# Fonds Description

**Faculty of Agricultural Sciences fonds.** – 1917-1986; predominant 1955-1982.  
8.33 m of textual records and other materials.

## Administrative History

In 1914, L.S. Klinck, Professor of Cereal Husbandry at Macdonald College, McGill University, was appointed as the University of British Columbia's first Dean of Agriculture. During UBC's first two sessions, there was no teaching undertaken in the Faculty, although a general course in agriculture was given by Klinck which was open to 3rd and 4th year Arts students. The first students in Agriculture were enrolled in 1917/18. In 1917, the Faculty consisted of four departments: Agronomy, Animal Husbandry, Horticulture and Poultry Husbandry. Later, the departments of Dairying (1919), Agricultural Economics (1940), and Agricultural Mechanics (1947), were added. In 1955 the Faculty was reorganized into the departments of Agricultural Economics, Agricultural Mechanics, Animal Science, Plant Science, Poultry Science and Soil Science. In 1969 the name of the Faculty was changed to Agricultural Sciences and the Dept. of Food Science was added. In 1985, the Dept. of Agricultural Mechanics and Bio-Resource Engineering discontinued the program in Agricultural Mechanics and that part of the name was dropped. In 1986 the departments of Animal Science and Poultry Science amalgamated to form a new Dept. of Animal Science. In 2005 the Faculty's name was changed again, to Faculty of Land and Food Systems.

## Scope and Content
