Universities submit proposals to gov't

Proposals from B.C.'s three public universities for operating-budget increases in the current fiscal year were delivered to the

Senate approves new programs

UBC's Senate has given academic approval for establishment of three new programs, two of them leading to degrees. The degree programs are a four-year Bachelor of Science in dietetics to be offered in the School of Family and Nutritional Sciences of the Faculty of Arts, and a program leading to the Doctor of Philosophy degree in urban land economics in the Faculty of Commerce and Business Administration.

Senate also approved a proposal from the Faculty of Medicine to offer a Residency Program in Vascular Surgery for graduate physicians. It will consist of 12 months of training at three Lower Mainland hospitals.

All the programs must now go forward to UBC's Board of Governors for approval. In addition, the vascular surgery program will require approval by the Royal College of Physicians and Surgeons of Canada before it can be offered.

provincial government and the Universities Council of B.C. on April 30.

The universities also submitted a preliminary list of proposals for funds to develop centres of excellence in areas which the provincial government said it would fund when it announced the Fund for Excellence in Education in February -- forestry, international business and trade, links with cultural industries, Pacific Rim studies, biotechnology and computer systems.

Money to supplement university operating budgets will also come from the Fund for Excellence in Education.

Detailed proposals from the universities for funding for centres of excellence have to be in

the hands of the provincial government by May 30, President David Strangway told the April meeting of UBC's Senate.

He said there had been "good cooperation" between the three public universities in drawing up proposals for additional operating funds. "It was our belief," the president said, "that it was important for us to work together to identify the highest priority proposals that dealt with issues of common need and interest across the university."

The president said he hoped for "fast action" by Victoria on the university proposals so that a budget can be developed for the current fiscal year.

Search committee for new VP formed

A committee chaired by President David Strangway has begun a search for an individual to fill the recently created position of vice-president, student and academic services, in the President's Office.

The new vice-president will report to the president and will be responsible for, but not limited to, matters affecting the library, computing -- both central and distributed -- and student services.

Other members of the screening committee are Prof. Daniel Birch, vice-president academic; Dean Robert Miller, Science; Dean Robert Will, Arts; Dr. Jane Gaskell, a member of UBC's Senate and the Department of Social and Educational Studies in the Faculty of Education; Robert Gill, a graduate student in the Department of Geological Sciences; and Simon Seshadri, the current president of the Alma Mater Society.
