.C., 2656 Heather St. 2 p.m.

### FRIDAY, JUNE 18

**Faculty Club Barbecue.**  
Cook-your-own-steak barbecue will be held on the sundeck outside the main dining room. For information, call 228-2708. Faculty Club. 6 p.m.

### MONDAY, JUNE 21

**Cancer Research Seminar.**  
Studies of Globin Gene Expression Using Plasmid Vectors. Dr. R.K. Humphries, National Institute of Environmental Health Sciences, Research Triangle Park, North Carolina. Lecture Theatre, B.C. Cancer Research Centre, 601 W. 10th Ave. 12 noon.

### TUESDAY, JUNE 22

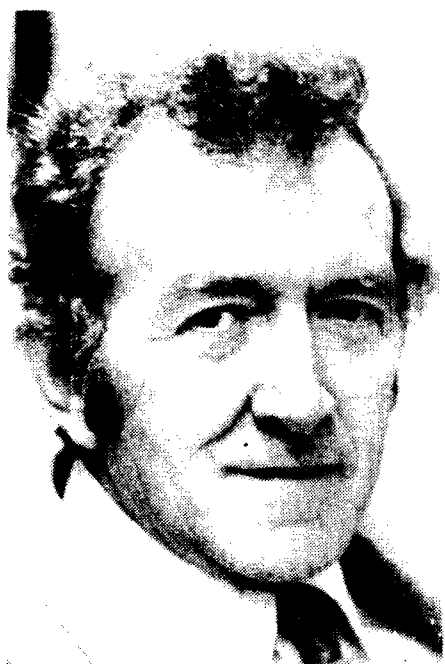

**Young Talent in Recital.**  
Fourth in series of recitals by gifted young musicians. Tonight's concert features Alyssa Wentworth, 15, on piano. Recital Hall, Music Building. 7:30 p.m.

### THURSDAY, JUNE 24

**Chemistry Seminar.**  
Photoelectron Spectroscopy of Short-Lived Species: Divalent Group IVA and VIA Compounds. Dr. C.A. de Lange. Physical Chemistry. Free University, Amsterdam. Room 225, Chemistry Building. 2:30 p.m.

### SUNDAY, JUNE 27

**Canadian Music Competition Finals.**  
A benefit concert will be held throughout the day from 8:30 a.m. to 10 p.m. For information, call 228-3113. Recital Hall, Music Building.

Bill Morrison, senior technician in the UBC physics department and a member of UBC's support staff for nearly 31 years, is the newest member of the Board of Governors. He was elected from a field of 11 candidates and will sit on the Board until Jan. 31, 1984.

### MONDAY, JUNE 28

**Cancer Research Seminar.**  
Influence of Apurinic Sites on Fidelity of DNA Replication. Dr. L. Loeb, Pathology, University of Washington, Seattle. Lecture Theatre, B.C. Cancer Research Centre, 601 W. 10th Ave. 12 noon.

### TUESDAY, JUNE 29

**Cancer Research Seminar.**  
New Methodologies for Defining the Link Between Diet and Cancer. Dr. W.R. Bruce, director, Ludwig Institute for Cancer Research, Toronto. Lecture Theatre, B.C. Cancer Research Centre, 601 W. 10th Ave. 12 noon.

**Young Talent in Concert.**  
Final concert in a series featuring gifted young musicians. Katja, 12, and Corey Cerovsek, 10, will perform on piano and violin. Recital Hall, Music Building. 7:30 p.m.

### THURSDAY, JULY 1

**Dominion Day. University closed.**

### FRIDAY, JULY 2

**Faculty Club Barbecue.**  
Cook-your-own-steak barbecue will be held on the sundeck outside the main dining room. For information, call 228-2708. Faculty Club. 6 p.m.

### TUESDAY, JULY 6

**Music for Summer Evenings.**  
The first in a series of ten free summer concerts to be held weekly until Aug. 5. The second and third concerts are scheduled for Wednesday and Thursday, July 7 and 8. For program details, call 228-3113. Recital Hall, Music Building. 8 p.m.

## Notices . . .

### Stage Campus '82

*The Sea*, by Edward Bond, continues at the Frederic Wood Theatre until Saturday, June 26. For ticket information, call 228-2678 or drop by Room 207 of the Frederic Wood Theatre.

# Barn proposals sought

UBC's Board of Governors has asked the Alma Mater Society to submit plans for the use and financing of renovations to the empty Dog Barn on Thunderbird Boulevard.

The barn, which has housed both horses and dogs since it was constructed in 1919, is located in the middle of parking lot B. The University has proposed demolition of the barn, which is no longer needed as the result of completion of new animal care facilities on the south campus.

A number of proposals have been made for the continued use of the barn. It's been suggested that it be preserved as a heritage building or used for storage.

When the barn's future was discussed at the April meeting of the Board of Governors, President Douglas Kenny said that if the building continued to be listed in UBC's space inventory, the University's ability to attract money for construction of new buildings would be jeopardized.

He was supported by UBC's vice-president for administrative services, Prof. James Kennedy, who recommended that

the building be demolished. He said interest in preserving the building reflected a familiar UBC paradox — "occupants of sub-standard space present a strong case why new facilities are needed, but empty sub-standard space suddenly appears desirable."

He added: "The cost of continuing to operate such space is not justified."

Alma Mater Society President Dave Frank said the AMS renovations committee would consult with parties interested in preserving the building in order to prepare a proposal for the Board of Governors.

He said he wasn't prepared to comment on ways of financing renovations to the building until costs had been determined.

He said one of the ideas being considered was the creation of office space, a lounge and an area for dancing. "It would mean we could hold a real barn dance in the building," he commented, "and there would be lots of free parking."

The Board of Governors has asked that the AMS proposals be ready for its meeting on Oct. 5.

## Walking Campus: fine now \$25

The "walking campus" concept soon will be more than just a concept. Effective Sept. 1, the owners of vehicles found inside the pedestrian area will be liable to fines of \$25, whether the vehicle is moving or parked.

The UBC Board of Governors approved the penalty at its June 1 meeting, backing a proposal by Al Hutchinson, director of Traffic and Security.

Mr. Hutchinson said abuse of the "walking campus" area has been growing, increasing the danger to pedestrians.

UBC's traffic and parking regulations have been revised, and Section 9 on the "walking campus" has a sub-section defining the region which constitutes the campus pedestrian area. Barriers and new signs will be installed before the start of the winter term.

The pedestrian area is bounded by East and West Mall, and on the south by Agronomy Road. The northern boundary

is Crescent Road from East Mall to Main Mall, then south on Main Mall and west on Memorial Drive to West Mall.

In addition, East Mall will become a one-way road southbound from Crescent to Agronomy, Agronomy Road and Crescent Road will remain as two-way arteries, but West Mall will be one-way south from University Boulevard to Agronomy, one-way north from University Boulevard to Memorial Road, and two-way only between Memorial Road and Marine Drive.

Only service and emergency vehicles and holders of loading zone permits will be permitted to enter the pedestrian area.

Another major change affecting drivers this fall will be the elimination of parking on Crescent Road. Parking was permitted there during construction of the Fraser River Parkade, which opened in May, and which accommodates 730 cars. Holders of staff/faculty decals may use the parkade at no extra charge.

### Child Care on Campus

**Short Stay Day Care.** UBC is offering a short-term care program for children 2½ to 5 years of age, from July 2 to Aug. 21. The centre will operate out of Hut 93, 2727 Acadia Rd., from 7:45 a.m. to 5 p.m., Monday through Friday. Advance registration may be made by calling the Daycare Co-ordinator at 228-5343. "Drop-ins" will be taken on a first-come, first-served basis if space permits.

**University Hill After-School Summer Program.** From June 29 through Sept. 7, for children from 6 to 12 years of age. The program will include arts, music, theatre, sports and summer outings. Full and part-time spaces are available but limited. For more information and application forms, call the Day Care Co-ordinator at 228-5343, or the After-School Program at 228-9614.

### Volunteer Opportunities

Volunteers are needed for the UBC Health Sciences Centre Hospital. The Hospital is composed of three units — the Psychiatric Unit, Extended Care Unit and the new Acute Care Unit. For information regarding opportunities available, call Sherry Kendall, 228-7384.

### The Garibaldi Connection

Letters, manuscripts, books and artifacts related to Italian liberator and hero Giuseppe Garibaldi are on display until the end of July in the Special Collections Division, top floor, south wing, of the Main Library.

### Campus Tours

Tours of the campus are available through the Department of Information Services. Tours begin at 10 a.m. and 1 p.m. Monday through Friday. For more information, call 228-3131.

### Language Study

Do you speak Hindi? If you have a baby 10 to 12 months old, and Hindi or other Indian languages are spoken in your home, then you and your baby could help us with our speech and language study at UBC. For more information, call Dr. Maggie Edwards at 228-2874 or 271-4920.

### Botanical Garden Hours

The Japanese Nitobe Garden is open seven days a week, from 10 a.m. to half-an-hour before sunset. The Alpine, Asian and B.C. Native gardens, adjacent to the Thunderbird Stadium, are also open during daylight hours.

# Memorial fund honors Sobell

A memorial fund honoring Mrs. Joyce Sobell, a long-time member of the University community who died in September, 1981, has been established by International House and the UBC Alumni Association.

Organizers of the memorial fund have set an immediate goal of \$20,000 as an endowment, the earnings from which will be used to establish a scholarship for an international student enrolled in theatre, music, fine arts or creative writing at UBC.

Mrs. Sobell was an active member of International House and had a special interest in the theatre and arts at UBC and as a member of Vancouver's Community Arts Council. She was also associated for many years with the work of the Vancouver Institute, which sponsors a series of Saturday night lectures on the campus during the winter session.

Tax-deductible receipts will be issued to donors, who are asked to send cheques payable to the University of B.C. to the director of the Alumni Fund, Cecil Green Park, 6251 Cecil Green Park Road, Vancouver, V6T 1W5, or to the executive director of International House at 1783 West Mall, UBC, V6T 1W5.

UBC Reports is published every second Wednesday by Information Services, UBC, 6328 Memorial Road, Vancouver, B.C., V6T 1W5. Telephone 228-3131. Al Hunter, editor, Lonie Chortyk, calendar editor, Jim Baillam, contributing editor.
