The Report of the University Librarian to the Senate

1958/1959

TERM, "UNIVERSITY LIBRARY," may be an expression of fact, faith, or fiction, and those who use the name should be certain which sense they mean. A false assessment of library resources is as unscholarly as carelessness in any other academic field and is likely to be more damaging. A "university" without library facilities to support its full program is an incongruity. Unfortunately, adequacy is not easily defined, the annoying question of library standards is therefore often raised. With colleges blossoming into "universities" overnight while universities but slowly reach their true estate, both criteria and judgments are required by which perspective be gained.

A university is an institution of learning of the highest grade, having various faculties and schools (including the graduate and professional) concerned with all or many of the branches of knowledge; it is permeated by a spirit of inquiry and has its place in the world community; by making its students responsive to the findings of research, it changes the world in which they live and alters the practice of their chosen professions.... These are indeed no modest claims, and an academic body should profess them with gravity and caution. To achieve its ends, a university leans mainly upon its faculty, library, and laboratories.

The library of a university is at once its most mutable and most durable possession. Created deliberately, its resources define and determine what academic work can be done.

Whether for liberal education, for subject specialization and training in methods of research, or for mature inquiry based upon a significant body of source material, an adequate library must precede academic development. It cannot be brought about by reiteration.

It is perhaps normal to view our own performance with a lenient eye--comparing our situation with that of a wealthier neighbor and employing the social sciences to explain the difference. With one of the world's highest living standards, we are not greatly moved by the relative poverty of our universities. And we are apparently content to leave the task of advanced training in many fields to foreign institutions. If the result is undeveloped research centers of our own and a serious loss of promising and proven personnel, this penalty we have learned to pay. Our economy and culture have their fervid fans, but "Canadians," a local scientist recently said, "do not look with much enthusiasm upon pure research."

A national canvass of academic library resources, shared responsibility for graduate studies in given fields, and a determined move to develop research collections on a massive scale may be needed to bring a change of pace in the present decade. "And we invite anyone to show that we are guilty of unrealistic or extravagant planning," we quote from a recent Government statement. "Much of capacity ... is needed now," it said. "All of it will be needed within a few months or years," but it was speaking of roads, not the University.

Library Development

No single year in the history of a university library is likely to be decisive--every advance made serves to increase future responsibility. New personnel, policies and motion play their important part, but library growth is gradual and subject to interruption. Gains persist if they respond to change and are kept alive by cultivation.

Collections

increments of large and significant proportions were made during the year, confirming the University's intent and capacity to pursue research in given fields.

Just at the beginning of the academic year the Thomas Murray collection was received in Vancouver, ten tons of solid support for the program of Canadian Studies. Composed of several thousand items which are both very important and scarce, and a large stock of books which together constitute a collection of broad scope and usefulness, the collection when fully absorbed will greatly strengthen the library in an already well developed area.

The P'u-pan Chinese collection reached the University Library at the end of February 1959. Acquired from Macao (from its owner, Mr. Yao Chün-shih), it contains some 45,000 items (ts'e) in extraordinarily fine condition. Of these, about 115 are from the Sung and Yüan dynasties (960-1368), 3,326 from the Ming (1368-1644), 9,865 from the early Ch'ing (1644-1820), and the remainder from the Modern period (after 1820). Of more than three hundred manuscripts, the oldest is dated 1426, and some remain unpublished. Said to be one of the five most important collections on the continent, it will, with other expanding resources in Chinese and Japanese, bring scholars and distinction to the University.

The rate of growth of the Library--measured in numbers of volumes processed and sent to the bookstacks--rises gradually, this year's increment being 31,767 volumes (compared with 30,258 in 1957/58), of which 10,913 were bound periodicals (11,710). The size of the collection at the end of the fiscal year was 419,519.

In addition to the books and journals formally counted, there were 56,721 items added to the Reference collections (43,746 the previous year): government publications, 49,896 (37,033), pamphlets and university calendars, 5,013 (3,950), and maps, 1,818 (2,516). Publications on atomic energy from the United States, Great Britain, and Australia, and the publications of the Council of Europe were introduced this year on a full depository basis. Although thousands of unprocessed items in the Asian Studies and Murray collections yet remain, the backlog of uncataloged current material, which has averaged from two to four thousand items for a number of years, was eliminated.

There were 227 new journal subscriptions received (227), as listed in Appendix B, bringing the total to 4,965 titles. The Library Bindery produced 11,343 volumes (10,392), plus 919 in storage binding (1,139). The most notable acquisitions are reported in Appendix C.

Book Funds

During 1958/59 the following amounts were expended upon books, periodicals, and binding (with comparable figures for the two preceding years):

Expenditures Upon Books, Periodicals, and Binding

	<u>1958/59*</u>	<u>1957/58</u>	<u>1956/57</u>
Library	\$125,366.80	\$95,007.57	\$87,008.00
Medicine	31,175.60	33,326.72	29,346.65
Law	12,274.13	12,612.47	8,778.11
Education	10,541.17	11,972.37	5,038.04
Non-university	<u>32,896.48</u>	<u>37,577.75</u>	<u>15,880.50</u>
Total	\$212,254.18	\$190,496.88	\$146,051.30

* For detailed figures, see Appendix A.

Of the 1958/59 expenditures, \$174,318.38 was for books and periodicals, \$25,935.80 for binding. This year's total exceeded the previous year's by 11.4%. There was an increase of \$19,075.96 in the Library's formal budget for books and periodicals (24%), plus a special item of \$8,090.96 spent in preparation for establishing the College Library. The non-University funds included a grant of \$12,000 toward the purchase of the Thomas Murray collection.

Expenditures for all Library purposes were \$49.43 per student (\$50.42 and \$47.46 the two previous years); and the ratio of Library to total University costs (omitting capital items, but including research) was 4.3% (compared with 4.65 and 4.5). Comparing expenditures for 1958/59 with those of more than a hundred institutions of university rank on the continent for the previous year, 1957/58 (the latest available, and therefore weighted in our favor), we rank 40th in total library expenditures (36th last year), 29th in funds for books-periodicals-binding (31st), and 65th in size of book collection (65th).

Notable outside grants were received from Mr. Walter C. Koerner (for the Murray collection, the Humanities, and Slavonic Studies); from Dr. H. R. MacMillan (Forestry and History); the Leon and Thea Koerner Foundation (Asian Studies, Australian and English Literature, Law); the Otto Koerner Memorial Fund (Fine Arts); Dr. and Mrs. Thomas Ingledow (Canadian Studies); the Men's Canadian Club of Vancouver (Canadiana); the Japanese Canadian Citizens Association (Asian Studies); the Carnegie Corporation (French Canada); the B. C. Association of Broadcasters (communications); and other individuals and groups. Without this continuing support, many fields of study would be almost without library facilities.

Library Use

The direct services of loan, reference, and instruction were under heavy pressure during the year, responding to an increasing number of students and faculty, the cumulative effect of years of instruction in library use, more library-based course assignments. Students poured into the Library, and their expectations sometimes outran the supply of materials and manpower available to satisfy them. Often they had to wait their turn for books in great demand, and they may have hoped the Library staff would do all their "looking up" for them. The library of a university is a laboratory where students must learn to solve their own problems by mastering procedures which will be applicable to later studies.

What a student can do for himself in a library or laboratory should not be done for him by a librarian or teacher. Hand-feeding wastes the University's substance and limits the student's own means of development. A coordinated program of guidance, involving faculty, librarians, and bookstore (using paperbacks and anthologies for specific assignments and well planned library collections for broad reading and investigation), offers a sounder learning process and more effective use of resources.

In response to changing needs, plans for the reorganization of the University Library (in September 1960) will foster greater use of the collections. These changes in turn require users to make some alterations in their habits to take full advantage of the new facilities.

A College Library for 1st and 2d year students will bring instruction and library use more closely together. A large, open collection of some forty thousand volumes (plus transfers from the main Library when this is essential and five hundred individual study tables in well laid-out reading rooms will vastly improve the learning situation.

Four other "main" reading rooms will concentrate upon student use in the Sciences, Biological Sciences and Medicine, the Humanities, and Social Sciences. Each leading into its own particular section of the bookstacks, and staffed with full-time specialized personnel, they will offer immediate access to the current journals, reference works, bibliographies, and subject indexes.

The Division of Special Collections will provide a new laboratory for the Humanities and Social Sciences, with access to rare books, manuscripts, and other unusual materials in fields of Library subject specialization. Appropriate facilities for the conservation of these materials, and a branch of the B. C. Provincial Archives, will make fuller utilization of scholarly resources possible.

Quarters for the Fine Arts Library will be much enlarged to accomodate undergraduate students in the expanding program of Fine Arts and Music. A general Loan Division will coordinate the lending of books through all of the Divisions and supervise the general collections. The "inside" departments of Acquisitions, Cataloging, Serials, and Binding will be more closely allied through building alterations for more effective service.

The number of books borrowed from the Loan Division totaled 266,451 245,187 in 1957/58 , of which 105,609 were from the Reserve Book Room (97,668 This was an increase of 9% from the main Loan Desk and of 8% from the Reserve Room, set against a rise of 10.7% in student enrollment.

In two years the recorded loan of books (overlooking the heavy use of material by thousands of students within the bookstacks) has increased 24.3%, with a 49% rise in a five year period. (Appendix D for monthly loan statistics.

The faculty Library Delivery Service laid down 12,471 volumes at 40 designated delivery points during the year (11,397 in 1957/58), and a similar number of volumes were returned by this convenient means.

Interlibrary Loans. The Library meets most of the needs of scholars by purchases, but in part they are satisfied by other research libraries through interlibrary loan and photoduplication. We in turn lend to other institutions over as wide a range as the nature of the collection permits.

Transactions totaled 2,070 titles lent during the year (1,532 in 1957/58) and 571 borrowed (648), a 35% increase in loans and a reduction of 13.4% in materials obtained for local use. It will be noted that 70% of the material borrowed came from the United States, 25% from Canada outside British Columbia, and 5% from within the Province. On the other hand half of the material loaned by the Library went to B. C. users, 35% to the rest of Canada, and 13.6% to the U. S.

	<u>Borrowed from</u>		<u>Loaned to</u>	
	<u>1958/59</u>	<u>1957/58</u>	<u>1958/59</u>	<u>1957/58</u>
United States	70%	56%	13.6%	25%
Canada (outside B.C.)	25%	32%	35.4%	25%
British Columbia	5%	7%	50%	50%

We borrowed most frequently from: the University of Washington, 97; National Research Council, 62; National Library of Medicine, Washington, D.C., 39; University of California, 31; B. C. Provincial Library, 21; McGill University, 20; U.C.L.A., 13; University of Toronto, 12; (and a hundred other institutions).

We lent most often to: the B. C. Electric Co., 130; Fisheries Research Board, Nanaimo, 120; B.C. Engineering, 104; University of Saskatchewan, 87; Shell Oil Co., Calgary, 79; University of Washington, 78; University of Manitoba, 71; Shaughnessy Hospital, 59; University of Alberta, 58; Imperial Oil, Calgary, 50; Crease Clinic, 45; Vancouver Island Regional Library, 37; B. C. Provincial Library, 35; (and more than 250 other libraries).

The Library Staff

Developing a staff of high quality is as serious a problem as any the Library faces. Both personal factors (such as intelligence, education, motivation, and experience) and the capability of the Library to make the most of every individual's potential must be taken into account

Salary may not be the chief motivation of those who enter academic life, but its importance in attracting and retaining desirable people is recognized both by faculty and librarians.

During the past six years the salary floor for beginning librarians has risen by 50% (\$2,800 to \$4,200), while that for instructors has advanced 64%, or 28% more rapidly. The increase for instructor is expected to reach 77% in 1960. Whatever the argument for parity of salary floors at this academic level, there seems little justification for a smaller proportional increase. Advancing at the faculty rate, the beginning salary for Librarian-I would now be \$4,592.

In Canada, salary standards for librarians in university and college libraries have been set by the Canadian Library Association, this year in relation to faculty floors at the level of the much-copied "Toronto scale."

NOTE regarding the cover design: the original design is by the 18th Century calligrapher, Ferdinand von Freisleben, and it has been adapted here by Robert R. Reid. It first appeared in Johann Georg von Schwandner, Dissertatio epistolaris de calligraphiae ... Vienna, 1756, and was recently republished in New York, by Dover Publications, as Calligraphy: caligraphia latina (1958).

<u>Salary Standards for University Libraries</u>			
<u>Librarian</u>		<u>Faculty (Toronto Scale)</u>	
<u>Rank*</u>	<u>Salary</u>	<u>Rank</u>	<u>Salary (floors)</u>
1	\$4,500 - \$7,000	Instructor	\$5,500 -
2	6,500 - 8,500	Asst. Professor	7,000 -
3	8,500 - 11,000	Assoc. Professor	9,000 -
4	11,000 -	Professor	12,000 -

* Rank 1 embraces Librarian I and II at this University.
 Rank 2, Librarian III (1st Assistant or Specialist).
 Rank 3, Librarian IV (Division Head, Assistant Librarian).
 Rank 4, Chief Librarian.

If a \$4,700 beginning salary for Librarians is realized at this University in 1960, a 68% increase will have been made during the period in which the faculty gained by 77%, perhaps too modest a request. Because of the size of the library operation here, and the nature of the demands made upon staff members, there is no library in Canada requiring more ability or achievement.

We do not overlook the advances made in salary payments during the last fiscal year, for in all categories significant increases were made. Particularly notable were the new scales instituted for the non-professional staff, bringing University salaries up to those paid in the Vancouver area.

the completion of the new Library wing we anticipate some changes in conditions which will benefit the Library staff. Physical improvements will increase the ease and effectiveness of Library operations, and the new subject Divisions will give staff members greater opportunity for specialization and bring them into closer relationship with faculty and students

success of the new order, however, will depend to a large extent upon the ability of the University to provide

the additional staff positions required to man the new building.

Report Upon Turnover of Staff. A summary of the year's statistics concerning staff employment reflects somewhat less stability than in 1957/58, except for an increase in the length of service by the professional librarians.

(1) Turnover of Staff
(Percentage of resignations in relation to size of staff)

	<u>1956/57</u>	<u>1957/58</u>	<u>1958/59</u>
All staff	50%	38.7%	50.6%
Librarians	15%	10%	13%
Library Assistants	106%	54%	86.3%
Clerical staff	51%	57%	62%

(2) Average Length of Service (mean)*
(In months)

	<u>1956/57</u>	<u>1957/58</u>	<u>1958/59</u>
All staff	30.3	32.6	35
Librarians	43.3	44.7	59.4
Other	23.6	26.4	22.8

* Not counting four long-time professional staff, with service records of from 21 to 33 years, whose total length of service exceeds that of the other 23 professional members, and who are normally omitted from this tabulation to avoid distortion.

The average length of service of the professional staff was at the end of the academic year 4 years and 11 months (compared with 3 years, 9 months last year), the median being 3 years and 1 month (2 years, 1 month). There were at the end of August, however, 8 vacant positions: 3 Librarians, 4 Library Assistants, and 1 clerical staff. (For a list of Library staff and of persons who resigned during the year, see Appendix E.)

Resignations cause a continuing drain of accrued experience and put an additional load upon those who remain,

absorbing energies which could otherwise be put directly to productive use. Much of it is unavoidable, but every means of encouragement must be used to bolster the caliber and effectiveness of staff.

The Library Building

The move to add a south wing to the Library building has advanced through a long history of prospect and planning into actual production, and many of the problems and proposals with which this report is concerned are tied up with its completion. The total building will not be large enough when it is completed, but it will seat a thousand more people, give them greater opportunity for independent study, and serve them better as the library of a university.

Actual construction of the addition began in July 1959, and completion is scheduled for August 1960. Four floors of new reading rooms, eight of bookstacks, a stack "well" for later completion, another entrance hall into the old wing, and many changes to adapt the existing building to its new uses are to be completed within the coming year. Grateful recognition is given to Mr. Walter C. Koerner, whose gift made this addition immediately possible.

The Friends of the Library

Friends of the University Library, with their own individual interests normally to the fore, are brought into the Library's orbit because of some strong but secondary relationship with

books. By joining an organization they are predisposed toward interest in its work, but they are nevertheless easily brought into actual participation. The chief problem of the organization of Friends is therefore that of active engagement.

In the three years since its formation (in September 1956), two outstanding research collections and other important materials have been acquired in the name of the Friends. Without this support these great additions could not have been made, but the work and cost have been borne by too few individuals. Additional "friends of learning" must be found to extend this base of assistance if the University is to reach the position in Canada it is even now expected to maintain.

Membership in the Friends is open to all who have bookish interests and pay the annual fee of "five dollars upward" (deductible from income tax). Occasional meetings and publications, and appointments to working committees, offer opportunity for direct participation. For a list of the Council of Friends, see Appendix G.)

The Senate Library Committee

The Senate Library Committee occupies a key position among University bodies. Provided for in the University Act, it represents all of the Faculties and is responsible through the Librarian for library service to the University. Its concern is long-range and University-wide, not forgetting the present.

The Committee met three times during the year, under the chairmanship of Dr. Ian McT. Cowan, to discuss the Librarian's annual report and to forward recommendations concerning it to the Senate; to review the Library building plan; to hear reports upon the proposed College Library and subject Divisions; to study the proposal submitted to it by the Senate concerning the establishment of a School of Librarianship at the University; to discuss a statement from the Faculty Council regarding noise in the Library; to consider the proposed inclusion of Biomedical Library facilities in plans for the new Faculty of Medicine buildings; to spend the Committee Fund upon research materials; to allocate book funds to Departments; and to deliberate upon many other matters affecting the Library's program.

The School of Librarianship

A professional School of Librarianship, to prepare a selected group of university graduates for service in public, university, school, and special libraries, has been under active consideration at the University for a number of years. Based upon a sound undergraduate program of general or specialized studies, it would offer work toward the degrees of B. L. S. (Bachelor of Librarianship) and M. L. S. and provide courses for teacher-librarians in the College of Education. Progress has been made toward these ends in 1957/58.

The proposal, referred by Senate to the Library Committee, was returned with a favorable recommendation, suggesting that it be presented to the Faculties concerned for consideration. The Faculty of Arts subsequently gave its approval in principle, prescribing that the curriculum be presented to the Faculty, after which the School would be administered as are others in the University. In September 1959 the recommendation was again to go to the Senate and the Board of Governors.

If the School should be authorized during the fiscal year 1960/61, first steps towards its establishment would be taken in the fall of 1960, with its formal opening in September 1961.

Recommendations

Library development must pursue a well plotted course or it will soon describe an orbit which is not related to campus needs. An annual report should recommend, therefore, as well as review.

(I) The University of British Columbia Library, with limited resources (see column 1, table below) to support the growing program of instruction and research, should develop its collections more rapidly through an increased appropriation for the purchase of journals and books.

Adding \$100,000 a year to the total book fund would provide for the same growth rate as the universities of Washington (Seattle), Southern Illinois, and Duke. We should still lag considerably behind such institutions as Kansas, Florida, Missouri, Ohio State, and Wisconsin, and far behind Indiana, Texas, Cornell, and UCLA.

The following table, arranged in ascending order of total book stock, shows comparable expenditures upon the collections (col. 3) and annual growth in numbers of volumes (col. 2). These libraries, all of good repute (but not including the very greatest), show the pattern we must surely follow.

Quantity--of students, dollars, staff, and books-- is a concept we cannot overlook. One quantity often requires another to match or offset it, and goals are therefore often expressed in numerical terms:

Comparable Statistics (1957/58) for a Group of
University Libraries

<u>University</u>	(1) <u>Size of Collection</u>	(2) <u>Added Yearly</u>	(3) <u>Books., Per. & Binding</u>
British Columbia	387,541	30,258	\$190,497
So. Illinois	306,623	38,570	281,632
Wayne	630,527	42,460	254,965
Louisiana State	749,826	34,907	248,815
Kansas	782,652	50,567	331,317
Florida	788,731	39,335	316,590
Missouri	811,922	48,777	354,982
North Carolina	935,014	40,127	220,283
Iowa	959,934	31,889	221,417
Washington (Seattle)	971,935	45,251	296,381
Indiana	1,188,877	-	419,956
Texas	1,248,265	42,154	362,764
Ohio State	1,252,819	57,856	327,820
Wisconsin	1,276,217	49,456	321,514
California (L.A.)	1,301,075	75,265	474,054
Northwestern	1,322,040	57,783	243,710
Duke	1,343,768	53,860	250,105
Toronto	1,399,066	45,831	182,272
Pennsylvania	1,570,000	41,587	275,384
Cornell	1,967,599	79,872	361,724
Chicago	1,988,700	49,829	242,299

(II) Non-University funds for the acquisition of library materials should be actively sought from outside sources, preferably upon an annual basis. Grants may be ear-marked for special subject areas or be given uncommitted, for use as needs require or opportunities to acquire materials occur.

Publications in most of the sciences are becoming extraordinarily expensive, particularly if older materials and back files are concerned. In the life sciences, for example, reports of scientific expeditions and the major taxonomic works involve the expenditure of many thousands of dollars; and in the pure and applied sciences expensive new revisions of basic works and long journal files are always sought. Advanced work in the humanities and social

sciences is still virtually impossible in many fields without the purchase of scores of costly sets and thousands of basic studies and texts.

Several subject fields have already been "brought in" by this means, to undergraduate or graduate level, notably: Slavonic Studies, Asian Studies, Canadian Studies (including French Canada), Forestry, Fisheries, Fine Arts, English and French languages and literature.

(III) Great advantages in time can often be gained by acquiring collections in toto which have been laboriously brought together by other people. It is recommended that this practice, followed this year in securing the Murray and P'u-pan collections, be actively continued.

Members of the faculty and Friends of the Library should be alert to locate and obtain by gift or purchase research collections in fields of University interest.

(IV) A greater concern for Library development on the part of the Faculty Association, academic departments, individual faculty members, and campus groups would markedly accelerate the growth of the Library, and this interest should be strongly encouraged.

Many persons tend to regard the resources of this Library as static in relation to their own research and see travel to other institutions as the single means of pursuing their serious work. Recent developments (in Slavonic, Asian, and Canadian Studies, for example) show this is not necessarily the case. Whole-hearted participation in library development is also sometimes held back by self-centered Departmental programs. In meetings of the Faculty Association in recent years the Library has hardly been mentioned, and the current brief dealing with major University problems uses the word "Library" only in the context of "travel to," in relation to proposed study leave.

It is recommended that a study of the resources of university libraries in Canada be made, looking toward the development of facilities for graduate studies on a national scale and the production of an adequate number of university teachers and research staff to meet the nation's need.

The National Council of Canadian Universities and Colleges has authorized the establishment of a committee to discuss such a proposed study. The Committee on Scientific Information of the National Research Council has also demonstrated an active concern over the holdings of scientific journals in regional research centers. The interest of this University (expressed, perhaps, through these organizations, the Canadian Association of University Teachers, and other national scientific and professional associations) would create a greater sense of urgency for this basic task.

With the establishment of the College Library in the fall of 1960, providing a separate collection of books chosen for students in their first two years, it is recommended that instruction in 100 and 200 courses be planned with the full use of these facilities in mind.

The association of faculty, Library, and Bookstore in an effort to meet fully and speedily the needs of several thousand beginning students seems imperative. The use of paperbacks (in packets for specific courses) and anthologies for required reading assignments as far as possible, and well planned library collections for broad reading, essay writing, and individual studies will give students greater freedom and opportunity to take part in their own education.

(VII) "Divisional" reading rooms for the Humanities, Social Sciences, Sciences, and the existing Biomedical and Fine Arts libraries will offer improved access to library

materials in these areas; and a Division of Special Collections will form a center for graduate research in humanistic and social studies. The potential for library use by more advanced students which will arise from these changes should be carefully studied.

(VIII) Since the University cannot thrive unless the best procurable staff are responsible for library development, the same favorable attention must be given to the salaries of librarians as to any other University group.

We cannot realize one day our ambition to have a major university library if we choose to "fudge along" (to use a Shavian phrase) with the remuneration of professional librarians.

Report Upon Library Divisions

The year's work of the Library Divisions is the sum of Library services to the University. Its nature, variety, quality, and amount can be only suggested in this brief report.

Reference Division

Information lies buried in an enormous variety of sources, and reference librarians specialize in procedures for sorting it out. By the use of method, related knowledge, and imagination, they bring together from this and other libraries material bearing upon specific problems.

The Division acquired during the year 56,721 items with which to supplement the main book collection, of which 49,896 were publications of governments and official bodies, 5,013 were pamphlets and university calendars, and 1,818 were maps (29% above last year's 43,746 documents, 3,950 pamphlets and calendars, and 2,516 maps). Publications relating to atomic energy from the U. S., Great Britain, and Australia were for the first time received on a depository basis, and after some years of inquiry a similar arrangement was concluded for the published material of the Council of Europe. Selected publications from Fiji and India began to be received, obtained with the assistance of traveling faculty. Briefs were secured from several B. C. Royal Commissions.

Of 29,247 questions answered (25,783 in 1957/58), 8,651 were by telephone (7,727), half from off-campus sources. Thirteen bibliographies were compiled for course use, and several others were brought up to date. Forty-four displays were mounted in Library cases.

A total of 156 lectures were given by the staff, mainly instructing Freshmen in Library use, but including talks to classes in architecture, planning, music, economics, agriculture, education, and engineering. Following last summer's experiments, colored slides depicting library materials and services were substituted for a series of class assignments, with considerable success. The rapid increase in the number of sections of 1st year English from year to year (from 48 to 65 to 80) may bring an end to this long-time program of instruction because of insufficient staff to carry it on.

Interlibrary loans, under the supervision of Miss Marion Searle during the year, totaled 2,070 items lent (1,532) and 571 borrowed (648), a 35% increase in loans and a 13.4% reduction in materials borrowed for local use. (See Appendix D.)

The annual Publications of Faculty and Staff was prepared, this year's edition containing 524 distinct entries (50 pages), compared with last year's 434 (and 40 pages).

The Fine Arts Room, headed by Miss Melva Dwyer, added a full-time Library Assistant to the staff, thereby permitting an extension of service hours from 49 1/2 to 54 1/2 a week. Loans jumped to 14,247 (from 12,977) and summer use was very heavy; in 1955/56 the total was 5,866. The Howay-Reid collection of Canadiana, under Miss Betty Vogel, assisted by Mrs. Barbara McAlpine, served an increasing number of users: faculty, master's and doctoral candidates, writers, and other students. Many additions to the collection were made, and the processing of pamphlets, photographs, and manuscripts continued. In the Map Room, Mrs. Anne Brearley, assisted by Miss Gillian Flew, added 1,815 maps from many parts of the world and guided students in their use.

The heavy day-to-day pressure of duties leaves little time for planning and development, at a time when consideration and thought are perhaps most needed. Fortunately, Miss Anne M. Smith, Assistant Librarian and Head of the Division, was enabled by a Canada Council grant to spend three months visiting libraries in the United States, chiefly studying the problems likely to be faced by the proposed subject Divisions. Miss Joan O'Rourke ably served as Acting Head in her absence, with loyal staff support.

Acquisitions Divisions

How to acquire the right books, secure and pay for them quickly, in sufficient numbers, and without unwanted duplication and within the funds provided, is the difficult assignment of this department.

Expenditures for books and periodicals this year totaled \$186,318.38, an increase of 11.5% over last year's amount (\$167,003.94). Of this, \$12,000 was in partial payment for the Murray collection, a single transaction. (For more detailed information, see Appendix A and page 5 of this report.

There were 15,493 orders placed (compared with 17,360 in 1957/58); the reduction from last year's total was caused in part by the exhaustion of the main book fund before the end of the fiscal year and by a special block purchase of College Library material; 2,197 orders were placed from used-book catalogs. The Division handled 25,233 volumes, of which 21,213 were forwarded to Cataloging, the remainder receiving special treatment.

Gifts totaled 3,914 volumes (2,991), and the number handled in the Division came to 8,909 (3,114). Under Mr. Stephen Johnson the backlog of accumulated gifts has been virtually eliminated, and the program of circulating duplicate lists to libraries throughout the world has brought good results both in books sent and acquired. Relations with the British National Book Centre have been particularly profitable. Official exchanges of new publications with Japan and mainland China were inaugurated.

With procedures being continually under study, a new requisition form was designed, better adapted to the control of bibliographic checking by non-professional staff.

The Division manages, on the side, the Library Delivery Service for faculty, and 12,471 pieces were sent out (11,397) and a similar number received. With new buildings rising, the 40 established delivery points may tend to increase, which may

require more delivery time and a considerably increased cost. The shipping of books for in-service courses to various parts of the Province for the College of Education also fell to this Division during the year.

The Division is now faced with the enormous task of acquiring most of the 40,000 volumes required for the College Library before the opening of the new wing in the fall of 1960. It must also begin to process the Thomas Murray and P'u-pan collections and adjust itself to a normally increased budget for the coming year.

Of a total of 13 staff members, there were 6 resignations within the year and an exchange of one member with another Division. Miss Eleanor Mercer, with Miss Priscilla Scott as chief assistant until July 1, 1959, afterwards Mr. George Turner, and other staff, carried through in a very creditable way the ever increasing acquisitions program.

Loan Division

Loan Division is the student's most direct means of contact with the world of books. Viewed from behind the public desk, the responsibility of the staff is both for loan and return in order that the book stock may be constantly available for redistribution

Over 266,000 loans were made at the Loan and Reserve desks during the year:

	<u>1958/59</u>	<u>1-year Increase</u>	<u>1957/58</u>	<u>2-year Increase</u>	<u>1956/57</u>
Loan Desk	160,822	9%	147,522	29%	124,407
Reserve Room	<u>105,609</u>	8%	<u>97,668</u>	17%	<u>90,023</u>
Total	266,431	8%	245,190	25.4%	200,063

Comparing the biennial increase of 25% in the number of loans with the accompanying 29% growth of the student body shows what the problem will be to keep abreast of University expansion. Larger classes clamoring for the same list of books, more students in the bookstacks misplacing volumes on the shelves, and absenteeism among a growing body of part-time student assistants increase the problems of operation.

A greater emphasis upon the training of student assistants and the definition of responsibility for them and the full-time staff have paid off well, although turnover of staff in both categories is a serious handicap. It has been necessary to substitute repeated shelf-reading in much used areas of the book collection for the annual inventory, and most of the bookstacks have been kept in good working order. (A partial check showed 734 volumes missing at the end of August.) A shift of all books on two stack levels was necessary to accommodate new books received.

The purchase of duplicate copies of a group of volumes in the Reserve Book collection (some for the College Library) has permitted many titles to be returned to the general bookstacks. A study of materials placed on reserve indicates (1) that many are not in sufficient demand to warrant this restricted treatment (and they have been removed), and (2) a wider range of titles for certain courses would make the assignments more productive.

A system was devised to provide a stock of books for evening students, and larger numbers of books must be placed in this "due at 5:00 p.m." category if students and courses increase. Collections in some Departmental reading rooms must be placed under more responsible control if these depositories are to be continued. And a scheme for collecting fines when overdue books are returned (charging an excise for later payment) may help reduce the heavy cost of billing; 3,228 bills were sent during the year.

Miss Mabel Lanning, with the help of Mr. Inglis Bell, First Assistant, and the staff, have come through a very busy year with a more efficient organization and a new record of accomplishment. Mr. Leonard Williams, Stack Attendant, has managed the bookstack well, and most of the staff have served with essential friendliness and requisite courage at the bookstack entry.

Serials Division

The backbone of a university library is its periodical files, without which it could not stand alone as a research collection. New titles and back volumes must be continually added to provide adequate strength for academic growth

The total number of periodical titles received is 4,965 (4,750 in 1957/58), with 227 new subscriptions placed during the year (227). Of these, 3,662 are received by paid subscription, 1,194 by gift, and 109 by exchange. The new titles (see list, Appendix B) range over a wide subject area, but they include only the most pressing wants expressed by members of faculty. Volumes of journals added totaled 10,913 (11,710). A list of the most notable back files acquired is found as Appendix C-1

Loans of unbound issues totaled 10,411, compared with 12,532 last year. This was the second year in which current numbers have been open to all those have stack access (3d and 4th year students and upward). This has brought an unknown amount of unrecorded use in the bookstacks, but the loss of journal issues is heavy and expensive, creating a serious handicap in binding and uninterrupted use.

The receipt of journals in several scientific fields was reviewed during the year while helping to prepare a basic list of journals for a committee of the National Research Council. Our holdings of these fundamental journals is fairly complete, but we do not rate so well for the less common titles and for those published in languages other than English, French, and German. There are serious gaps in our list of Russian publications, both in the original language and in English translation.

With quantity, the problems of binding increase. While most library material must sometime be bound, it is difficult to take it out of circulation long enough to put it through the binding process. Journals, reference works, theses, "rebinds", and paperbacks all present their particular problems of timing, and these are as serious as those of handling and

cost. In seven years the Bindery's output has increased nearly 300% (from 3,008 volumes to 11,099 in full binding), but backlogs of current material are developing, and large numbers of books need to be rebound. Increased binding facilities may soon be required.

Mr. Roland Lanning has made a unique contribution in developing the University's journal collections and has accumulated invaluable experience in the doing. He is ably assisted in the administration of the Division by Mr. Basil Stuart-Stubbs, First Assistant, and has the cooperative support of his staff.

University Library Bindery. During the fiscal year 11,099 volumes in full binding were processed (10,392) and 919 in storage covers (1,139). With a fully experienced Bindery staff, two new pieces of basic equipment, and continuing improvements in operational methods, the output has again increased. An expansion of work space at the end of the report year reduces for a time one of the severe limitations upon the amount of material which can be handled. Simplified methods for processing paperbacks are being studied, and forthcoming alterations in the Library building will eliminate the long haul now required between the Bindery and Preparation units.

Great credit is given to Mr. Percy Fryer who heads an ever more efficient and productive binding department, and to Mr. Percy Fryer, Jr., whose ability and imagination have on several occasions effected important improvements and stayed serious interruptions. Two journeywomen binders and an apprentice are the other components of this important Library division.

Cataloging Division

Catalogers assemble the components of the book collection into a functioning library so that it can be put to work by an unpredictable variety of users.

In 1958/59 the Division cataloged and classified 24,625 volumes of books (22,659) and 11,787 of serials (12,231), a total production of 36,412 (35,374). The backlog of unprocessed materials, which has in the past held as many as 5,000 volumes, and during this year reached 2,500, has been reduced to zero.

As the result of much planning and experimentation during the last two years, great progress has been made in overhauling and simplifying procedures. By this means, not only has the backlog of uncataloged materials been eliminated, but no accumulation of books awaiting the ordering of Library of Congress cards has been allowed to form, the piling up of materials awaiting the production of catalog cards has been kept to a minimum, and the Slavic backlog has disappeared. Books in the School of Architecture reading room have been processed and entered in the Library's main catalog, a beginning has been made on materials in Chemical Engineering, and hundreds of musical scores have been recataloged. A careful division of labor, with specific assignments for individuals and groups of staff members, has been carried out.

Backlogs are possible at many stages in the cataloging process, and they can be held in check only by careful organization, eternal vigilance, and the conscientious services of experienced staff. With materials pouring in by single volumes and by thousands, an adequate organization is of prime importance at this point. The Thomas Murray and P'u-pan collections are of course yet largely untouched.

Alert and vigorous leadership has been given by Mrs. Turner in bringing about the changes and accomplishments herein noted. The senior professional staff, Mr. G. G. Turner (who transferred to Acquisitions in July), Miss Geraldine Dobbin, and Mrs. Margaret Little, with other professional and non-professional staff, have given their full support. Two of the non-professional staff received well earned promotions.

Biomedical Library

The Biological Sciences and Medicine comprise the major area of knowledge over which the services of the Biomedical Library will extend. Concerned chiefly with developing library facilities for the Faculty of Medicine since its origin in 1950, it now operates through two outlets: on the campus and, at the Vancouver General Hospital, through the Biomedical Library Branch.

Following the general campus pattern, there was no let-up of use during the recent summer period, and statistics show a heavy increase throughout the entire year. Without a full complement of staff during the holiday period, and with resignations causing an added drain, it was impossible to keep schedules up to date.

Recorded use of materials at the Branch (where it can be readily gauged) was 14,954 (compared with 10,776 last year), and there were 2,885 loans during the three summer months of May, June, July (1,900 in 1957/58). The increase probably derived from changing teaching methods for the lower years, expanding research programs, and a growing interest in post-graduate education. Interlibrary loans numbered 375 items lent (261) and 74 borrowed (79). Tabulated use of journals, by date of publication (totaling 8,153 volumes borrowed at the Branch, chiefly clinical in nature), shows that 28% of use was of material published in the current year (25%), 64% of volumes were dated 1948-1958 (68%), 5.5% were issued from 1938 to 1948 (5%), and 2% were for all previous years (2%). There was a great upswing in the number of reference questions asked, 4,997 (1,981). Bibliographical lectures numbered 5 (1 in 1st year Medicine, 2 in Nursing, 1 in Pharmacology, 1 in Physiology).

Additions to the collection in the field of Medicine totaled 2,773 (3,050), bringing this section up to 35,715 (32,942). Thirty new journal titles were added and one cancelled. Titles in the Medical field total 1,292, with another 580 relevant titles in the Biological Sciences.

Twelve lists of acquisitions were issued (8 , totaling 61 pages (32)).

Both the Biomedical Librarian and University Librarian continued to work with a committee of the College of Physicians and Surgeons toward the establishment of a Provincial Medical Library Service, supported by the College and available to all of its members. It was coming close to realization at the end of the academic year.

Two special committees provide guidance and support for the Biomedical Library, one representing the Faculty of Medicine (Dr. Sydney Friedman, chairman, Dr. William Gibson, and Dr. J. W. Whitelaw), and one a President's Committee on the Biomedical Branch Library, representing the organizations which contribute to the support of the Branch (Dr. Whitelaw, chairman). As part of the University Library, the Biomedical Library also comes under the Senate Library Committee.

Miss Doreen Fraser, Biomedical Librarian, continues to work closely with all local medical library groups, and takes an active part in the Pacific northwest, Canadian, and American organizations. Her staff of librarians, Miss Maria Laddy and Miss Helen Allan, and the non-professional members have given an excellent account of themselves under difficult conditions.

The Extension Library

For twenty-two years the University Library and the Department of Extension have provided an extension library service to persons in the province without "adequate" local facilities. During that time the Extension Library has kept a continuing supply of books in the hands of many avid readers and provided materials needed for Extension and correspondence courses.

After many years in temporary quarters, the Extension Library has at last moved into space specifically designed for its use. Close to the general book collection, to the processing departments, and to shipping facilities, with ample shelving and work areas, and with a door opening upon campus traffic lanes, service should be more pleasant to give and more effective.

During the year there was an increase from 465 to 502 general borrowers and from 142 to 152 in the drama group. General loans totaled 13,954 (13,555), plays, 5,621 (5,678), and books for correspondence courses, 1,703 (1,364). In the last category, the most active were English 200 (841 volumes), Education 520 (404), English 429 (146), and History 304 (100). There were 2,390 volumes borrowed for the Extension Library service from the main University Library.

"Your books have kept me from becoming completely 'bushed,'" wrote a borrower from an interior ranch. "The availability of your service has never meant so much to me as it has since living in Coal Harbour ... a very small place, in the winter only about 50 people ..." From the west coast of Vancouver Island: "I think the Library is wonderful, especially to an old and rather lonely woman." "I regret that because of failing eye sight I must withdraw from your family of readers. I would like to take this opportunity to thank you for unfailing kindness ... over so long a period." And: "The Government have begun sending me cheques for fifty-five dollars, so I am celebrating by enclosing five dollars ... towards a new book for the library which means so much to me."

Miss Edith Stewart, Extension Librarian since 1948, is very widely and warmly regarded by an important if not always influential group of British Columbia citizens. She and her assistant form one of the firmest links the University has with the province it serves.

The Curriculum Laboratory

The Curriculum Laboratory is not a library in the normal sense but a collection of prescribed and supplementary text books and related material, maintained for the benefit of student teachers enrolled in the College of Education. Opened in the fall of 1956, at the time of the establishment of the College, it has existed in crowded temporary quarters and last year served an enrollment of 1,445 students.

Loans during the year totaled 34,567 (31,495 the previous year) from a collection of 8,774 volumes; 1,521 items were added during the period. Losses have been heavy, 534 volumes not having been returned (574 in 1957/58). A picture collection of 13,000 classified and mounted items has been built up, with some 5,000 additional pictures being mounted but unlabeled; most of the work of preparation has been done during the year just completed.

Although students crowd into the laboratory throughout the year, most of the loans are made just prior to the "practicum" periods, so that peak loads characterize the service given, when thousands of volumes are borrowed or returned within a few days time. Mrs. Anneke Bertsch managed the service with strength and imagination throughout the year, with one full-time assistant and part-time student aids. It has not been possible to fill the position of professional librarian which has been available for two years. Mr. Walter Lanning, of the College of Education, has worked as liaison between the College and Library with interest and understanding.

In Acknowledgment

Forty-four years provide the background for this annual survey, and in that eventful period many persons and events have made the Library what it is. The range of acknowledgments is therefore both wide and long.

Heading the list for this year just passed is Dr. Samuel Rothstein (whose manifold accomplishments unfortunately go unmentioned elsewhere in this report) and Miss Anne Smith, followed by the Division Heads and members of staff named in the attached list. President MacKenzie, the Finance Committee, the Board of Governors, and the departments of administration have never failed in their support when needed. The Senate Library Committee and many individual faculty members have given time and thought to developing the collections and service.

Through the Friends of the Library great gains have been made, particularly because of the interest of Mr. Walter C. Koerner, Chairman of the Committee on Ways and Means. To Dr. Wallace Wilson, past-President, Mr. Kenneth Caple, President of the Friends, and to other Council members warm appreciation is expressed. The special contributions of many individuals and groups have been acknowledged elsewhere in this report.

The Senate is the University's highest academic authority and the guardian of its standards, and it must, therefore, be the Library's foremost advocate and defender. This support has never yet failed.

Neal Harlow

University Librarian

APPENDIX E

LIBRARY STAFF AS OF AUGUST 31, 1959

ADMINISTRATION

Harlow, Neal	University Librarian	Aug. 1951-
Rothstein, Samuel	Assistant University Librarian	Sept. 1947-
Maclean, Hilda	Secretary	Aug. 1959-
Traff, Vera	Clerk II	Dec. 1956-

REFERENCE DIVISION

Smith, Anne M.	Assistant University Librarian and Head of Reference	Sept. 1930-
O'Rourke, Joan	Librarian III	July 1948-
Brearley, Mrs. Anne	Librarian II	Aug. 1956-
Dwyer, Melva	Librarian II	July 1953-
Dore, Mrs. Nancy	Librarian I	Sept. 1956-
Searle, Marion	Librarian I	July 1958-
Selth, Geoffrey	Librarian I	June 1959-
Vogel, Betty	Librarian I	Sept. 1956-
Campbell, Edith	Library Assistant	May, 1958-
Thomas, Diana	Library Assistant	June 1959-
Fukuyama, Mrs. Margaret	Clerk II	Aug. 1959-
Derewenko, Helen	Clerk I	May 1959-

CATALOGUE DIVISION

Turner, Mrs. Marjorie	Head	Aug. 1951-
Dobbin, Geraldine	Librarian II	June 1956-
Little, Mrs. Margaret	Librarian II	Sept. 1956-
Scott, Priscilla	Librarian II	July 1953-
Chamberlain, Josephine	Librarian I	Aug. 1957-
Forsyth, Marianne	Librarian I	July 1958-
Macaree, Mrs. Mary	Library Assistant	July 1959-
Pike, Mary	Library Assistant	Mar. 1958-
Weinberg, Mrs. Florence	Library Assistant	June 1956-
Frederick, Mrs. Rita	Clerk II	May 1958-
Creemer, Gloria	Clerk I	July 1958-
DeBionne, Jacqueline	Clerk I	Aug. 1959-
Hahn, Gloria	Clerk I	Dec. 1956-
Pump, Judy	Clerk I	July 1959-
Rose, Mrs. Bessie	Clerk I	Jan. 1957-

CIRCULATION DIVISION

Lanning, Mabel M.	Head	Sept. 1926-
Bell, Inglis	Librarian III	June 1952-
Hodge, Mrs. Patricia	Library Assistant	June 1959-
Lane, Mrs. Josephine	Library Assistant	Sept. 1958-
Russell, Eleanor	Library Assistant	May 1959-
Williams Leonard	Stackroom Attendant	Mar. 1958-
Rolfe, Dorothy	Clerk II	Sept. 1944-
Cartwright, Mrs. Edith	Clerk I	Jan. 1959-
Choudhury, Mrs. Margaret	Clerk I	Apr. 1956-
Kuipers, Mrs. Marian	Clerk I	Oct. 1956-
Ramsey, Lois	Clerk I	Apr. 1956-
Wheatley, Carolyn	Clerk I	July 1959-
Whitten, Mrs. Janet	Clerk I	July 1959-

ACQUISITIONS DIVISION

Mercer, Eleanor B.	Head	Oct. 1938-
Turner, George	Librarian II	June 1956-
Johnson, Stephen	Librarian I	July 1957-
Sorensen, Mrs. Louise	Library Assistant	July 1959-
Stein, Carole	Library Assistant	June 1959-
Woodward, Mrs. Emily	Library Assistant	July 1957-
Bangert, Adolf	Clerk II	Feb. 1959-
Esselmann, Mrs. Alexandra	Clerk II	May 1958-
Bottger, Hermine	Clerk I	Aug. 1952-
Forsythe, Mrs. Yvonne	Clerk I	July 1948-
Ross, Mrs. Wilma	Clerk I	Jan. 1959-
Spence, Joyce	Clerk I	Sept. 1952-

SERIALS DIVISION

Lanning, Roland J.	Head	Sept. 1926-
Stuart-Stubbs, Basil	Librarian III	May 1956-
Kovacs, Audrey	Library Assistant	Sept. 1958-
Leslie, Peter	Library Assistant	Aug. 1959-
Lougheed, Joan	Library Assistant	Oct. 1954-
Piercy, Margaret	Library Assistant	June 1957-
Gutteridge, Mrs. May	Clerk II	July 1959-

Bindery

Fryer, Percy	Foreman	Dec. 1951-
Fryer, Percy Jr.	Journeyman	Apr. 1952-
Brewer, Mrs. Elizabeth	Journeywoman	Feb. 1952-
Lynch, Mrs. Isobel	Journeywoman	Oct. 1953-
Harrison, Roger	Apprentice	Mar. 1957-

Appendix E (cont.)

BIOMEDICAL LIBRARY

Fraser, M. Doreen E.	Head	July 1947-
Allan, Helen	Librarian I	Sept. 1958-
Laddy, Maria	Librarian I	Aug. 1958-
Barner, Lynn	Library Assistant	June 1959-
Read, Mrs. Christina	Library Assistant	Aug. 1959-
Dournovo, Tanya	Stenographer II	July 1959-

EXTENSION LIBRARY

Stewart, Edith	Extension Librarian	July 1948-
Doby-Salamon, Mrs. Czilla	Stenographer II	July 1959-

CURRICULUM LABORATORY

Bertsch, Mrs. Anneke	Senior Clerk	July 1957-
Goldenberg, Mrs. Heather	Library Assistant	Feb. 1959-

Appendix E (cont.)

RESIGNATIONS DURING PERIOD 1 SEPT. 1958 - 31 AUG. 1959ADMINISTRATION

Fugler, Ethel	Secretary	June 1947-July 1959

Terms of Reference:

The Library Committee shall advise and assist the Librarian in:

Formulating a library policy in relation to the development of resources for instruction and research.

Advising in the allocation of book funds to the fields of instruction and research.

Developing a general program of library service for all the interests of the University.

Keeping the Librarian informed concerning the library needs of instructional and research staffs, and assisting the Librarian in interpreting the Library to the University.

APPENDIX H

The Friends of the Library of the University of British Columbia

Purpose

To develop the library resources of the University and to provide opportunity for persons interested in the University Library to keep informed about the growth and needs and to express their own interests more effectively.

Council

The following persons are members of the Council of the Friends of the Library:

Dr. Wallace Wilson	Mr. Kenneth Caple
Dr. Ethel Wilson	Dr. W. Kaye Lamb
Mr. Leon J. Ladner, Q.C.	Dr. Luther Evans
Mr. Aubrey Roberts	Dr. Leslie Dunlap
Dr. Ethlyn Trapp	Mr. Lester McLennan
Dr. H. R. MacMillan	Mr. Willard E. Ireland
Dr. Harold S. Foley	Mr. Peter Grossman
Mr. J. V. Clyne	Dr. N. A. M. MacKenzie
Dr. Reginald Tupper, Q.C.	Dean Geoffrey Andrew
Mrs. Frank Ross	Mr. Arthur Sager
Dr. A. E. Grauer	Dr. Ian McT. Cowan
Mr. Walter C. Koerner	Dean Gordon Shrum
Hon. Mr. Justice J. O. Wilson	Dean F. H. Soward
Mrs. E. T. Rogers	Dean S. N. F. Chant
General Sir Ouvry L. Roberts	Mr. Neal Harlow
Mr. Leon J. Koerner	Dr. Samuel Rothstein

Mr. Kenneth Caple, President, Friends of the Library
Mr. Walter C. Koerner, Chairman, Ways and Means Committee
Mr. Neal Harlow, Secretary-Treasurer

Organization

The Council will be the governing body of the organization. The executive of the Council will consist of a President, Vice-President, Secretary-Treasurer, and the President of the University.

The membership fee will be five dollars and upward a year, the funds to be used for the purchase of Library materials. Special meetings and publications for the group will be provided, and reports upon needs and accomplishments. Other activities will be determined by the advice of the Council.
