Fonds Description

Walter Leek fonds. – 1914-1941.

70 architectural plans.

Biographical Sketch

Walter Leek Sr. was the senior engineer and head of Leek and Co. Limited, an engineering firm founded in 1808 in Harrogate, Yorkshire, England and later re-established in Vancouver, BC, Canada. The company was known for prefabricated piping and was made up of heating and power plant engineers and contractors. In addition to drawing the engineering plans for a number of the original buildings at the University of British Columbia, Mr. Leek also served as President of the Vancouver Exhibition Association and the Pacific National Exhibition for many years. As a result of his work in these positions he was made Chief Sookalmgett (Clear Skies) of the Kootenay Nation in 1927.

Scope and Content

The fonds consists of one series of architectural drawings of UBC buildings drawn between 1914 and 1941. There are 70 architectural plans in 20 sets that are arranged by the building title in alphabetical order, followed by plans for manholes, steam lines and block plans of the campus.

Architectural drawings consist of the mechanical, vacuum and heating systems of individual UBC buildings and block drawings of the campus. The majority of prints are wash-off prints, printed on drafting linen, but a few are on transparent architectural paper.

Notes

Donated to the University Archives by Walter Leek's great-great-grandson Tal Shalev in January 2017.
