Service in War Memorial Gym honors Walter Gage

Members of the University community and other friends of Dr. Walter Gage gathered in UBC’s War Memorial Gymnasium yesterday (Tuesday, Oct. 13) for a memorial service for the man who was “Mr. UBC” to generations of students and colleagues.

The death of Dr. Gage from cancer on Oct. 3 at the age of 73 ended a 57-year association with UBC that began in 1921 when he entered UBC as a freshman student.

All 5:30 and 6:30 p.m. classes and labs were cancelled to enable students and faculty members to attend Tuesday’s memorial service.

Speakers at the service included President Douglas Kenny; two former chancellors of the University, Dr. Allan McCallum and Dr. Nathan Nezett; Professor Emeritus of English William Robinson; and Dr. Gage’s partner in his teaching years, Dr. John Aldridge, a professor of the Engineering Undergraduate Society and the Alma Mater Society during Dr. Gage’s tenure as UBC’s president from 1969 to 1979.

UBC’s present chancellor, Hon. J. V. Gwyer, read the 23rd Psalm at the memorial service.

UBC alumni and other friends of the University are advised that memorial contributions in tribute to Dr. Gage may be directed to the UBC Alumni Association.

Before his death, Dr. Gage indicated an interest in supporting the Crane Memorial Library for the blind, where he spent many hours after his retirement as president, the UBC Press, and “student projects with academic components involving music and initiative.”

Gable said the money would be made payable to the University of British Columbia, with an indication as to whether they should be directed to the “Crane Library,” “UBC Press,” or “Student projects.”

The Student Representative Assembly last week voted to give $500 to the Crane Library in honor of Dr. Gage.

A special four-page insert on the career of Walter Gage begins on Page 4 of this edition of UBC Reports.

UBCThunders ready to play Clanmen Nov. 25

UBC Thunderbirds are ready to play Simon Fraser University Clanmen in a football game at Empire Stadium Nov. 25, provided the pro-
ceds go to charity.

UBC President Douglas Kenny has announced. He said a monetary dispute over rules for a return engagement in 1979 was a secondary problem that should be resolved later.

Both universities have agreed that if they meet this year the game will be under Canadian rules. SFU has in-
sisted that this year’s loser choose the rules — Canadian or American — for 1979.

“Frankly,” Dr. Kenny said, “I think the important thing right now is that we agree to play on Nov. 25 and that the big winner of the game should be charity.

President Kenny said the proposal he was endorsing had come from the UBC men’s athletic committee, “which has been working for months toward a full restitution of UBC-SFU sports rivalry.”

“I’m sure that Simon Fraser Univer-
sity will agree with a charitable cause,” said President Kenny, “and I am sure they must agree that letting an ‘if’ and, or, maybe’ dispute over the 1979 game keep us from playing this year is just plain silly.

“In any event, whatever it says it does seem unlikely that any Canadian university, fund-raising Canadian tax-
payers, would elect to play another Canadian university in Canada, under anything but Canadian rules.

“However, if the problem is real and I must say I don’t see it as a prob-
lem — surely it can be resolved later.”

A resumption of the crosstown rivalry (UBC last played SFU in 1971) became possible earlier this year when

Research grant increase may only be temporary

Awards for research at UBC in the last fiscal year totalled $21,158,535, an increase of 24 per cent over the 1976-77 fiscal year. UBC’s research administrator says in his annual report to the Board of Governors.

The increase, says Dr. Richard Spratley, is the result of a 10 per cent increase in federal government support and a 48 per cent increase in grants and contracts from non-government sources. For the first time in several years the increase was more than sufficient to account for the effects of inflation.

Dr. Spratley warns, however, that the 1977-78 figures may only be a short sunny break between storms.

The outlook midway through 1978-79, he says in his report, is not encouraging in the light of announced spending cuts by the federal govern-
ment. He said the cuts would not have a significant effect on research grants in the current fiscal year, which ends on March 51, 1979.

It appears, however, that all pro-
grams will be reduced in the next fiscal year and some programs such as the Special Research Grants Program of the Use of Drugs Directorate and Depart-
ment of Veterans Affairs travel grants have been eliminated entirely.

He said the announced general reductions in the budgets of several of Canada’s major granting councils, “Please turn to Page 7 See Research

MLAs here on Oct. 18

MLAs from all parties will spend an informal day on the UBC campus on Wednesday, Oct. 18.

The visit is the third in recent years organized by the University and the UBC Alumni Association to help MLAs keep in touch with university affairs.

MLAs will attend a number of special workshops presented by UBC experts on topics of immediate in-
terest. Each MLA will have lunch with students from his or her constituency in a UBC residence, and will tour the site of the acute care hospital now under construction as part of the ex-
ansion of UBC’s Faculty of Medicine.

After a tour of the various parts of the campus, they will have a working ses-
ion with UBC President Douglas Kenny, and end the day at a reception hosted by the Alumni Association.

New member of UBC’s Board of Governors is graduate Alan Eyre, president of the Vancouver automo-
tive firm of Duick on Broadway. He’s a former vice-president of UBC’s Alumni Association and was this year’s recipient of the UBC Alumni Association.”

UBC Fund of 1964-65, which raised money for construction of the UBC Campus Union and UBC Athletics.

MLA for the riding of UBC-Uvic, Mr. Eyre succeeds Dr. J. W. Scott, of the University of British Colum-
ica, who has resigned after serving on the Board since 1972.
Volunteer work seen as aid to academic program

Many of the students coming to her for career counselling indicated difficulty in finding opportunities to gain experience in their chosen fields. "It is important that students become aware of how they will fit into certain things, especially in the helping professions. They have to know whether they have what it takes to work with people. Problems are very difficult to get paying jobs in these areas, and volunteer work is a useful alternative. In addition to the personal satisfaction of making a contribution to the community, a volunteer experience is a reward of his volunteer work is almost a necessity if they are going to be accepted into certain fields," said Mr. MacSiurtain.

For Mr. MacSiurtain, part of the reason many volunteer agencies have tried to get students involved is that volunteer work than they give. "You can see the beauty and courage of the human spirit even at the worst crime, you get the sense that it is unbelievable. It is a wonderful experience." He said.

For Ms. Brown, said that although quite a number of students wanting volunteer experience plan to enter the helping professions, many want volunteer work to gain experience in their chosen fields. "It is very important for commerce students aiming at new skills in human relations to learn to work with others on projects," she said.

The opportunities are virtually unlimited, and they are all described in an advertisement in the Volunteer Data Bank bulletin board in the student services office in Ponderosa Annex F. The data bank was the idea of Cheryl Brown, a counsellor with student volunteer referral services. Many of the students coming to her for career counselling indicated difficulty in finding opportunities to gain experience in their chosen fields. "It is important that students become aware of how they will fit into certain things, especially in the helping professions. They have to know whether they have what it takes to work with people. Problems are very difficult to get paying jobs in these areas, and volunteer work is a useful alternative. In addition to the personal satisfaction of making a contribution to the community, a volunteer experience is a reward of his volunteer experience can give them an edge when they are job hunting."

Many of the student volunteers jobs with children and ill and handicapped people involving teaching math, music, art, writing or public speaking, providing help with public utilities and public relations. Many of these jobs require few skills, preferably in library science, to spend four hours a week in its small library, and with the B.C. Lung Association which needs volunteers to run a hot line, or in the assistance program to help people stop smoking.

An international agency wants help raising funds to care for orphaned and abandoned children around the world. "We have in Vancouver needs to people with show proof of experience," she said.

The end of the Age of Gage

The Age of Gage is over for the University of British Columbia.

The death of Dr. Walter H. Gage from cancer at the age of 73 on Tuesday, Oct. 3, in UBC's Health Service Hospital ended a 57-year association with the University, which began in 1921 when he enrolled as a freshman student at UBC, which was then housed in the Fairview Shacks on the grounds of the Vancouver General Hospital.

Even before he enrolled at UBC, Walter Gage knew he wanted to teach. He thought he might become a high-school teacher, and the thought of a career at the university level had never entered his mind.

He signed up, in his first year, for English, French, mathematics, chemistry and physics. He also decided to take a "distinction" in math and chemistry, which meant in those days that the student took extra lectures and covered additional work.

His academic work also brought Walter Gage into contact with some of UBC's early legendary figures: the late Daniel Buchanan, a math teacher in the Great Trek, the student protest of 1923 whose praise of Walter Gage's work reinforced his mind.

His spontaneous humor, which years later won him UBC's first Master Teacher award, boundless vitality, a sense of humor for mathematics which years later won him UBC's first Master Teacher award, boundless vitality, a sense of humor for mathematics, and ability to give meaning to philosophical discussions, and after winning a victory made mathematics an exciting and, yes, entertaining subject, soon overflowed into unstinted help of all kinds for the students, into registration and counseling, into guidance of extra-curricular activities; in fact, into a general catalytic action on the life of the College that took much of the load from a benign and appreciative Principal Percy Elliott.

The move back to UBC in 1933 meant, essentially, the transfer of that tremendous energy and those diverse gifts to a wider stage. Thousands throughout British Columbia and elsewhere have applauded the brilliant teaching and the administered. Even before he enrolled at UBC, Walter Gage knew he wanted to teach. He thought he might become a high-school teacher, and the thought of a career at the university level had never entered his mind.

The move back to UBC in 1933 meant, essentially, the transfer of that tremendous energy and those diverse gifts to a wider stage. Thousands throughout British Columbia and elsewhere have applauded the brilliant teaching and the administration.

In May, 1925, Walter Gage graduated with first-class honors in mathematics.

Already, the qualities for which he had been noted all his working life — his flair for mathematics and his spontaneous humor — were apparent. Here is the personal note about him that appeared in the student newspaper.

"Walter is a wizard at mathematics. He can do trigonometry backwards, geometry sideways and calculus upside down. When he is not juggling with incrementals and probabilities, he engages in philosophical discussions, and after winning a victory he celebrates — by playing the piano. Walter has original humor. It is abrupt, spontaneous and unexpected. Socially, he is reticent, a fact that probably accounts for his dazzling averages at examination times. In the future Walter hopes to be an authority on Einstein."

In the following academic year Walter Gage completed the requirements for the Master of Arts degree, again with first-class honors in all subjects and was promptly hired as a teaching assistant at a salary of $1,200. He also marked papers for two math professors during his university career. He was paid $15 a month in his final undergraduate year and $25 a month in his graduate year.

The move back to UBC in 1933 meant, essentially, the transfer of that tremendous energy and those diverse gifts to a wider stage. Thousands throughout British Columbia and elsewhere have applauded the brilliant teaching and the administration.
In May, 1975, the EUS organized a banquet for undergraduate students and engineering graduates of the Universities in honor of the late Walter Gage, one of the speakers on that occasion was Dr. Henry Gunning, dean emeritus of Applied Science, who had this to say about the guest of honor.

I would not have come to UBC if Walter had not been in its higher echelon of UBC administration. He helped me in many ways and one of them was this guest of honor, an active participant, the regular faculty dinner for the UBC executive, which did about 1954 in the hope that good food, friendly talk and some sage advice might help to keep the roof on the building. He seemed always to have an almost intuitive understanding of and sympathy for the aspirations and motivations of the undergraduate, even when the motivation led to activities of questionable merit.

During Walter Gage’s tenure at UBC I came to realize that the real worth of a professor must be judged in part at least on the impact that did not occur to him on campus, in this regard, give Walter Gage top marks for the following.

1. Lectured to less than the full class enrollment — making allowance for illness — generally in junior courses to the regular class swollen to near capacity by auditors.

2. Been temporarily unable to lecture because wired garbage cans filled with lumps of metal mysteriously rolled down the stairways in room 201 or 202.

3. Had paper bags of water, flour or soot explode near him on the sidewalk as he walked to his lecture room because the real worth of a professor must be judged in part at least on the impact that did not occur to him on campus, in this regard, give Walter Gage top marks for the following.

4. Been unable to leave his lecture room because minuscule advertisements for a locked cupboard, in a locked hall, in a locked building?

...Some of the happiest moments I've had were working with the Engineering Undergraduate Society and being associated with it. For some reason or other it seems that the engineers always elect someone to the Student Council who has an innocent look.. Big, round, innocent eyes... So if you go up and say, "Who has the keys to the office of the dean of Arts?" just see those big, innocent eyes staring at you. Nobody ever knows nothing.

Who stole the $500 watch?

"Well, we really don't know. Of course, we'll try to find out. I'm sure you're not interested in this.

Who took the Simon Fraser watch? Who got it out of a locked cupboard, in a locked room, in a locked hall, in a locked building?

"Well, you know, of course, we're not interested in this.

I think I can say that my association with the Engineering Undergraduate Society and with engineers has been a happy one... because, I've been associated with people who've had to work hard for their degrees... and afterwards have worked not only for themselves, which is reasonable, but..."

No one to take his place.

B.C. and Canada have lost one of their "most important and favorite native sons." President Douglas Kenny said in a statement following the death of Dr. Walter Gage on Oct. 3. "He will be remembered," the president said, "both for his wise counsel and his warm physical presence, which were manifest in his friendly smile and sense of humor, the arm thrown around the shoulder and the pat on the back."

"And in a larger sense, his 57-year association with UBC had a deep and lasting effect on this institution," President Kenny continued. "In addition to his qualities as a brilliant teacher and a tireless administrator, he will be remembered as a man of the highest integrity who was devoted to encouraging acts of kindness to students and colleagues whose word of welcome and candid smile we have all so long taken for granted and must now know only in memory."
Canteen, as the home of the original Frederic Wood Theatre.

Walter Gage was on the board of directors of the Vancouver Symphony Society for about 25 years and the following anecdote from W.K. Geyer, a 1936 graduate of Applied Science, illustrates his generosity and his concern to uplift cultural standards among engineers.

In an attempt to instil some culture in the engineering students, the Vancouver Symphony prospered by the tickets he gave to us. After the concert, we would be treated to a discussion of the program with Walter who, whenever possible, enlisted the critical help of Dr. (Garnet) Sedgewick, who shared Walter's hope that the "uncouth engineer" might be capable of absorbing some culture.

Walter, becoming president of UBC in 1969, Walter Gage held many posts and chaired so many committees that he had earned a reputation as "Dean of Everything." In addition to serving, at one time or another, as director of Summer Session, assistant to the dean of the Faculty of Arts and Science, dean of inter-faculty and student affairs, and deanship and acting president, he administered UBC's scholarship and bursary program for almost 40 years. It was said that he often wrote personal cheques for deserving students when student-assist funds had become depleted.

A cheerful and charming figure blessed with an en- cyclopedic memory, he often assuaged students by enquiring in great detail after brothers and sisters and aunts and uncles who had been students at UBC years earlier.

In this anecdote, 1965 UBC graduate Don Wilson describes Walter Gage's legendary generosity toward students who needed money.

I had just finished a year and was looking for work — and very broke. So I went to Dean Gage to see about getting a loan. Unfortunately, as I was not actually attending school there was nothing I could apply for.

Dean Gage said, "How much do you need, son." I pondered for a while and finally said, "Oh, about $50.00 should see me through until some work comes." He then reached into his drawer and took out a personalized cheque book and wrote me a cheque for $50.00, adding, "Pay me back when you're fully employed." At the end of that summer I returned to his office with a $50.00 bill but he wouldn't take it. Twice in succeeding years I've tried, still he refused. I've since discovered other friends who've had a similar experience.

I'm very happy to have had this honor tonight. I'm very glad he made that decision. And I've never heard him complain.

*On Jan. 6, 1975, Walter Gage was presented with an honorary life membership in the Association of Professional Engineers of B.C., the only person not registered in any Canadian professional engineering association to be so honored.

Degree citations

Walter Gage received honorary Doctor of Laws degrees from the University of Victoria and UBC. The UBC degree was awarded in 1963. Here is the citation for the degree, which was followed by a standing ovation that stopped the UBC congregation ceremony for a full five minutes.

"I now present, Mr. Chancellor, in the person of Dean Walter Gage, the most and best beloved of our University family. He is, in a sense, the embodiment of this University's academic conscience, and a man who has, by scholarly standards of teaching are equalled only by his concern always to do justice to colleagues and students alike. But if there is a decoration that the University of Victoria and friend of its many thousands of students and alumnae, today, and in the future, I am more than usually happy to present to you, sir, for the degree of Doctor of Laws, honors causa. WALTER HENRY GAGE."
the same experience. Of course, I'll never forget this. At that time I sure needed it.

UBC Arts and Law graduate Kenneth Burke recalls this encounter with Walter Gage:

As a callow, insouciant first-year Arts student, I arrived on Dean Gage's office doorstep one rainy September day in the early '60s seeking funds to tide me over till Christmas. The dean was in charge of funds for needy students, but what were my chances as an unknown, untitled, unfinancial fellow? I believed them to be minimal.

To my amazement, the good dean welcomed me warmly, addressed me by my first name, although I had met him only briefly along with thousands of other students at registration. Even more astounding, he good dean enquired as to the health and welfare of my two brothers who had passed through UBC several years earlier. How, he enquired, were William Thomas and Louis David progressing in the outside world? How he could have recalled both given names of my brothers, who had passed through UBC earlier years with the massive influx of post-World War Two veterans, mystified me.

After a pleasant exchange I left the office pocket-slip, a simple, financially secure for another term and convinced that Dean Gage put the "human" in "University." At least he put it in me.

Political science teacher Dr. C. Lloyd Brown John remembers a UBC winter when he needed a new pair of shoes. He got them, thanks to Walter Gage.

It was during one of my undergraduate years at UBC... In any case by December it was freezing and had neither money for Christmas nor money for the second-term living expenses. I was so badly off that the only pair of shoes I owned had worn through and I was walking on cardboard, which is half, considering how wet UBC can be by December. Eventually I applied for a student loan and in my application I noted the distressing state of my shoes. Somewhere along the way I was invited to meet Dean Gage to discuss my loan application. I entered his office in the Buchanan Building, sat down, and looked at him across the desk and said, "Can I have a pair of shoes?" I turned them up and he said "You've got a bursary and a loan." I've never forgotten that day and I'm deeply grateful for his compassion.

And Eric Nichol, well-known writer and B.C. Report columnist recalls a junior memory of the 1930s:

Date: September, 1937. Place: the Board Room, old Admin. Building. Occasion: a verbal means test, to determine if I qualified for the bursary that I need to fund my studies at UBC.

The inquisition was brutal. I had to prove that I was a poor student as well as a good student. I left the chamber feeling like one of the lesser wretches of Oliver Twist.

Then I went in... the door was open... to see this man who peered at me over his pipe. He spoke to me as though I was, by some miraculous transformation, a human being. He welcomed me to his home of learning. And right there in his office I found thousands, found in the presence of Walter Gage, I found my self-respect.

In general, Walter Gage had scant regard for possessions of a material nature and on rare occasions he could be absurdist minded as the anecdotes below illustrate.

First, this one from engineering graduate W.K. Gwyer.

Walter had a bursary at University in the '30s, and he used it perhaps less than 30 per cent of the time since the battles of the time were for students who rarely remembered to put gas in the tank. One could hardly list the many things, both large and small, he did to assist students in the hungry 30s.

Here are two more anecdotes from Byron Hender, a former president of the AMS who took over the administration of UBC's financial aid program from Walter Gage. His reference to Walter Gage enjoying "an occasional cigarette" is deliberate understate-ment. Until the late 1960s, when he gave up cigar-ettes, Dr. Gage was always surrounded by a cloud of smoke. Eric Nicol once observed that the ash from Dr. Gage's cigarettes tumbled so freely down his front that the bottom of his jacket were "solidly buried in a greenwast".

There was a day when President Gage enjoyed an occasional cigarette. One Sunday morning he arrived on campus, parked his old blue Pontiac all the flagpole at the north end of the Main Mall and strode off to the Awards Office in the Buchanan Building without realizing that a live end from a cigarette he had been smoking had found its way in to the upholstery on the front seat of his car.

It was not long before the president's car was belching smoke. A campus patrolman discovered the blaze and called the fire department, which put out the fire.

The patrolman finally located Walter in the Awards Office and reported what had happened. The president, who was marking papers at the time, looked up only long enough to thank the patrolman and calmly went on with his work.

President Gage is such a dedicated teacher that he occasionally puts everything out of his mind in the interests of his students. On more than one occasion he has emerged from a 12:30 p.m. lecture in the Buchanan Building and then walked over to the Faculty Club and purchased a cafeteria-style lunch in the downstairs area of the club.

On one occasion when I was lunching with him and I knew the same thing has happened on other occasions - the manager of the club, Dick Hansen, appeared and delicately reminded the president that he was hosting an official University luncheon upstairs in the Social Suite of the club.

Whereupon the president would march upstairs and eat a second luncheon.

On the whole, Walter Gage enjoyed ceremonial occasions, particularly ones that involved students. He was a beaming presence at UBC's annual Congregation, ceremony, where as president he stood beside the chair of the incumbent chancellor and shook the hand of every student receiving a degree.

Walter Gage had received every award that a grateful Alma Mater could bestow on him: the 1953 Great Trekker Award from the Alma Mater Society... a fitting tribute to a man who had taken part in that legendary event, and his 1958 honorary degree citation described him as "the most and best beloved of our University family..." (See box on Page 5.)

He was perhaps prouder of the fact that in 1968 he was named the first recipient of UBC's Master Teacher Award, established to recognize outstanding teachers of undergraduates. Characteristically, he retained the $5,000 cash prize that went with the honor to the University for the purchase of books for various UBC libraries.

For his services to the nation, Dr. Gage was named a Companion of the Order of Canada in 1971.

As pointed out earlier, most of the anecdotes and reminiscences about Walter Gage that appear above were originally printed in the March 28, 1975, edition of UBC Reports to mark his retirement as president of UBC. Ever after that edition appeared the editors continued to receive letters and other material from graduates about Walter Gage.

We end this tribute to him by printing a late ar- rival from Mrs. C.A. Willis, a 1941 graduate of UBC, because it seems to sum up the extraordinary personal loyalty and affection that Walter Gage could engender in students and graduates for both himself and the University of British Columbia.

I had not intended to write in my reminiscence of President Walter Gage. After all, I was a lovely Arts student to whom Math was a necessary evil of freshman year. However, after reading the current UBC Reports last night, I decided that I, too, wanted to stand and be counted in this unique tribute to his legend in his own time.

In the cozy UBC of the immediate pre-war period, nearly everyone knew everyone else. (Even lovely Arts students knew Engineers!) Certainly, everybody knew the young professor with the bouncy, springy walk... and that million dollar grin. As Pierre Berton said, "he was one of us."

Years later, during a visit home, before returning to Vancouver to live after many years spent in eastern Canada, I drove out to the campus for a nostalgic look around. But — nostalgia became nostalgic! Such a vast change — nothing was familiar — one couldn't even drive down the Mall! And then — coming towards me — that man with the remembered bouncy, springy walk... and that million dollar smile! It was still my campus... my University — after nearly 30 years!

What a privilege to belong to the Age of Gage!
NEW WORK-STUDY SCHEME BENEFITS UBC AND STUDENTS

Students needing financial help and campus library patrons benefited this spring from the services of a pilot work-study project sponsored by the ministry of education and introduced at UBC.

The ministry has given UBC $81,000 to employ more than 150 needy students during the 1978-1979 term. All the jobs are in the campus libraries, and to date, about 80 students have benefited from the project, working five or six hours a week for free or paid positions.

For the librarians and the people who work there, it is providing us with some very vital services, and I think it will make a big difference in the way the campus libraries operate," said Erika de Britton, administrative services librarian. "This will make some big changes. There is a lot of work that needed to be done. We were falling behind on a lot of projects that our regular and student staffs didn't have time for, and we couldn't afford to pay more staff out of our budget. We're really pleased to have had this amount of assistance."

The additional student help is keeping Sedgewick and the Wilson Record-
**UBC Calendar**

**URC CALENDAR DEADLINES**

- Oct. 22
- Deadline is 5:00 p.m.
- Oct. 12
- 28 Nov.
- Nov. 11
- Deadline is 5:00 p.m.
- Oct. 26

Send notice to: Information Services, Main Administration Building, Campus. Further information is available at 388-5137.

**THE VANCOUVER INSTITUTE**

SUNDAY, OCT. 22
- Owen Donnelly, British writer, and literary critic, speaks on "The History of Ideas: Evolution of Consciousness"

**TUESDAY, OCT. 23**

- **PHYSIOLOGY SEMINAR.** Dr. Catherine C. Cashion, University of California, on "Role of the Chemosensory System and the Brain in the Control of Appetite, Energy Expenditure and Related Hormones and Neuropeptides."
  - Room 114, Buchanan Building
  - Green Listening Sessions

**WEDNESDAY, OCT. 24**

- **URC CENTRE FOR HUMAN STUDIES.** Five in a series of four lectures with the general title A Tale of Four Cities. This lecture, "Mostar," Room 109, Buchanan Building.

**THURSDAY, OCT. 25**

- **GREEN STUDIES LECTURE.** Prof. Wolfgang Fischer, University of Oldenburg, Germany, on "Urban Forestry and Careers in Urban Forestry." Today's lecture in Partie: The Grand Design. Room 201, Buchanan Building.

**FRIDAY, OCT. 26**

- **GERMANIC STUDIES LECTURE.** Prof. Wolfgang Fischer, University of Oldenburg, Germany, on "Urban Forestry and Careers in Urban Forestry." Today's lecture in Partie: The Grand Design. Room 201, Buchanan Building.

**SATURDAY, OCT. 27**

- **ANNUAL MEETING.** Owen Donnelly, British writer, and literary critic, speaks on "The History of Ideas: Evolution of Consciousness"

---

**UBC Reports**

- **URC Reports**
  - **Monday, Oct. 16 (Continued)**

**SUNDAY, OCT. 15**

- **8:00 a.m.** IMMUNOLOGY SEMINAR. Dr. D. Kilburn, St. Paul's Hospital, on "Specific Functions of Tumor Immunity. Music, Radio, Faculty Club.

**MONDAY, OCT. 16**

- **8:30 a.m.** NATIONAL HEALTH AND ECONOMICS STUDIES SEMINAR. Prof. John MacKie, Flemery Planetarium, on "Analysis of the Decennial Censuses." Room 205, Agnew Building.

- **9:00 a.m.** MUSEUM OF ANTHROPOLOGY. Prof. McNeil, on "Aboriginal Art and History." Illustrated Museum of Anthropology, 6485 University Boulevard.

- **10:00 a.m.** SURFAMUS. Fraser Flute, music faculty, Alumni H. Studebaker Building.

**TUESDAY, OCT. 17**

- **8:30 a.m.** MECHANICAL ENGINEERING SEMINAR. S. N. Dahanayake, chairman, on "Crystallographic Development of Stainless Steels." Room 101, Civil and Mechanical Engineering Building.

- **10:00 a.m.** MECHANICAL ENGINEERING SEMINAR. S. N. Dahanayake, chairman, on "Crystallographic Development of Stainless Steels." Room 101, Civil and Mechanical Engineering Building.

- **10:30 a.m.** MECHANICAL ENGINEERING SEMINAR. S. N. Dahanayake, chairman, on "Crystallographic Development of Stainless Steels." Room 101, Civil and Mechanical Engineering Building.

**WEDNESDAY, OCT. 18**

- **8:30 a.m.** ZOOLOGY/PHYSIOLOGY SEMINAR. Dr. Martin Wells, Department of Zoology, on "The Perceptual World of an Intelligent Machine." Room 310, Aggregate Building.

- **9:00 a.m.** ARCHAEOLOGY INSTITUTE LECTURE. Dr. T. D. White, president, American Museum of Anthropology, on "Prehistoric Art." Room 407, Agnew Building.

**THURSDAY, OCT. 19**

- **8:30 a.m.** ARCHAEOLOGY INSTITUTE LECTURE. Dr. T. D. White, president, American Museum of Anthropology, on "Prehistoric Art." Room 407, Agnew Building.

**FRIDAY, OCT. 20**

- **8:00 a.m.** IMMUNOLOGY SEMINAR. Dr. D. Kilburn, St. Paul's Hospital, on "Specific Functions of Tumor Immunity. Music, Radio, Faculty Club.

---

**REMEMBRANCE DAY**

- The members of the community are asked to note that UBC will be closed on Sunday, October 15, 1978, in recognition of Remembrance Day. This day, which this year falls on the Saturday preceding the closure, the University (a) traditional ceremonies will be cancelled; however, a service will be held on Saturday, November 11, in the War Memorial Gymnasium at 10:45 a.m. to commemorate the 50th anniversary of the end of the Second World War.

**CRANE LIBRARY**

- The Crane Library for the blind in Brock Hall is seeking volunteers to read and record material for the blind. Readers with backgrounds in the applied and social sciences are urgently required, in addition to people willing to read in general subject areas. For more information, call 228-6113.

**EXHIBITS**

- An exhibition entitled Pharmacy — Development of the Sciences and the German Contribution will be on display in the lower Mall area of the Woodward International Resources Centre Oct. 20-31. The display is being held in the Faculty of Community Service and Continuing Education, Faculty of Pharmaceutical Sciences.

**UBC LANGUAGE INSTITUTE**

- The UBC Language Institute is sponsoring part-time courses on campus for non-native speakers wishing to improve their written and spoken English. All courses are for nonmembers, for members $30. For more information, call 228-5021.

**URC CENTRE FOR HUMAN STUDIES**

- Ten in a series of four lectures with the general title A Tale of Four Cities. This lecture, "Mostar," Room 109, Buchanan Building.

---

**SATURDAY, OCT. 28**

- **10:00 a.m.** SOCCER. UBC Thunderbirds vs. Victoria Thunderbirds.

**SUNDAY, OCT. 29**

- **10:00 a.m.** SOCCER. UBC Thunderbirds vs. Victoria Thunderbirds.

---

**URC Reports**

- **Nov. 11, 1978**
