## Biographical Sketch

Former University of British Columbia faculty member and Nobel prize winner Michael Smith (1932-2000) was born in Blackpool, England where he attended Arnold School from 1943 to 1950. He received his B.Sc. in 1953 Ph.D. in 1956 from the University of Manchester. Smith completed a post-doctoral fellowship with the B.C. Research Council between 1956 and 1960 under the direction of Gobind Khorana. In 1960, the Khorana group, including Smith moved to the Institute for Enzyme Research at the University of Wisconsin. Wanting to return to the west coast, Smith accepted a position with the Fisheries Research Board of Canada Laboratory in Vancouver in 1961. From 1966 to 1997, he was Career Investigator (formerly Medical Research Associate) in the Department of Biochemistry. He also served as Director of the Biotechnology Laboratory at UBC from 1987 to 1996 and Scientific Leader of the National Network of Centres in Excellence in Protein Engineering. In 1994, Smith was named as Peter Wall Distinguished Professor Biotechnology and in 1998 he became director of the B.C. Cancer Agency Genome Sequence Centre.

In 1993, Smith was awarded the Nobel Prize in Chemistry for his pioneering work in the development of the technology of "site directed mutagenesis", a technique which allows gene sequences to be altered in a designated manner. In commenting on the importance of this development, a departmental tribute to Smith observed that:

Site directed mutagenesis allows the reprogramming of genes to investigate the influence of genetic makeup on the characteristics and development of cells. Proteins of medical or industrial importance, such as antibodies and enzymes, can be redesigned to improve their stability and effectiveness. Dr. Smith's contribution to many fields of biology and medicine is therefore enormous.

In addition to his Nobel Prize, Smith received numerous other awards and distinctions for his scientific achievements. Some of these included: Boehringer Mannheim Prize of the Canadian Biochemical Society (1981); Fellow of the Royal Society of Canada (1981); Gold Medal, Science Council of British Columbia (1984); Fellow of the Royal Society, London (1986); Gairdner Foundation International Award (1986); Killam Research Prize, UBC (1986); Award of Excellence, Genetics Society of Canada (1988); G. Malcolm

Brown Award, Canadian Federation of Biological Societies (1989); Flavelle Medal, Royal Society of Canada (1992); Principal Award, The Ernest C. Manning Awards Foundation (1994); Companion of the Order of Canada (1994); Induction into Canadian Medical Hall of Fame (1995); Order of British Columbia (1995); BC Biotechnology Award for Innovation and Achievement (1999); and Royal Bank Award (1999). He also received twenty five honorary degrees. Michael Smith died on 4 October 2000.

### **Scope and Content**

The fonds consists of Smith's biographical information, speeches, correspondence, laboratory notes and research material, copies of publications, and slides and presentation materials.

### **Notes**

File list available.

Selected photographs have been digitized and included in UBC Archives' [Historical Photograph Database](#) (UBC 48.1).

## Series Descriptions

### **Biographical Series.** – 1964-2000.

19.5 cm of textual records.

Series consists of copies of Michael Smith's CVs, publication lists, clippings, career information and awards associated with him.

Box 1

### **Speeches Series.** – 1988-2000.

26 cm of textual records.

Series consists of copies of speeches given by Michael Smith between 1988 and 2000 to a variety of different audiences.

Boxes 2-3

### **Correspondence Series.** – 1987-2000.

1.82 m of textual records.

Series consists of correspondence (and related materials) to and from Michael Smith.

Boxes 4-13

### **Appointments Series.** – 1994-2000.

85 cm of textual records.

Series consists of correspondence, travel itineraries, copies of speeches, agendas, minutes and other materials relating to various events and meetings attended by Michael Smith between 1994 and 2000. Identified as "Appointments" in Smith's filing system, the events/activities have been filed chronologically.

Boxes 14-18

### **Lab Notes and other Research Material Series.** – 1975-1993, 1997.

49 cm of textual records.

2 photographs.

Series consists of Smith lab notes generated during his leave at Fred Sanger's lab (1975/76) and another set of lab notes (1976-1980), and a third set from his 1997 sabbatical at Maynard Olson's lab in Seattle. Also included are lab notes created by

David Leung (1979/80) and Andrew Spencer (1982/83). The series also includes other research material generated by Smith and printed material from cloning conferences staged in 1983 and 1984.

Boxes 19-21, 37

**Publications Series.** – 1957-1997.

1.43 m of textual records.

Series consists of copies of Michael Smith's own and co-authored articles in scientific journals. Many of the files include a copy of the original typescript as well as article off-prints.

Boxes 22-32

**Gobind Khorana Series.** – 1957-2000.

13 cm of textual records.

7 photographs.

Series consists of Smith's correspondence with or about Gobind Khorana (1961-2000), copies of Khorana's publications (1957-1968), and photographs of Khorana.

Box 33

**Slides and Presentation Material Series.** – 196- -199- .

1,576 slides.

3 cm of textual records.

Series consists of presentation slides and some lists of slides used by Michael Smith in various presentations. Also included is a small sub-series of slides from his Nobel Prize celebrations in Stockholm and a few from Vancouver.

Boxes 34-35

**Miscellaneous Material Series.** – 1989-1998.

10 cm of textual records.

Series consists of materials generated through Smith's involvement with the Peter Wall Institute and other files that do not appear to have been incorporated elsewhere in Smith's filing system.

BOX 19

LAB NOTEBOOKS AND OTHER RESEARCH MATERIAL SERIES

Three volumes of Smith’s lab notes (primarily from 1975/76 sabbatical when Smith worked in Fred Sanger’s Cambridge, England molecular biology lab)  
 [Note: lab notes removed from original three ring binders]

- 19-1 30 September 1975 – 11 March 1976
- 19-2 14 March 1976 – 28 August 1976
- 19-3 29 August 1976 – 21 September 1976
- 19-4 Notebook – Front consists of a sixteen page "Recipe Book" and the back five pages of Smith’s "Ideas for Work in Cambridge" (n.d.)
- 19-5 Lab Notebook (1 November 1976 – 22 June 1977)
- 19-6 Lab Notebook (10 June 1977 – 7 February 1978)
- 19-7 Lab Notebook (7 March 1978 – 27 June 1980)
- 19-8 Lab Notebook – David Leung (20 February 1979 – 29 February 1980)
- 19-9 Lab Notebook – Andrew M. Spencer (19 March 1982 – 26 January 1983)

## BOX 20

- 20-1 "Protocols"
- 20-2 Smith Laboratory – Bacterial and Yeast Strain Inventory (to 22 June 1993)
- 20-3 Book with notes taken by Smith at a "yeast" meeting (n.d.)
- 20-4 Unidentified notebook [not Smith's handwriting] (n.d.)
- 20-5 Papers from "Oligonucleotides et Genetique Moleculaire" conference (January 1985) with some handwritten notes by Smith
- 20-6 Biochemistry 303 "Molecular Biology Notes" – Patrick Dennis (n.d.)
- 20-7 Clinical Neurochemistry Course – "Biochemical Genetics, Genetic Engineering and Neurological Diseases" San Diego, California (April 26, 1983)

## BOX 21

- 21-1 Binder of material from Molecular Cloning of Eukaryotic Genes Course, Cold Spring Harbour (1983)
- 21-2 Binder of material from Molecular Cloning Course, Cold Spring Harbour (1984)

(continued)

## Photographs

- Removed from binders, digitized and included in UBC Archives' [Historical Photograph Database \(UBC 48.1\)](#).
- 48.1/4 B/W print of Michael Smith and other molecular cloning course participants at Cold Spring Harbour (1983)
  - 48.1/5 B/W print of Michael Smith and other molecular cloning course participants at Cold Spring Harbour (1984)

GOBIND KHORANA SERIES

33-1 Smith's correspondence with and about G. Khorana (1961-1981)

- 33-2 Correspondence with Khorana (1992-2000). Also includes correspondence re: Khorana Chair at UBC (1991-1997) and Khorana Symposium (1993)
- 33-3 List of Khorana's scientific publications (1951-1959)
- 33-4/7 Khorana publications (1953-1968)

Photographs digitized and included in UBC Archives' [Historical Photograph Database \(UBC 48.1\)](#).

- 48.1/1 Colour photograph of Gobind Khorana with Pope John Paul II (n.d.)
- 48.1/2 Colour photograph of Gobind Khorana beside Walter Gage in UBC congregation procession where he received an honorary degree (1977)
- 48.1/3 Five colour photographs of Khorana, Michael Smith and others during Khorana's visit to Seattle in 1994.

LAB NOTES AND OTHER RESEARCH MATERIAL SERIES (Cont'd)

According to Smith's colleague Caroline Astell who donated the material, the lab notes were created in 1997 while Smith worked on his sabbatical at Maynard Olson's lab in Seattle. While there Smith familiarized himself with the emerging field of genomics and it was there that he conceived of the idea of establishing a Genome Sequencing Centre at the BC Cancer Agency jointly with Victor Ling.

Astell indicated that these lab notes are important for two reasons. First, because there are few lab notebooks from Smith's Site-Directed Mutagenesis studies, this material adds significantly to what is available. Secondly, these lab notes reveal that although Smith was immersing himself in genomics, he lacked the computer skills to ask many of the questions that interested him - so he used paper and pencil to work out his thoughts.
