Administrative History

Founded in 1991, the Peter Wall Institute for Advanced Studies is the senior research institute at the University of British Columbia. It supports research through collaborative, interdisciplinary initiatives that have the potential to make important advances in knowledge. The Institute brings together scholars from UBC with distinguished researchers and experts from around the world to investigate fundamental research drawing upon and contributing to a wide range of diverse disciplines. In recognition of the current intellectual and funding landscape, one of the major goals of the Peter Wall Institute is to foster new collaborative, multidisciplinary research groups, meetings, and international exchanges to tackle a wide range of research. As well as helping to bridge Departmental and Faculty boundaries within UBC, the Institute is committed to facilitating contacts between outstanding researchers at UBC and distinguished researchers from around the world. The Institute aims to create a community of scholars, composed of outstanding researchers from faculties and schools across the whole UBC campus, who will contribute significantly to the intellectual life of the university. The primary, overriding concern in all Institute activities is to promote excellence in interdisciplinary, innovative and unique research unlike to occur without Institute funding.

The Institute's programs, many of which include financial awards, are centered on UBC's Vancouver campus and can be grouped into two categories: Thematic and Residential. Thematic Programs involve establishing an overall research theme in which scholars with the relevant expertise are gathered together. These consist of Exploratory Workshops, colloquia, Theme Development Workshops and the Major Thematic Grant which provides funding of up to \$500,000 over a three to five-year period to a broad interdisciplinary team of UBC and external scholars to research a new area. Residential programs focus on bringing together distinguished researchers, from UBC and around the world, to spend time at the Institute. These residencies, ranging in term from one month to one year, encourage the interaction of scholars from a variety of disciplines in exploring new research direction. These include the Peter Wall Distinguished Professor, Distinguished Scholars in Residence, Early Career Scholars, Distinguished Visiting Professor, and the Wall Summer Institute for Research (previously the Visiting Junior Scholar program).

Scope and Content

The records consist of correspondence, architectural plans, research grant proposals, research reviews, CVs and videotapes of colloquia and other PWIAS events, and numerous other records relating to the mission and programs of the Peter Wall Institute for Advanced Studies.

Notes
