Fonds Description

Faculty of Medicine fonds. – 1947-2009

39.06 m of textual records.

1 diskette.

47 color slides.

113 photographs: b&w, various sizes.

Graphic material.

Administrative History

By 1944 the B.C. Medical Association, the Provincial Government, and the University were actively discussing the establishment of a Faculty of Medicine. In 1949, following some controversy over the location of the school and the availability of hospital beds, a compromise was reached and the Faculty of Medicine was established at U.B.C. Dr. Myron M. Weaver, formerly Assistant Dean at the University of Minnesota Medical School, was appointed Dean in July 1949 and administrative offices and classrooms were established in temporary army huts. Clinical training took place off campus at Vancouver General Hospital and other Health Centre's designated by agreement as "Teaching Hospitals". U.B.C. admitted its first class of 60 medical students in September, 1950.

The Faculty of Medicine of the University of British Columbia, which includes a Medical School, a School of Rehabilitation Sciences (Physiotherapy and Occupational Therapy) and a School of Audiology and Speech Sciences, is closely affiliated with the major Vancouver teaching hospitals (St. Paul's, Shaughnessy and Grace Hospitals; Vancouver General Hospital and Health Sciences Centre; Providence Health Care; Children's and Women's Health Centre of B.C and the B.C. Cancer Agency) as well as, the Vancouver / Richmond Health Board and an additional sixty hospitals throughout B.C.

The Faculty is itself guided by a set of values which include: Excellence, Integrity, Discovery, People, Learning and Partnership. These values are in turn supported through the Faculty's mission statement, which is to advance the knowledge, understanding and health of society through education, scholarship, and health care, with excellence being held as the most important criterion for success. The appointment and retention of faculty members which includes the responsibilities to: recruit faculty members who have an interest in, and talent for, education and / or research; to clearly define and consistently apply conditions of appointment, reappointment and promotion; and to develop and fairly apply a system of remuneration, rewards, and recognition distinct from promotion alone.

The Faculty of Medicine is hierarchically organized with the Dean of Medicine at its pinnacle. Reporting directly to the Dean are the areas of Administration, the Associate Deans, the Departments and Schools, and the Research Centre's (including the B.C. Institute for Children's and Women's Health, Biomedical Research Centre, the Centre for Molecular Medicine and Therapeutics, the Neurodegenerative Disorders Centre, the Respiratory Disease Centre, the U.B.C. Centre for Disease Control, and the Vancouver Vascular Biology Research Centre). Included within the Area of Administration are the Directors of Faculty Affairs and Administration; Finance; Inter-institutional Planning; Planning, Construction and Space Utilization; as well as, the Sr. Faculty and the Faculty Development Officers. The Associate Deans are in turn responsible for Admissions, M.D. Undergraduate Education (which also has an Assistant Dean responsible for Faculty Educational Development), Student Affairs, Postgraduate (clinical) Education, and Research (which is additionally supported by four Assistant Deans, Research each of whom is the Vice President, Research in her/his home teaching hospital).

Scope and Content

The fonds of the Faculty of Medicine includes records which document the administrative and operational activities, actions and interests of the Faculty. Such records pertain to the establishment and organization of the Faculty; the development and actions of the Faculty's governing bodies and committees; the planning, development and construction of various Faculty buildings such as the University Hospital, the I.R.C. Centre, the Basic Medical Sciences buildings and the Health Sciences Centre. These records also refer to the use of regional hospitals as clinical teaching hospitals and to relations between the Faculty and the University at large; as well as, with other university medical schools, governments, medical and related professions, associations and societies, businesses and hospitals. The records within this fonds also pertain to the Faculty's receipt of gifts and donations, its departmental / divisional research endeavors and its applications for, and receipt of, awards for professional distinction. Types of material found in the Faculty of Medicine fonds include: correspondence, working papers, minutes, photographs, newspaper clippings, memorandum, agendas, studies, internal reports and reviews, applications, protocols and surveys. The fonds has been arranged into the following series: Historical Material; Faculty Governance; Committees; General Office Files; Dean of Medicine; and Photographs.

Notes

Fonds consists of institutional records – access requests must be reviewed by the University's FOIPOP Coordinator.

File list available.

A more extensive administrative history and fonds description, prepared in 2000, is also [available](#).

Consecutively transferred from the Faculty of Medicine, Dean's Office in 1990, 1992, 1998, 2008, 2012, 2013. Further accruals are expected.

Selected photographs have been digitized and included in UBC Archives' [Historical Photograph Collection](#) (UBC 81.1).

A collection of [oral history interviews](#) regarding the early history of the Faculty of Medicine is available through the Charles Woodward Memorial Room.

Series Descriptions

Historical Material series. – 1943-1987.

1.05m of textual records and graphic material.

The Historical Material series is a collection of material assembled by successive Deans and retained for their historical interest. The original records series that these documents were part of has been lost. Series documents contain historical information revealing the efforts to establish and organize a Faculty of Medicine at U.B.C., studies of hospitals and their role in the teaching activities of the new Faculty, and preliminary negotiations with the Provincial Government to establish a medical school. Types of materials found in this series include: a number of short histories of the Faculty and its departments, chronologies, original account books, rolls and mark registers, files of historical reports, studies, correspondence, memoranda, a ledger book, photographs, brochures, convocation and other ceremonial event programs and pamphlets, scrapbooks, and a file index.

Previously arranged by subject.

Boxes 1, 29-33, 150.

Faculty Governance series. – 1949-1977, 1985-1988, 1974-2009.

5.43m of textual records.

6 photographs.

This series consists of the records of the Faculty's governing bodies: the Council of the Faculty of Medicine (1949-1970), the Faculty Executive (1970-1977, 1988) and the Full Faculty of Medicine (1950-1974, 1985-1987). The Council of the Faculty of Medicine had its name changed to the Faculty Executive in 1970 to better reflect the executive administrative role of this body, although the functions and the duties of these two entities remained the same. The Council, and subsequently the Executive, is the primary governing body of the Faculty. It consists of the Dean of Medicine as Chair, Associate Deans, Department Heads, a resident representative, a B.C. Medical Association representative and the Coordinator of Health Sciences. It meets once a month and is responsible for Faculty administrative business, matters of Faculty policy and procedure, the election and appointment of members to Faculty committees, the discussion of current and contentious issues of concern to the Faculty and the coordination of departmental headship searches.

The Full Faculty of Medicine, as another governing body of the Faculty, has its membership open to all interested Faculty members. One of the primary functions of

the Full Faculty is to review and approve the reports and recommendations of the Curriculum Committee before curriculum changes are submitted to the University Senate. The Full Faculty also discussed and endorses other matters dealt with by the Faculty Executive. This series consists of minutes, correspondence, reports and memoranda relating to the proceedings, decisions and actions of the Faculty's bodies of governance.

Previously arranged chronologically.

Further accruals are expected.

Boxes 1-4, 50, 76, 90-100, 150.

Committees series. – 1950-2004.

7.72m of textual records.

This series consists of the minutes and related papers of a wide variety of Faculty committees. It is important to note that such a numerous array of departmental, inter-departmental, special, standing, joint and ad hoc committees, including their related task forces and working groups, have undergone a number of modifications including name and / or mandate changes and reporting restructuring; as well, that these committees form a very important part of the Faculty of Medicines democratic administrative structure. Types of materials found in this series include minutes, correspondence, reports, memoranda, copies of research articles and papers and copies of research funding applications relating to the proceedings, decisions and actions of the Faculty's committees.

Previously arranged chronologically by committee or by subject.

Further accruals are expected.

Boxes 5-11, 54-56, 70, 72-80, 88, 101-111, 145.

General Office Files series. – 1949-2004.

18.91 m of textual records.

13 photographs: b&w ; 22 x 27 cm.

The General Office Files series consists of the main administrative and operational records for the Faculty; as such they primarily reflect the activities and responsibilities of the Deans Office and its relations with the departments and divisions of the Faculty; other faculties on campus; hospitals; the medical and related professions, associations and societies; governments and other universities. Such records also pertain to

academic matters, curriculum proposals and changes, administrative considerations, policy development and significant achievements within individual departments. Types of material found in the General Office Files include correspondence, reports, financial statements, memoranda, forms, budget papers, studies, working papers, proposals, course outlines, policy and procedures papers, newsletters, photographs, brochures and minutes.

Prior to accessioning, the records for the 1949-1978 period had been prepared for destruction. Documents had been emptied from their file folders and dumped in an unorganized manner into boxes. This mass of sentenced material was subsequently reviewed; the result of which allowed for the salvage of some materials and their "reconstruction" into a foldered state. Other materials scheduled for destruction, had been maintained in their file folders; as a result no further reconstructive actions were taken upon them. This salvaged material reveals the Faculty's earliest activities such as the development of new departments, early research projects, admissions policies and accommodations for offices, classrooms and laboratories and can be found in Boxes 13-15.

Previously arranged by subject.

Further accruals are expected.

Boxes 11-22, 34-49, 51-54, 57-71, 87, 112-133, 147-149, 152-153.

Dean of Medicine series. – 1954-2007.

5.65m of textual records.

The Dean of Medicine series consists of records put together from a variety of files held personally by successive Deans. This series is related to administrative and operational matters of particular interest to the Dean. Many of these files were retained in the Deans' personal office because of their ongoing sensitivity or senior administrative nature. Included are such items as departmental reviews and Faculty accreditation surveys and reports; the latter of which pertain to the Faculty's programs, courses, curriculum, resources and accommodations and provide a general indication of the quality of medical education at U.B.C. There are also committee files not found in other series relating to accreditation, teaching hospitals, accommodation, space allocation and curriculum. The series contains material on the expansion of the Faculty, relations with the Provincial Government including correspondence between the Dean and the Ministers and Deputy Ministers of Health, of Education and of Universities, Science and Communications. Also revealed are relations between the Faculty and Greater Vancouver hospitals. This series contains the following subseries: the Council of

University Teaching Hospitals (C.O.U.T.H.). Types of materials found in the Dean of Medicine series include correspondence, reports, statistics, financial statements, budget papers, memoranda, plans, minutes, photographs and working papers.

Previously arranged by subject.

Boxes 23-27, 84-86, 134-144, 150.

[The Council of University Teaching Hospitals \(C.O.U.T.H.\) subseries.](#) – 1987-2000.

1.25m of textual records.

For approximately ten years (1978-1988) the Council of University Teaching Hospitals existed as an informal organization providing for discussion between the University's Health Sciences faculties and schools and the major affiliated Teaching Hospitals. After much consideration, it was collectively determined that for the Council to undertake specific projects in the joint interests of its constituent organizations, actions had to be taken which would result in the formalization of the Council and the establishment of the position of Executive Director. To this end, C.O.U.T.H. formally established itself on 15 November 1988 as a society supported by a re-established organizational and sub-committee structure under a newly formed societal Constitution and set of Bylaws.

The founding members of C.O.U.T.H. include the B.C. Children's Hospital, the Cancer Control Agency of B.C., the Salvation Army Grace Hospital, St. Paul's Hospital, The University of British Columbia, University Hospital, Vancouver General Hospital, and the Western Rehabilitation Society. C.O.U.T.H. is comprised of two primary committees which serve its mandate; these include the Council and the Operating Committee. As a collaborative society, C.O.U.T.H. serves those Teaching Hospitals having a comprehensive affiliation agreement with the University of British Columbia, as well as the University itself.

This sub-series of the Dean of Medicine series consists of minutes; reports; correspondence; studies; briefs and assessments conducted, accumulated or compiled by the Executive Director, the Council and the Operating Committee and their various sub-committees and task forces.

Boxes 81-83, 89.

Photographs series. – 1951-1970.

104 photographs: b&w, various sizes.

The Photographs series contains a small number of black and white images of various Faculty of Medicine openings, special events, ceremonies, displays, exhibits, buildings and facilities.

Most of the photographs were found unorganized in a storage box and were not separated from files of textual material. The sole exception are the photographs of the Faculty's "Safeguarding Motherhood" exhibit at the 1960 Pacific National Exhibition. These images were separated from textual material found in the General Office Files series.

Previously arranged by subject. Selected images now included in UBC Archives' [Historical Photograph Collection \(UBC 81.1\)](#).

Boxes 28, 146.
